

ENERGY COMMISSION OF NIGERIA
FEDERAL MINISTRY OF SCIENCE, TECHNOLOGY AND INNOVATION
FEDERAL REPUBLIC OF NIGERIA

NATIONAL ENERGY MASTERPLAN

[Approved 27th April 2022 by Government]

2022

Energy Commission of Nigeria
Plot 701C Central Business District
PMB 358, Garki
Abuja, Nigeria
Email: dg@energy.gov.ng

Contents

List of Tables

Foreword

Preface

Abbreviations and Acronyms

Units of Measurement

Executive Summary

Chapter 1: General Introduction

Chapter 2: Energy Demand and Supply Projections/Tragets

Chapter 3: Petroleum Resources

- 3.1 Crude Oil
 - 3.1.1 Policies
 - 3.1.2 Objectives
 - 3.1.3 Action Plan
- 3.2 Natural Gas
 - 3.2.1 Policies
 - 3.2.2 Objectives
 - 3.2.3 Action Plan
- 3.3 Shale Hydrocarbon
 - 3.3.1 Policies
 - 3.3.2 Objectives
 - 3.3.3 Action Plan

Chapter 4: Coal and Tar Sands/Bitumen

- 4.1 Tar Sands/Bitumen
 - 4.1.1 Policies
 - 4.1.2 Objectives
 - 4.1.3 Action Plan
- 4.2 Coal
 - 4.2.1 Policies
 - 4.2.2 Objectives
 - 4.2.3 Action Plan

Chapter 5: Nuclear Energy

- 5.1.1 Policies
- 5.1.2 Objectives
- 5.1.3 Action Plan

Chapter 6: Renewable Energy Resources

- 6.1 Hydropower
 - 6.1.1 Policies
 - 6.1.2 Objectives
 - 6.1.3 Action Plan
- 6.2 Solar
 - 6.2.1 Policies
 - 6.2.2 Objectives
 - 6.2.3 Action Plan
- 6.3 Wind
 - 6.3.1 Policies
 - 6.3.2 Objectives
 - 6.3.3 Action Plan
- 6.4 Hydrogen
 - 6.4.1 Policies
 - 6.4.2 Objectives
 - 6.4.3 Action Plan

	6.5	Other Renewables
		6.5.1 Policies
		6.5.2 Objectives
		6.5.3 Action Plan
Chapter 7:		Bio-Energy
	7.1	Biomass
		7.1.1 Policies
		7.1.2 Objectives
		7.1.3 Action Plan
	7.2	Fuel-wood
		7.2.1 Policies
		7.2.2 Objectives
		7.2.3 Action Plan
	7.3	Bio-Fuel
		7.3.1 Policies
		7.3.2 Objectives
		7.3.3 Action Plan
Chapter 8:		Electricity
		8.1.1 Policies
		8.1.2 Objectives
		8.1.3 Action Plan
Chapter 9:		Energy Utilization
	9.1	Industry
		9.1.1 Policies
		9.1.2 Objectives
		9.1.3 Action Plan
	9.2	Transport
		9.2.1 Policies
		9.2.2 Objectives
		9.2.3 Action Plan
	9.3	Households
		9.3.1 Policies
		9.3.2 Objectives
		9.3.3 Action Plan
	9.4	Commercial/Services
		9.4.1 Policies
		9.4.2 Objectives
		9.4.3 Action Plan
	9.5	Agriculture
		9.5.1 Policies
		9.5.2 Objectives
		9.5.3 Action Plan
Chapter 10:		Energy Efficiency and Conservation
	10.0	Introduction
		10.0.1 Policies
		10.0.2 Objectives
		10.0.3 Action Plan
	10.1	Industry
		10.1.1 Policies
		10.1.2 Objectives
		10.1.3 Action Plan
	10.2	Transport
		10.2.1 Policies
		10.2.2 Objectives
		10.2.3 Action Plan

- 10.3 Residential
 - 10.3.1 Policies
 - 10.3.2 Objectives
 - 10.3.3 Action Plan
- 10.4 Commercial/Services
 - 10.4.1 Policies
 - 10.4.2 Objectives
 - 10.4.3 Action Plan
- 10.5 Building Designs
 - 10.5.1 Policies
 - 10.5.2 Objectives
 - 10.5.3 Action Plan
- 10.6 Agriculture
 - 10.6.1 Policies
 - 10.6.2 Objectives
 - 10.6.3 Action Plan

Chapter 11: Environment and Climate Change

- 11.1.1 Policies
- 11.1.2 Objectives
- 11.1.3 Action Plan

Chapter 12: Other Energy Issues

- 12.1 Research and Development
 - 12.1.1 Policies
 - 12.1.2 Objectives
 - 12.1.3 Action Plan
- 12.2 Manpower Development and Training
 - 12.2.1 Policies
 - 12.2.2 Objectives
 - 12.2.3 Action Plan
- 12.3 Local Content
 - 12.3.1 Policies
 - 12.3.2 Objectives
 - 12.3.3 Action Plan
- 12.4 Bilateral, Regional and International Cooperation
 - 12.4.1 Policies
 - 12.4.2 Objectives
 - 12.4.3 Action Plan
- 12.5 Gender Issues
 - 12.5.1 Policies
 - 12.5.2 Objectives
 - 12.5.3 Action Plan

Chapter 13: Energy Financing

- 13.1.1 Policies
- 13.1.2 Objectives
- 13.1.3 Action Plan

Chapter 14: Planning and Policy Implementation

- 14.1 Energy Planning
 - 14.1.1 Policies
 - 14.1.2 Objectives
 - 14.1.3 Action Plan
- 14.2 Policy Implementation
 - 14.1.1 Policies
 - 14.1.2 Objectives
 - 14.1.3 Action Plan

Appendix A Monitoring and Evaluation Parameters

Table 14.3:	NEMP Implementation Monitoring

Foreword

The National Energy Policy (NEP), often sought after by investors, scholars and development partners, first approved by Government in April 2003, provided a powerful set of recommendations to address the nation's energy challenges. However, due to developments in the energy sector, the 2003 policy had to be reviewed in 2013 , 2018 and 2021 to address the dynamics in the sector. This National Energy Masterplan, approved by the Federal Executive Council on 27th April 2022, directly responds to the challenges brought out in the reviewed National Energy Policy and puts the government's commitment to this policy into action. It seeks to achieve the goals of the revised NEP by converting the strategies to actionable programmes, activities and projects. Moreover, it establishes the framework that will allow all stakeholders to jointly understand their roles and participate in the agenda important to achieving the nation's energy goals for stable, reliable and diverse sources of domestic energy in an environmentally sustainable manner and with the active participation of the private sector as specified in the National Energy Policy.

The National Energy Masterplan has been developed to capture all factors germane to the balanced and coordinated development of the energy sector, including energy demand and supply, production, processing, research and development, training and manpower development, energy databank, fossil fuels, nuclear energy, renewable energy, environment, energy efficiency and conservation and international cooperation. It also specifies procedures for implementation, monitoring and evaluation of the level of compliance with the objectives of the National Energy Policy.

By bringing in a wide range of stakeholders and specifying their roles, the energy sector is expected to take advantage of the synergy among the relevant agencies and all levels of government, non-governmental agencies, the private sector, investors, development partners, and the international community. In working together under the framework of this National Energy Masterplan, stakeholders reinforce their commitment to the goals of the reviewed National Energy Policy, the National Energy Masterplan and the balanced development of the energy sector. It is my belief that energy is an all-pervading factor in the quest for socio-economic development and improved quality of living and that the National Energy Masterplan is the most efficient and effective way to develop the sector.

Finally, this National Energy Masterplan is intended to be a living document that will be updated periodically. I commend it to all Nigerians and stakeholders in the Nigerian energy sector.

**The Honourable Minister,
Federal Ministry of Science, Technology and Innovation**

Preface

The provision of adequate, reliable and affordable energy is crucial to the ongoing reform in Nigeria. In order to alleviate poverty and enhance quality of living, energy in one form or the other has to be expended for living and income generating activities. Hence, the supply and utilization of energy has to be managed effectively and efficiently in a sustainable manner. It was in recognition of these facts that government inaugurated the National Committee on Energy Masterplan (NCEM) on May 4th, 2006, to articulate the first National Energy Masterplan (NEMP) for the nation. The objective is to provide a framework for the implementation of the National Energy Policy, which was approved by the Federal Government in April 2003. The fundamental principle of the NEP is the optimal utilization of the nation's viable energy resources for sustainable national development and their utilization to foster regional and international cooperation.

The translation of the provisions of the NEP into a National Energy Masterplan, for implementation over the short, medium and long terms, is in keeping with Article 5(d) of Energy Commission of Nigeria Act, E10, LFN (2004), which empowers the Energy Commission of Nigeria (ECN) to “prepare, after consultation with such agencies of government, whose functions relate to the field of energy development or supply as the Commission considers appropriate, periodic Masterplans for the balanced and coordinated development of energy in Nigeria.” The NEMP is expected to provide the set of activities and programmes with timelines through which the NEP would be implemented or achieved.

Membership of the National Committee cut across policy and planning Ministries, Departments and Agencies (MDAs), energy producers and marketers, promoters of sustainable energy systems, energy consumers, energy regulators, non-governmental organizations, development partners, the banking sector, women organizations, the organized private sector, private energy consultants, tertiary institutions, research centres & institutes and professional bodies. To carry out the assignment, the NCEM appointed Sub-committees on: Oil and Gas and Other Conventional Energy Sources; Nuclear Energy; New and Renewable Energy Sources; Energy Efficiency and Conservation, Electricity, Energy Utilization; Other Energy Issues; Energy Financing and Energy Planning, Implementation, Monitoring and Evaluation. Each sub-committee held several meetings separately to obtain inputs from its members and other relevant sources on the specific subjects assigned to it. In some cases, studies were conducted to complement the inputs.

The reports submitted by the sub-committees were reviewed by a Harmonization Committee, comprising the chairmen, secretaries and assistant secretaries of the sub-Committees, and the Directors of the Energy Commission of Nigeria, which adopted the format in which the NEMP is currently presented. A technical editorial sub-committee, comprising a few of the chairmen of the sub-committees, all the secretaries and assistant secretaries and some selected members, also reviewed the submissions of the Harmonization Sub-committee. A draft NEMP was therefore produced in 2007.

In 2013, the Energy Commission of Nigeria (ECN) with active participation of stakeholders reviewed the National Energy Policy (NEP) to reflect recent developments in the national and international energy scenes. Consequently, this made a review of the 2007 draft National Energy Master Plan (NEMP) very imperative. In the last quarter of 2014, stakeholders were again brought together to carry out a review of the 2007 draft NEMP in line with the revised

2013 NEP. It was again reviewed in 2020 and 2021 and validated in 2022. The NEMP document consists of fourteen chapters: Chapter 1: Introduction; Chapter 2: Energy Supply and Demand Projections/Targets; Chapter 3: Petroleum Resources; Chapter 4: Coal and Tar Sand/Bitumen; Chapter 5: Nuclear Energy; Chapter 6: Renewable Energy; Chapter 7: Bio-Energy; Chapter 8: Electricity; Chapter 9: Energy Utilization; Chapter 10: Energy Efficiency and Conservation; Chapter 11: Environment and Climate Change; Chapter 12: Other Energy Issues; Chapter 13: Energy Financing Policy and Chapter 14: Planning and Policy Implementation.

It is my sincere hope that this document will provide the framework for a sustainable development of the Nigerian energy sector and enhance the contribution of the sector to the national economy.

**Director-General
Energy Commission of Nigeria
Abuja**

Abbreviations and Acronyms

ABU	Ahmadu Bello University
ADPs	Agricultural Development Projects
AFAN	All Farmers Association of Nigeria
AFREC	African Energy Commission
AGFA	Associated Gas Framework Agreement
AGUFI	Associated Gas Utilization Framework Agreement
ARCN	Agricultural Research Council of Nigeria
AU	African Union
AUDA	African Union Development Agency
BOA	Bank of Agriculture
BOI	Bank of Industry
BPE	Bureau of Public Enterprises
BPIC	Bitumen Project Implementation Committee
BPP	Bureau of Public Procurement
CAC	Corporate Affairs Commission
CBN	Central Bank of Nigeria
CBOs	Community Based Organizations
CERD	Centre for Energy Research and Development
CERT	Centre for Energy Research and Training
CNERT	Centre for Nuclear Energy Research and Training
CNES	Centre for Nuclear Energy Studies
CNEST	Centre for Nuclear Energy Studies and Training
CNG	Compressed Natural Gas
COREN	Council for the Regulation of Engineering in Nigeria
CRIN	Cocoa Research Institute of Nigeria
CSO	Civil Society Organization
DICON	Defense Industries Corporation of Nigeria
DISCOs	Distribution Companies
DMO	Debt Management Office
DPs	Development Partners
DSS	Department of State Services
DTCA	Directorate of Technical Cooperation in Africa
ECN	Energy Commission of Nigeria
ECOWAS	Economic Community of West African States

ECREE	ECOWAS Centre for Renewable Energy and Energy Efficiency
EFCC	Economic and Financial Crimes Commission
ERCs	Energy Research Centres
ESI	Electricity Supply Industry
FAN	Farmers Association of Nigeria
FCCPC	Federal Competition and Consumer Protection Commission
FCDA	Federal Capital Development Authority
FCT	FederalCapitalTerritory
FCTA	FederalCapitalTerritory Administration
FDI	Foreign Direct Investment
FGN	Federal Government of Nigeria
FIRS	Federal Inland Revenue Service
FMAv.	Federal Ministry of Aviation
FMA&RD	Federal Ministry of Agriculture and Rural Development
FMCDE	Federal Ministry of Communications and Digital Economy
FMed.	Federal Ministry of Education
FMEnv.	Federal Ministry of Environment
FMFBNP	Federal Ministry of Finance, Budget and National Planning
FMH	Federal Ministry of Health
FMIT&I	Federal Ministry of Industry, Trade & Investment
FMJ	Federal Ministry of Justice
FML&E	Federal Ministry of Labour and Employment
FMWH	Federal Ministry of Works, and Housing
FMWR	Federal Ministry of Water Resources
FMSTI	Federal Ministry of Science, Technology&Innovation
FMT	Federal Ministry of Transportation
FMIC	Federal Ministry of Information and Culture
FMWA&SD	Federal Ministry of Women Affairs and Social Development
FMYD	Federal Ministry of Youth Development
FRIN	Forestry Research Institute of Nigeria
FRCN	Federal Radio Corporation of Nigeria
FRSC	Federal Roads Safety Commission
GDP	Gross Domestic Product
GENCO	Generation Company
IAEA	International Atomic Energy Agency

IEC	International Energy Charter
IOCs	International Oil Companies
IOPs	Indigenous Oil Producers
IPMAN	Independent Petroleum Marketers Association of Nigeria
IPP	Independent Power Producers
IRENA	International Renewable Energy Agency
ITF	Industrial Training Fund
JDZA	Joint Development Zone Authority
JV	Joint Venture / Joint Ventures
LGs	Local Government
LGHQs	Local Government Headquarters
LNG	Liquefied Natural Gas
LPG	Liquefied Petroleum Gas
MAED	Model for Analysis of Energy Demand
MAN	Manufacturers Association of Nigeria
MCO	Mining Cadastre Office
MDAs	Ministries, Departments, Agencies
MDG	Millennium Development Goals
MEPS	Minimum Energy Performance Standards
MFA	Ministry of Foreign Affairs
MI	Ministry of Interior
MMSD	Ministry of Mines and Steel Development
MPA	Ministry of Police Affairs
MPR	Ministry of Petroleum Resources

PENCOM	National Pension Commission
PIA	Petroleum Industry Act
PHCN	Power Holding Company of Nigeria
PRODA	Project Development Institute
PTDF	Petroleum Technology Development Fund
RBDA	River Basin Development Authority
R&D	Research and Development
RCs	Research Centres
RD&T	Research, Development and Training
RE	Renewable Energy
REA	Rural Electrification Agency
RET	Renewable Energy Technology
RI	Research Institutes
RRIN	Rubber Research Institute of Nigeria
RMRDC	Raw Materials Research and Development Council
S, M, L	Short, Medium, Long
SASS	States Assemblies
SDG	Sustainable Development Goal
SEC	Securities and Exchange Commission
SEPA	States Environmental Protection Agency
SGs	State Governments
SHESTCO	Sheda Science and Technology Complex
SMEDAN	Small and Medium Enterprises Development Agency of Nigeria
SMDF	Social Minerals Development Fund
SON	Standards Organization of Nigeria
TCN	Transmission Company of Nigeria
TETFUND	Tertiary Education Trust Fund
TIs	Tertiary Institutions
TOPREC	Town Planners Registration Council
UBEC	Universal Basic Education Commission
UCC	Utility Charges Commission
UN	United Nations

Units of Measurement

bscf	billion standard cubic feet
GWh	Gigawatt hour
kgoe	kilogramme of oil equivalent
kWh/day	kilowatthour per day
mbpd	million barrels per day
MW	Megawatt
MWe	Megawatt electric
Mtoe	Million tonnes of oil equivalent
scf	standard cubic feet

Symbols

CO ₂	Carbon Dioxide
E5	5% Ethanol
E10	10% Ethanol
B10	10% Biodiesel
B20	20% Biodiesel

Executive Summary

1. Background

The energy sector is critical to the nation's socio-economic development and growth, hence the need for a comprehensive plan for its development. This National Energy Masterplan (NEMP) for Nigeria will ensure a guided implementation of the National Energy Policy (NEP). The NEMP focuses on all energy sources (including, renewable energy and energy efficiency); energy utilization; manpower development; energy financing; energy planning, implementation, monitoring and evaluation; and other cross-cutting issues. It is a blueprint for the sustainable development, supply and utilization of the various sources of energy available within the country, and for the use of these resources in international trade and co-operation.

The NEMP is thus an implementation plan and roadmap for the realization of the energy policy objectives given the strategies enunciated in the NEP. For every sector of the economy, the NEMP details the programmes or activities required for each strategy, together with their associated executing, collaborating, and funding agencies and their timelines. The timelines in the NEMP are the Short term, Medium term and Long term. Monitoring and evaluation strategies for the energy policy implementation plans have also been developed to ensure early corrective action on set targets within the timelines.

2. Crude Oil

Given that oil will continue to play a major role in the nation's economy being the most valuable economic asset and a non-renewable resource, the NEMP recommends:

- The need to expand the reserve base through continuous and intensive exploration activities;
- Promoting conservation of oil resources;
- Encouraging the use of domestic raw materials such as bentonite and barytes as substitute for imported ones in the sub-sector;
- Environmentally friendly exploitation and utilization of oil resources;
- Wider distribution of oil products to all parts of the country to ensure access to commercial energy for socio-economic activities;
- Encouragement and intensive promotion of private sector participation in all facets of the oil value chain;
- Intensification of human capacity building and establishment of R, D &T institutions to progressively improve local content in the sub-sector and eventually domesticate oil technology;

- Promoting the expansion of the processing sub-sector to allow for the export of value-added petroleum; and,
- Periodic review of legal and regulatory frameworks to provide stable and attractive investment environment.

3. Natural Gas

In view of the diversity and immensity of the benefits accruable to the nation from the development of its natural gas resources the NEMP recommends planned exploration for natural gas and a wide range of activities and programmes to encourage the utilization of natural gas in all sectors of the national economy and for export. Based on all the foregoing, the NEMP recommends:

- Periodic review of penalty for gas flaring;
- Ensuring that the provisions for natural gas in the Petroleum Industry Act (PIA) 2021, are pursued and achieved at target time;
- Ensuring accelerated completion of all on-going gas utilization projects and commencement of proposed ones;
- Encouraging R&D on natural gas within the country;
- Reviewing of existing urban and regional planning regulations with a view of incorporating gas transmission, distribution and utilization infrastructure;
- Increasing the level of development of infrastructural facilities such as pipelines and associated transmission facilities.

4. Shale Hydrocarbon

Recognizing the potential of oil shale in meeting the present and future global energy needs, NEMP recommends:

- Incorporating shale hydrocarbon research activities into the activities of universities and petroleum research institutes and centres;
- Carrying out feasibility studies on the potential of shale oil and gas in the country;
- Developing and enacting appropriate frameworks for the exploration of shale oil and gas resources;
- Ensuring continuous Environmental Impact Audit of all shale oil and gas projects.

5. Bitumen and Tar Sands

Bitumen and tar sands can significantly contribute to the energy mix of the nation by producing bitumen emulsion for power generation and coke for use in iron and steel manufacture. Considering the significance of the bitumen and tar sands deposits, the NEMP recommends as follows:

- Completing the current geological data generation programme embarked upon by government;
- Completing the privatisation of the bitumen blocks;
- Ensuring that successful bidders implement their work programme;
- Government should provide infrastructure such as roads, power, pipelines and development of the ports to facilitate private sector investment in the sector;
- Providing a world class training institute with a strong research and development arm for the Bitumen and Tar sands industry;
- Ensuring the establishment of best international practice in exploitation of the resource with high premium given to the environment.

6. Coal

The nation's coal industry faces some daunting challenges, which need to be addressed if the potential for coal utilization is to be optimally exploited. These include uncertainties in the actual reserves of coal on which long-term projects could be based, low productivity of the coal mines, low level of mechanization of production facilities, and absence of cost-effective transportation system such as rail system and port facilities for its export. To overcome the challenges and make coal contribute to energy security in Nigeria as well as earn foreign exchange through its export, the NEMP recommends:

- Completing the privatization of the sub-sector in the short – term;
- Operationalizing the Minerals and Mining Act;
- National stock-taking to ascertain the actual coal reserves in the country;
- Encouraging the establishment of sustainable coal briquetting plants and development of effective marketing strategies;
- Revamping of domestic industries that can utilize Nigeria's coal in a sustainable manner;
- Identifying of export markets for Nigeria's coal;
- Providing strong R & D support for sustainable coal industry;
- Developing of clean coal based power plants;
- Developing infrastructure for coal transportation.

7. Nuclear Energy

NEMP has articulated measures to enhance peaceful applications of nuclear science and technology in the areas of electric power production, agriculture and animal production, water supply, health care delivery, petroleum exploration, solid mineral exploration, and environmental protection. These measures include:

- Reviewing and strengthening institutional framework and infrastructure for the development of nuclear science and technology in the country;

- Developing and implementing structured manpower development programmes in the utilization of nuclear energy for peaceful purposes;
- Developing a critical mass of professionals for successful implementation of the nuclear power programme;
- Fast tracking the on-going process of building nuclear power plants for electricity generation;
- Encouraging the optimal use of all nuclear science and technology facilities in solving problems in industry, agriculture, medicine and water resources management;
- Quantifying and characterizing the nuclear mineral resources in the country;
- Undertaking regular public enlightenment campaigns on applications of nuclear technology, nuclear safety and radiation protection;
- Maintaining good relationship with the IAEA; and
- Adopting a set of incentives to attract and retain nuclear science and technology professionals.

8. New and Renewable Energy

The main constraints on the rapid development and diffusion of technologies for the exploitation and utilization of renewable energy resources in the country are unstimulated demand, lack of appropriate legal, regulatory and institutional framework as well as incentives to attract investors. The comparatively high initial investment cost also constitutes a barrier to the development of the market.

In order to deal with the afore-mentioned constraints the NEMP recommends amongst others:

- Intensifying public awareness through the mass media and community based organizations;
- Significant investment in Research, Development and Demonstration activities;
- Building of indigenous human and manufacturing capacities;
- Intensifying on-going economic reforms;
- Providing enabling environment through financial and fiscal incentives, legal and regulatory framework for attracting FDI and indigenous participation in the establishment and operation of renewable energy plants;
- Establishing strategic factories for local manufacturing of major renewable energy equipment and spare parts;
- Sensitizing the Federal, State and LGs on the potentials of renewable energy as source of heating and electrification;
- Developing codes and standards for renewable energy systems and components;
- Establishing a renewable energy fund;
- Strengthening Energy Commission of Nigeria to serve as national focal point for new and renewable energy.

9. Bio-Energy

Bio-energy is energy from non-fossil type organic matter referred to as biomass and bio-fuels. Bio-fuel is a deliberate attempt to integrate the agricultural sector of the economy with the downstream petroleum sector. Since, over 60% of Nigeria's population still depends on fuel-wood for cooking and other domestic uses; NEMP recommends:

- Developing nurseries and intensifying the cultivation of plantation of fast growing energy trees/plants;
- Building local capacity and training extension workers on the applications, installation, and maintenance of efficient biomass energy technologies;
- Identifying suitable bio-energy based technologies and embarking on intensive R&D activities on same;
- Providing fiscal incentives to encourage local production of biomass energy systems;
- Establishing more shelter belts in the semi-arid frontal states and woodlots in the buffer states;
- Developing indigenous capacity in the design, development, installation and maintenance of Renewable Energy Technologies;
- Building indigenous capacity in the design, development, installation and maintenance of efficient wood stoves and biomass briguetting machines;
- Setting minimum technical know-how for due diligence on potential Biofuel partners;
- Enacting and enforcing Biofuels usage Act Mandate on use of E5, E10, B10 and B20 in Nigeria;
- Formulating and implementing appropriate policy guidelines, regulatory and incentive regimes in the agricultural sector to support the bio-fuels industry.

10. Electricity

The annual consumption of electricity has been increasing very rapidly over the last three decades. It increased from 1,273 GWh in 1970 to 29,573GWh in 2012 and 60,000GWh in 2020. This however represents a suppressed demand caused by inaccessibility to the national grid and inadequacies of the electricity supply. One consequence of this is that various industries and other consumers have installed generators, whose total capacity is estimated to be at least 80% of installed capacity of the national grid.

In recent times, the domestic sector has accounted for over 50% of the grid electricity consumed in the country while the commercial and industrial sectors have accounted for about

25% each. In view of the ever-increasing demands for electricity in the country, NEMP recommends:

- Periodic review of the electricity laws and guidelines;
- Periodic review of the existing Multi-Year Tariff Order (MYTO);
- Total overhauling of power plants for greater efficiency;
- Fast-tracking the completion of all on-going IPP and Government funded generation, transmission and distribution projects;
- Rehabilitating, upgrading and continuous expansion of the national grid for a steady and reliable power supply;
- Establishing Electricity Research and Development Fund;
- Reviewing and enforcing the existing laws on vandalization of public utility infrastructure;
- Designing & implementing a long-term coordinated programme for rural electrification based on decentralized generation;
- Ensuring effective administration of Rural Electrification Fund.

11. Energy Utilization

The energy supply situation is erratic and epileptic, coupled with inadequate coverage in terms of geographical spread.

In a study conducted by the Presidential Advisory Committee on 25-year Power Development Plan, the electricity demand projection for a 10% annual growth of the GDP was given as about 16,000 MW, 30,000MW and 192,000MW for the years 2010, 2015 and 2030 respectively. The achievement of the above projected generation capacity will ensure that per capita electricity consumption would be about 5,026kWh, that is at par with the current consumption level in most industrializing countries. The same study also suggested an electricity generation mix of Nuclear (2%); Hydro (7%); New Renewables (10%); Coal (11%) and Natural Gas (70%) in the long term.

To achieve these goals, the NEMP recommends:

- Rehabilitating existing power plants and strict adherence to both preventive and turn around maintenance schedules;
- Completion of all on-going energy-related projects and fast-tracking the commencement of all proposed electricity projects;
- Designing and implementing a long-term coordinated programme for rural electrification based on decentralized generation;
- Designing a long-term R & D portfolio for the Electricity Supply Industry (ESI);

- Sensitizing the general public on the ills of vandalizing public utility infrastructure and enforcing the existing laws; and
- Improving the distribution network;
- Fast tracking the commencement and completion of legal and administrative work on the setting up of NESTI;
- Providing the legal, fiscal, administrative and regulatory environment for the setting up of small scale foundries and machine shops dedicated to the ESI within NESTI in each geopolitical zone.
- Developing a database on energy supply, demand and consumption for all the sectors of the economy;
- Enacting a law mandating all relevant organizations to supply energy and allied data on their energy supply, demand and consumption annually to the ECN;
- Promoting energy efficiency and conservation measures;
- Encouraging industry, agriculture and transport sectors to switch over to more appropriate and environmentally friendly energy types;
- Promoting human capacity building to meet manpower needs of the sectors;
- Establishing National 90-day Strategic Fuel Depots in each of the six geopolitical zones of the country.

12. Energy Efficiency and Conservation

In Nigeria, energy demand-supply imbalance is high, with low energy access. In order to increase energy access to all, energy efficiency and conservation best practices must be imbibed. There is significant potential for energy savings in the supply and demand sides of the nation's energy sector. Therefore, sector-wide adoption of supply and demand side's energy efficiency and conservation measures in the entire energy production and utilization is imperative.

Unfortunately, energy efficiency is facing a lot of obstacles such as: Low level of awareness; lack of baseline energy consumption data; weak enforcement of laws and regulations leading to proliferation of low quality energy-efficient (EE) products; low local manufacturing capacity of energy-efficient equipment/appliances; High initial capital cost; poor billing systems by utilities (e.g, estimated bills); unreliable power supply and poor instrumentation and lack of energy audit toolkits and expertise. In order to promote energy efficiency and conservation, NEMP recommends:

- Streamlining and harmonizing all policies and plans on energy efficiency and conservation for a unified target setting;
- Passing into law the existing regulatory measures to phase out the importation and sale of inefficient appliances;
- Developing Minimum Energy Performance Standard for end-use appliances;

- Encouraging Federal and State Institutions to mainstream energy efficiency and conservation programmes into their development efforts;
- Introducing energy audits in the commercial, industrial and public sectors of the economy;
- Setting up an energy efficiency fund to accelerate the implementation of energy efficiency policies and plans;
- Intensifying public awareness programmes on the need for energy efficiency and conservation practices;
- Intensifying Demand Side Management programmes in the energy sector;
- Developing an appropriate and acceptable energy label for the Country.

13. Environment and Climate Change

The major environmental problems related to energy production, distribution and consumption in the country are mainly deforestation, pollution (air, water and soil) and global warming. Over the years, oil spillage and gas flaring have had significant negative effects on the nation's environment and economy. As a result of these possible negative impacts, there is a need to incorporate environmental considerations into the nation's energy development and utilization. Hence, NEMP recommends:

- Reviewing, updating and harmonizing the existing energy-related "Guidelines and standards for environmental pollution control in Nigeria";
- Developing and implementing projects on natural gas power plants, Petrochemical plants, LNG plants, and gas re-injection to ensure complete phase out of gas flaring as soon as possible.
- Ensuring 10% reduction in energy-related emissions by 2030.
- Carrying out massive sensitization and awareness campaign on energy related environmental problems, their mitigation and adaptation.
- Monitoring of solid, liquid, gaseous, thermal and radioactive wastes and emissions from energy activities and installations.
- Ensuring strict adherence to the recommendations of EIA on all energy projects.
- Funding R & D on energy-related environmental problems.

14. Other Energy Issues

The other energy issues addressed in this section are: gender, local content, research, development and training as well as bilateral, regional and international cooperation.

Energy is essential to both gender, male and female. Therefore planning for energy production, transmission and utilization should be gender sensitive. Also utilization of local human and material resources is essential for energy security. The promotion of R&D in all its ramifications is necessary in tackling energy related problems. Moreover, effective bilateral, regional and international cooperation will assist in ensuring energy security for Nigeria, the West African sub-region and the African continent.

Based on the foregoing, the NEMP recommends:

- Establishing gender units in all MDAs in the energy sector.
- Reviewing, updating and harmonizing the existing “Guidelines and Standards for Environmental Pollution Control in Nigeria” especially as they relate to energy production, supply and utilization;
- Ensuring gender sensitive capacity building programs in the energy sector;
- Establishing yardstick for measuring local content in the energy sector;
- Increasing patronage of indigenous engineering and applied research groups in the planning and execution of energy projects;
- Encouraging R & D activities in energy through collaborative public – private partnership;
- Incentivizing energy companies to establish R&D outfits in the country;
- Ensuring full representation, participation and payment of dues to sub-regional, regional and international energy bodies;
- Vigorously pursuing the realization of the ongoing sub-regional and regional energy projects;
- Developing common standards for energy related plants, machinery and spares for use in the ECOWAS sub-region.

15. Manpower Development and Training

The National Energy Manpower Development Plan, which is aimed at developing the human capacity needs of the nation’s energy sector puts particular emphasis on the national energy manpower stock and needs; training to meet energy manpower needs; energy curriculum in the nation’s education system; integrating R & D, training and production; as well as the development of energy training institutions and linkages.

In order to address the afore-mentioned issues, the NEMP recommends:

- Conducting periodic national manpower survey to determine the human resource needs and supply in the energy sector;
- Introducing energy studies into the nation’s educational curriculum;
- Developing and incorporating specialized energy curricula into the nation’s higher educational system;

- Establishing technical cooperation with specialized institutions and industries on energy programmes outside the country;
- Reviewing energy-related manpower development programmes of the nation's Tertiary Institutions, research institutes and research centres;
- Evaluating the existing infrastructural facilities in the nation's energy research institutes and centres with a view to providing a conducive atmosphere for R & D activities;
- Organizing regular interactive fora for stakeholders in Research, Development, Production and training;
- Developing institutional framework for effective hands-on training and train-the -trainers programmes in the productive energy sector.

16. Energy Financing

Energy infrastructure projects are capital-intensive. Therefore ensuring easy accessibility to adequate, reliable and affordable energy services, in Nigeria, requires huge investment.

In Nigeria, access to energy finance is affected by inadequate national support system that guarantees the attraction and security of investment, financial capacity for investment, and strategies for attracting offshore financing. Other factors include slow judicial process in settling dispute, inadequate incentives to business to invest in new technologies and presence of political and regulatory risks for investment in new technologies. The following are recommended to mitigate these factors:

- Establishing renewable energy and energy efficiency fund;
- Providing fiscal and financial incentives;
- Sustaining the electricity sector reforms;
- Promoting environmental regulations that encourage investment in environmentally and climate friendly technologies;
- Introducing tariffs that guarantee good rate of return on investment;
- Introducing concessionary feed-in tariff for renewable based energy supply;
- Attracting long-term financing from local and international institutions;
- Providing adequate security facilities; and
- Establishing and implementing favourable monetary policies.

18. Energy Planning, Monitoring and Evaluation

For effective and efficient implementation of the NEMP, monitoring and evaluation mechanisms must be put in place in order to make sure that the implementation of the plan is on course and if necessary to revise it every five years to fulfill its objectives and goals. The National Energy

Masterplan also recommends critical measures to be adopted in monitoring and evaluating its progress of implementation, some of which are:

- Strengthening co-operation among stakeholders in the energy sector;
- Establishing State and Local Government Energy Planning and Implementation Units;
- Carrying out integrated energy planning studies;
- Presenting the results of energy planning studies to stakeholders;
- Strengthening the National Energy Information System;
- Fast-tracking the development of national energy databank; and
- Periodic presentation of report on progress made in the implementation of the NEP and the NEMP.

CHAPTER ONE

GENERAL INTRODUCTION

Energy is central to sustainable development. It affects all aspects of development – social, economic, environmental and even cultural. The energy sector is very strategic to the Nigerian economy. In addition to its macroeconomic importance, it also has major roles to play in reducing poverty, improving productivity and enhancing the general quality of lives of our people. The energy system and the other sectors of the economy are interwoven in some ways. While on the one hand, the energy sector contributes to a stable growth of the economy and the realization of social and political objectives; on the other hand, the modernization and expansion of energy supply system to meet future energy demand require a large amount of human and financial resources.

Against this background, the Energy Commission of Nigeria embarked on the development of a comprehensive National Energy Masterplan to translate the provisions of the National Energy Policy into implementable projects, activities and programmes with timelines in order to achieve the desired objectives. It will also provide ready information for prospective private investors and ensure an integrated development of the energy sector. Without a national energy master plan that gives high premium to major improvement in the quality and quantity of energy services, the realization of the goals and objectives of the National Development Plan (NDP) 2021-2025, UN Sustainable Energy for All (SE4ALL) by 2030, Sustainable Development Goals (SDGs), Nigeria's Agenda 2050 and Africa Agenda 2063, cannot be met. Such a masterplan must of necessity include a 'road map' which gives 'what', 'when', 'where', and 'how', of energy forms and energy infrastructures deployment to meet national energy demands on the short, medium and long term basis. It should also identify who would carry out specific activities among the various stakeholders involved in the effective management of the energy sector.

Nigeria is blessed with a rich variety of depletable and renewable energy resources, the reserves of which are shown in Table 1.1.

Table 1.1: Nigeria's Energy Reserves /Capacity as at December 2019

S/ N	Resource Type		Reserves
1.	Crude Oil		37.2 billion barrels (NUPRC, 2019)
2.	Natural Gas		203.45 trillion SCF (NUPRC, 2019)
3.	Coal and lignite		2.734 billion tonnes
4.	Tar Sands		31 billion barrels of oil equivalent
5.	Large Hydropower		24,000 MW
6.	Small Hydropower (< 30MW)		3,500 MW
7.	Solar Radiation		3.5 - 7.0 kWh/m ² /day
8.	Wind		(2-4) m/s at 10m height
9.	Biomass	Fuelwood	11 million hectares of forest and woodland
		Municipal waste	30 million tonnes/year
		Animal waste	245 million assorted animals in 2001
		Energy Crops and Agric Residue	72 million hectares of Agric Land
10.	Nuclear Element		Not yet quantified

Source: i) NNPC (2018): Annual Statistical Bulletin; ii)TCN (2019): Annual Technical Report; iii) ECN (2005): Renewable Energy Masterplan (REMP); iv) NUPRC (2019)

The country possesses the seventh largest reserves of crude oil and the ninth largest natural gas reserve in the world. Associated and non-associated natural gas reserves are in the ratio 53.5 : 46.5. The Federal Government has intensified efforts to harness the tar sands and coal deposits by providing enabling environment to encourage the private sector to drive the development of the sub-sectors. The fundamental principle of the National Energy Policy is the optimal utilization of the nation's viable energy resources for sustainable development. The National Energy Masterplan articulates the sets of activities through which this can be achieved.

Apart from this introductory chapter, the National Energy Masterplan consists of thirteen other chapters, namely; Chapter 2 –Energy Demand and Supply Projections/Targets for Nigeria; Chapter 3 – Petroleum Resources (Crude Oil, Natural Gas and Shale Hydrocarbon); Chapter 4 - Tar Sands/Bitumen and Coal; Chapter 5 – Nuclear Energy; Chapter 6 - Renewable Energy Resources; Chapter 7 –Bio-Energy; Chapter 8 – Electricity; Chapter 9 - Energy Utilization; Chapter 10 – Energy Efficiency and Conservation; Chapter 11 – Environment and Climate Change; Chapter 12 –Other Energy Issues; Chapter 13 -Energy Financing, and Chapter 14– Planning and Policy Implementation. Each chapter presents the national policies and the

objectives of each energy sub-sector and issues that need to be addressed for the balanced development of the overall energy sector. The set of activities required for accomplishing the objectives and each strategy, including the implementing and funding agencies as well as the timelines for each sub-sector are tabulated in every chapter.

In order to meet the requirement of the National Energy Masterplan, the short, medium and long term energy demand and supply studies is imperative. To this effect, Model for Analysis of Energy Demand (MAED) and Model for Energy Supply Strategy Alternatives and their General Environmental impacts (MESSAGE) were employed to conduct the studies for Nigeria.

Chapter 2 presents the results of the energy demand projection study carried out by the Energy Commission of Nigeria (ECN) based on government's vision for industrializing Nigeria by 2030 using the Model for Analysis of Energy Demand (MAED) developed by the International Atomic Energy Agency (IAEA). Three scenarios were considered in the study (with year 2000 as the base year), namely: Reference Scenario, wherein the real GDP grows over the period by a mean of 7 per cent per annum which is an assumption consistent with the MDG objective to reduce poverty by half by 2015; the High Growth Scenario, in which the real GDP grows over the period by a mean of 10 per cent per annum in line with government objective of growing the economy to accelerate Nigeria's economic development; and the Optimistic Scenario within which the real GDP grows over the period by a mean of 11.5 per cent. This is a very optimistic scenario, which is intended to further accelerate the pace of economic development.

In the base year, some 12.71Mtoe of non-commercial energy was used, mainly in households and the services sectors. The use of non-commercial energy has been projected to decline in the three scenarios due to improved electrification and income levels of households and the drive to eradicate poverty. The study also projected that the total final commercial energy requirements under the three economic growth scenarios will rise by 7.52%, 9.18% and 10.25% for the Reference, High and Optimistic Growth Scenarios respectively from 17.63Mtoe in the base year. The per capita commercial energy consumption of 149.06 kgoe in the base year is projected to increase by 4.62, 7.33 and 9.75 times the base year value in the final year for the Reference, High and Optimistic Growth Scenarios respectively.

Chapter 3 deals with the Crude Oil, Natural Gas and Shale Hydrocarbon. Given the importance of this sub-sector, the masterplan is oriented towards promoting conservation of oil resources,

intensive exploration, wider distribution of oil products to all parts of the country in order to ensure energy security, gradual replacement of oil with gas and gas derivatives as the driver of the economy. The plan has also articulated measures to eliminate gas flaring in the short term and promote its utilization for power generation and in other sectors of the economy. The large reserves of tar sands/bitumen have been identified to be a possible major petrochemical feedstock.

Chapter 4 deals with the Tar Sands/Bitumen and Coal. The abundant reserves of coal are envisaged to contribute to power generation using clean technologies and industrial and domestic applications. Measures are articulated for creating and finding markets for coal, increasing the productivity of the coal mines, reducing cost of production through mechanization and establishing a cost-effective transportation system through an expansion of the rail system and port facilities for the export of coal.

The plan in Chapter 5 articulates measures to ensure peaceful applications of nuclear science and technologies in the area of electric power production, agriculture and animal production, water supply, health care delivery, petroleum exploration, solid mineral exploration, and environmental protection among others. Other issues recognized that there exist certain levels of expertise in the country. It has therefore articulated measures to achieve the required critical mass of professionals for the successful implementation of the nuclear power generation programme as well as incentives to retain and attract nuclear professionals.

The Masterplan identifies with the global environmental concerns on the imminent dangers of the fossil economy, in which oil is the main driver of industrialization, the expediency of adopting environmentally sound development path and the need for a diversified and sustainable energy supply mix. It has therefore put in place carefully selected measures, as presented in Chapter 6 and 7, to ensure the removal of existing barriers to increased utilization of renewable energy.

Chapter 6 acknowledges that the current state of exploitation and utilization of the renewable energy resources in the country is very low: limited largely to pilot and demonstration projects developed by the research centres and other tertiary institutions.

In view of the potential of RE, if properly harnessed in the drive to achieve the Developmental Agenda and Sustainable Energy for ALL targets, the masterplan has put in place incentives to promote investment in critical areas of R&D, building of indigenous human and manufacturing

capacities and the creation of level playground for the RE to compete with the conventional sources.

It is envisaged that renewable energy (RE), will contribute between 17% to 20%, in meeting the national electricity demand in the short to long term horizon.

In Chapter 8, electricity industry programmes and activities for increased electricity access are highlighted. For decades, electricity generation has been generally public sector monopoly that led to inadequate supply and inefficient consumption pattern. During that time, prices were heavily subsidized. However, a number of reforms have been instituted by government towards redressing the above inadequacies ranging from deregulation, privatization of public sector monopolies, upgrading and expansion of power sector infrastructures. For instance, the expected spin-offs in the electricity sub-sector are availability of adequate spinning reserve, enhanced national grid and improvement in system security.

Chapter 9 is focused on the energy utilization plan, which stresses the conservation and rational use of energy in all the sub-sectors which envisages a gradual removal of subsidies and vigorous drive towards richer energy mix with increasing role for renewable energy. Mass transit system (electric trains, large buses) is expected to take over from the more energy intensive small and medium buses. Furthermore, the plan envisages a tariff order that will allow private investment in the electricity industry. The plan also provides opportunities for introducing more energy efficient end-use technologies and technological developments relating to renewable energy. The goal is to ensure sustainable development through decentralized energy demand and supply technologies that will contribute significantly to improving the living conditions of the rural populace in the near future.

Chapter 10 focused on energy efficiency and conservation issues in all sectors of the economy, namely: residential, commercial, industrial, transport, building designs and agriculture. Energy efficiency measures like energy auditing, awareness creation, minimum energy performance standards, energy labels, etc...

Chapter 11 addresses a number of environmental issues related to exploration and exploitation of fossil fuels (air and water pollution), land degradation, deforestation as well as ways and means of mitigating them.

Chapter 12 that deals with other energy issues addresses methods of enhancing indigenous capacity as well as issues relating to gender, local content, research, development and training in energy, as well as Bilateral, Regional and International Cooperation for ensuring energy security and economic development in Nigeria, the West African sub-region and indeed Africa. In addition, the National Energy Manpower Development Plan which is aimed at meeting the manpower needs of the nation's energy sector with particular emphasis on the national energy manpower stock and needs; training to meet energy manpower needs; energy curriculum in the nation's education system; integrating R & D, training and production and energy training institutions and linkages.

Energy Financing is dealt with in Chapter 13. Here, constraints on energy financing were identified and various financing options prescribed. The plan recommends energy financing measures, including fiscal incentives that would promote increased investments in the energy sector. It also emphasizes the need for private sector investments.

In Chapter 14, issues relating to energy planning, implementation, monitoring and evaluation are addressed. Energy planning and policy implementation in the country take place at four different levels. At the *National Level*, they involve macro-planning and policy implementation as part of the multi-sectoral national development policies and plans, which are the responsibilities of the National Planning Commission. At the *Sectoral Level*, they involve overall sectoral planning, monitoring and co-ordination of policy implementation for the energy sector, in all its ramifications. The function ensures consistency of sub-sectoral energy policies and plans with the overall national energy policies and plans and that the implementation of the latter is in accordance with provisions. At the *Sub-sectoral Level*, more specific sub-sectoral planning and policy implementation for the development, exploitation and utilization of particular energy resources, are carried out in the various energy sub-sectors, namely oil and gas, electricity, solid minerals, etc. These involve the Ministries of Petroleum Resources, Power, Mines and Steel Development and others respectively. Other energy utilization sub-sectors such as transport, industry, agriculture, as well as research and development, are also relevant. Finally, at the *Operational Level*, activities involve the execution of the policies and plans developed at the sub-sectoral level by operational establishments such as oil exploration, production and marketing companies, power generating, transmission and distribution companies.

In addition, for effective and efficient implementation of the master plan, monitoring and evaluation mechanisms must be put in place in order to make sure that the implementation of the

plan is on course and if necessary to revise it to fulfill its objectives and goals. In order to adequately monitor and evaluate the achievement of targets set in the master plan, a number of performance variables or parameters would have to be defined for each activity to be monitored and evaluated.

From the foregoing, it can be concluded that the National Energy Master Plan (NEMP) seeks to achieve the goals of the National Energy Policy (NEP) by converting its strategies to actionable programmes, activities and projects in the short, medium and long terms. Moreover, NEMP establishes the framework that allows all stakeholders to jointly understand their roles and participate in the national efforts towards achieving the nation's energy goals for stable, reliable and diverse sources of domestic energy as specified in the National Energy Policy.

CHAPTER TWO

ENERGY DEMAND AND SUPPLY PROJECTIONS/ TARGETS FOR NIGERIA

2.0 Introduction

A full energy demand projection study was carried out recently by the Energy Commission of Nigeria (ECN) based on government's vision for industrializing Nigeria by 2030. The study estimates the levels of energy requirements necessary for the transformation of Nigeria into an industrializing nation by 2030 using the Model for Analysis of Energy Demand (MAED), which was developed by the International Atomic Energy Agency (IAEA). The economic and demographic characteristics (major drivers of energy demand) of industrializing nations, mainly middle income countries, were identified and applied in the implementation of the model. The electricity demand projections by the Presidential Advisory Committee were adopted in the study.

Nigeria had envisioned growing its economy at a rate of 11% - 13% so that it can be reckoned within the 20 largest economies in the world by 2020. Energy demand and supply studies conducted by the Energy Commission of Nigeria under various growth scenarios and taking into consideration the economic vision, demography, available energy resources and modern developmental path, using MAED and MESSAGE energy planning models of IAEA, has indicated that huge amount of energy in the form of electricity, fuel and heat would be required to meet this vision.

Three scenarios were considered in the study (with year 2009 as the base year), namely: Reference Scenario, wherein the real GDP grows over the period by a mean of 7 per cent per annum which is an assumption consistent with the Transformation Agenda to industrialize Nigeria by 2020; the High Growth Scenario, in which the real GDP grows over the period by a mean of 10 per cent per annum in line with government objective of growing the economy to accelerate Nigeria's economic development; and the Optimistic Scenario within which the real GDP grows over the period by a mean of 11.5 per cent. This is a very optimistic scenario, which is intended to further accelerate the pace of economic development.

The following growth scenarios were considered:

- **Reference Growth Scenario:**
 - GDP grows by an average of 7% per annum
 - The main driver of growth is the manufacturing sector

- Manufacturing accounts for 15% of GDP by 2020 from 4% in 2011
- Consistent with the MDG objective of reducing poverty by half by 2015
- **High Growth Scenario:**
 - GDP grows by an average of 10% per annum
 - Manufacturing contributes 22% to GDP by 2030 from 4% in 2011
 - Nigeria is transiting from an agrarian economy to an industrializing nation
- **Optimistic Growth Scenario:**
 - GDP grows by an average of 13% per annum
 - Manufacturing contributes 22% to GDP by 2030 from 4% in 2011
 - Nigeria is transiting from an agrarian economy to an industrializing nation

Table 2.1 shows the amounts and shares of total final energy demand by the various sectors. For the Reference Scenario, the demands will vary over the plan period from 1.15Mtoe to 105.52Mtoe, for industry, 7.65Mtoe to 28.51Mtoe, for transport, 24.09Mtoe to 46.29 Mtoe for households and 3.13Mtoe to 10.67Mtoe for services. The final energy demand for other scenarios is as shown in the same Table 2.1. All sectors indicate positive growths, except household, which indicated a negative growth rate for the Optimistic Scenario. The fastest growing sector is industry (agriculture, construction, mining and manufacturing) with overall annual growth rates of 24.01%, 28.78% and 32.45% for the Reference, High and Optimistic Growth Scenarios respectively. These growths will have been dominated by energy demand in the manufacturing sector, whose energy use far outweighs those of agriculture, construction and mining.

Similarly, the services sector will experience growth rates of 6.01%, 7.3% and 9.25% p.a. for the respective scenarios; and transport with 6.46%, 7.49% and 7.88%; while, households will be having growth rates of 3.16%, 4.85% and 4.68% for the Reference, High and Optimistic growth scenarios, respectively. In the base year, households had the highest share of energy demand at 66.9% of the total, followed by transport, services and industry sectors with shares of 21.2%, 8.7% and 3.2%, respectively. However, the structure is projected to change markedly over the plan period. By 2030 and for the Reference Scenario, the dominant sector will be industry, with a share of 55.3%. The households sector will come next with 24.2%, followed by transport with 14.9%. The services sector will have the lowest share of 5.6%. For the High Growth Scenario, the industry sector will have the largest share of 67.2%, followed by households, transport and services with shares of 18.8%, 10.1% and 4.0% respectively. Industry will still have the highest

share, with 77.7% for the Optimistic Scenario, followed by households, transport and services with 11.6%, 7.0% and 3.7% respectively.

Table 2.1: Total Energy Demand Projection by Sector

Scenario/Sector	Demand, Mtoe						Growth rate, %	Share, %					
	2009	2010	2015	2020	2025	2030		2009-2030	2009	2010	2015	2020	2025
Reference Growth Scenario (7%)	36.02	37.12	61.43	94.29	138.84	190.99	8.27	100	100	100	100	100	100
Industry	1.15	0.47	23.34	46.72	73.80	105.52	24.01	3.2	1.3	38.0	49.6	53.2	55.3
Transport	7.65	9.26	11.63	15.53	21.12	28.51	6.46	21.2	24.9	18.9	16.5	15.2	14.9
Household	24.09	24.68	23.40	27.28	36.46	46.29	3.16	66.9	66.5	38.1	28.9	26.3	24.2
Services	3.13	2.71	3.055	4.76	7.46	10.67	6.01	8.7	7.3	5.0	5.0	5.3	5.6
High Growth Scenario (10%)	36.02	37.56	75.25	124.16	200.97	346.9	11.39	100	100	100	100	100	100
Industry	1.15	1.73	30.46	62.21	115.30	233.12	28.78	3.2	4.6	40.5	50.1	57.4	67.2
Transport	7.65	7.36	11.04	16.49	24.02	34.88	7.49	21.2	19.6	14.7	13.3	11.9	10.0
Household	24.09	27.32	30.44	39.53	52.16	65.15	4.85	66.9	72.7	40.4	31.8	26.0	18.8
Services	3.13	1.15	3.305	5.93	9.49	13.75	7.30	8.7	3.1	4.4	4.8	4.7	4.0

CHAPTER THREE

PETROLEUM RESOURCES

3.0 Introduction

Crude Oil

Oil exploration in Nigeria witnessed steady growth over the past few years. The country had an estimated proven reserve of 25 billion barrels of predominantly low sulphur light crude in 1999 which substantially increased to 34 billion barrels in 2004, and in 2019 about 37.0 billion barrels. The growth in reserves is attributable to improved funding of Joint Venture operations, timely payment of cash call arrears, introduction of alternative funding scheme, the emergence of new production sharing arrangements and the opening up of new frontier and deepwater/offshore blocks. Based on various oil prospects already identified especially in the deepwater terrain and the recent development efforts, it was projected that proven reserves will reach about 40 billion barrels by year 2025 and potentially 68 billion barrels by year 2030. Oil production in the country also increased steadily over the years, however, the rate of increase is dependent on the economy, technology and geopolitics of both producing and consuming countries. Nigeria's OPEC quota in 2022 is about 1.8 million barrels per day even though actual production is averaging around 1.2 million barrels per day partly due to the problems in the Niger Delta. Average daily production was projected to increase to 4.0 million barrels per day by 2025 and potentially to over 5.0 million per day in year 2030. However, these high potentials will be realized only with the adoption of high exploration strategic development policies and programmes covering the onshore basins of Niger Delta, Anambra, Benin (Dahomey), Benue, Bida, Chad and Sokoto Basins, as well as the offshore continental shelves and deepwater terrains.

In the downstream oil sub-sector, Nigeria has four refineries with a total installed capacity of 445,000 barrels per day and 5001km network of pipeline from the refineries to 22 oil depots. The Federal Government also established petrochemical and fertilizer plants. The capacity utilization of these plants and facilities has been considerably low, due to high level of decay arising from poor maintenance and operating conditions, under-funding, criminal vandalization especially on the pipelines, and the companies' lack of management autonomy for efficient operation. Consequently, annual domestic demand for petroleum products is not fully met by internal production and has to be supplemented by imports. However, the downstream sub-sector reforms which encompass deregulation and participation of the private sector in crude oil refining will ameliorate the current supply – demand imbalance.

Oil will continue to play a major role in the nation's economy, hence the need to expand the reserve base through continuous exploration activities. This of course will require huge amount of investments in exploration and development activities. There is also the need to promote the expansion of downstream processes and businesses for value-added benefits to the economy and the production of export based products. This notwithstanding, it is necessary to diversify the domestic energy mix away from the ever – increasing consumption of petroleum products in order to avert any possible conflict between domestic and export requirements.

Natural Gas

Nigeria's proven natural gas reserves, estimated at about 203 trillion standard cubic feet as at 2020, are known to be substantially larger than its oil resources in energy terms. Gas discoveries in Nigeria are incidental to oil exploration and production activities. Consequently as high as 75% of the gas produced was being flared in the past. However, gas flaring was reduced to about 11% as at 2018 as a result of stringent efforts by Government to monetize natural gas.

Domestic utilization of Natural gas is mainly for power generation which accounts for over 80%. Large portion of the remaining is utilized in the industrial sector and very negligible portion is used in the household sector. In order to encourage domestic utilization of natural gas and its derivatives, government has embarked on massive investment in gas gathering, processing and distribution infrastructures such as the Escravos-Lagos and Escravos-Ajaokuta gas pipelines with plans for future expansion to major consuming centres in the country. Government and the Independent Power Producers have also embarked on the establishment of gas-based power projects. Government is also poised to ensure that the LPG distribution depots built within the country through the butanisation programme is adequately utilized.

In view of the increasing domestic oil consumption, an economically optimal strategy to replace oil with gas and gas derivatives will enhance the availability of more oil for export. This will also promote the conservation of the oil reserves. Apart from the economic advantage, fuel substitution from oil to gas is desirable as a result of environmental considerations.

Given the current reserves and rate of exploitation, the expected life-span of Nigerian natural gas is about 68 years. It is therefore, strategically important to undertake major investments in the gas sector in order to prepare adequately for gas as a substitute for oil both for domestic needs and foreign exchange earnings.

The continued flaring of natural gas has resulted in a substantial waste of energy resources, in addition to contributing to atmospheric pollution. It is therefore imperative to take effective measures to curtail gas flaring, so that the ending of gas flaring does not exceed the deadline as maybe prescribed by government. The Associated Gas Re-injection Decree of 1979 and subsequent amendments, the Associated Gas Framework Agreement (AGFA) and the Associated Gas Utilization Framework Incentives (AGUFI) have given deadlines for the end of natural gas flaring. These have encouraged the establishment of various LNG projects, which are at various stages of completion. The West African Gas Pipeline project, the proposed Trans Sahara Gas Pipeline project, Nigeria-Morocco gas pipeline project, and the Trans Nigeria Gas Pipeline project, are steps towards achieving the stoppage of gas flaring, as soon as possible. Also, the government has put in place some key programmes designed to promote domestic gas utilization and gas flare reduction namely: Natural Gas Expansion Programme (NGEP); Natural Gas Flare Commercialization Programme (NGFCP) and Gas Sector-wide Pricing Framework.

The Kyoto Protocol which Nigeria is a signatory to and the COP26 NDCs, will also reduce gas flaring as companies invest on such project that can earn them carbon credit.

Shale Hydrocarbon

Nigeria is endowed greatly in conventional petroleum, nonetheless, fossil fuel is a wasting asset, and hence any future discoveries of shale oil/gas should be welcome for reserves addition apart from expanding the national energy mix. Besides, since conventional petroleum is not presently found in most inland basins, any discovery of commercial quantities of the shale hydrocarbon resources in these basins will no doubt boost their economy of the associated states and have overall salutary effect on the country, as a whole.

Oil shale is an organic-rich and fine-grained sedimentary rock from which both liquid and gaseous hydrocarbons called shale oil and shale gas, respectively, can be produced. Shale oil and shale gas are unconventional petroleum and are substitutes for conventional crude oil and natural gas, respectively. However, extracting shale oil/gas from oil shale is more costly than the production of their conventional counterparts, both financially and in terms of its environmental impact. Deposits of oil shale sedimentary rocks occur all around the world Nigeria inclusive. Estimates of global deposits shale oil range from 2.8 to 3.3 trillion barrels.

3.1 CRUDE OIL

3.1.1 Policies

- i. The nation shall engage extensively in the exploration and production of crude oil and associated liquid petroleum.
- ii. The nation shall place emphasis on internal self-sufficiency in the processing and export of petroleum products.
- iii. The nation shall encourage the participation of indigenous and foreign companies in both upstream and downstream activities of the oil industry.
- iv. The nation shall encourage the adoption of environmentally friendly oil exploration, exploitation, handling and storage methods.
- v. The nation shall complete deregulation and privatization of the oil industry.
- vi. The nation shall aggressively pursue research and development and human capacity development to derive maximum economic benefit from its oil resources.

3.1.2 Objectives

- i. To increase the reserves and the production capacity.
- ii. To derive maximum economic benefits from the nation's liquid petroleum resources.
- iii. To ensure that refining to consumption ratio is greater than one (1), so as to ensure domestic self-reliance in the production of petroleum products for domestic consumption.
- iv. To ensure adequate and reliable supply and distribution of petroleum products to meet the demand of the domestic market.
- v. To accelerate the process of technology acquisition and diffusion in the oil industry.
- vi. To enhance indigenous capability in the industry in the interest of national security.
- vii. To promote the efficient management and environmentally-friendly operation in line with global best practices.
- viii. To attract increased private sector capital inflow to the oil industry.
- ix. To mainstream and/or integrate climate change considerations in both upstream and downstream activities of the oil industry.
- x. To foster the use of best available practices/technology to minimize impacts of oil activity on the project communities/location most vulnerable to environmental/climate change threat.
- xi. To minimize adverse environmental impacts of oil activities on the project communities and locations.
- xii. To encourage the full participation of indigenous and foreign companies in both upstream and downstream activities of the oil industry.

3.1.3 Action Plan

Table 3 .1: Crude Oil Development Action Plan

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(i) Investing in and intensifying crude oil exploration and production in all Nigerian sedimentary basins and ensuring that acreages put up for bidding rounds are properly pre-estimated with minimal speculations.</i>	(a) Empowering the NUPRC to provide comprehensive database on upstream oil and gas.	NUPRC	MPR, NASS, FMJ, NNPC	FGN (MPR, NUPRC)	*	*	*
	(b) Establishing and maintaining a comprehensive geological and seismic survey program with digitalized maps in order to promote and accelerate the exploration program that will uncover the oil and gas potentials in the entire hydrocarbon bearing zones in various parts of the country and territorial waters.	NUPRC	MPR, NNPC, NUPRC, NBS	FGN (MPR, NGSA)	*	*	*
	(c) Establishing a clearly defined National Reserves Depletion Target based on technical, as well as social, and political optimization taking cognizance that uncontrolled and rapid growth can be damaging to the general economy in the long term.	NUPRC	MPR, NNPC	FGN (MPR, NUPRC)	*	*	*
	(d) Establishing a special fund for indigenous upstream operators.	NUPRC, NCDMB	MPR, FMFBNP, CBN, FMJ, NASS, OPS, NNPC	FGN (MPR, NUPRC)	*	*	*
	(e) Enforcing the Marginal Fields Law.	NUPRC	FMJ, MPR	FGN (MPR, NUPRC)	*	*	*
	(f) Introducing venture capital to finance emerging opportunities in the oil and gas sector.	NNPC	OPS, SEC, FMFBNP, IOCs, IOPs	FGN (NNPC)		*	*
	(g) Adhering to the Local Content Principle in the allocation/bidding for oil blocks.	NUPRC	MPR, NNPC, NCDMB	FGN (MPR, NUPRC)	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
	(h) Ensuring achievement of crude oil reserve estimate of 40 billion barrels and production capacity of 4.5 million barrels per day by 2030.	NUPRC	MPR, NNPC, OPS	FGN (MPR, NUPRC)	*	*	*
	(i) Ensuring national self-reliance through indigenous capacity building so as to ensure full benefits to the country from the petroleum resources.	PTDF, NCDMB	MPR, NNPC, OPS, NUPRC	FGN (MPR, PTDF, NCDMB)	*	*	*
	(j) Undertaking periodic evaluation of the producing reservoirs in order to prevent reservoir damage, and prescribe optimal production strategies for the fields.	NUPRC	MPR, NNPC, OPS	FGN (MPR, NUPRC)	*	*	*
	(k) Maintaining a strategic balance between production from traditional oil fields in onshore terrain, inland basins, continental shelves and offshore on one hand, and the new deepwater offshore fields governed by Production Sharing Contract arrangements.	NUPRC	NNPC, MPR, OPS	FGN (MPR, NUPRC), OPS	*	*	*
	(l) Ensuring the application of modern technology and up to date reservoir engineering practices in fields and from time to time recover the underdeveloped fields to Nigerian companies under the classification of marginal fields.	NUPRC	NNPC, MPR, OPS	FGN(MPR, NUPRC), OPS	*	*	*
	(m) Ensuring effective petroleum resource management in the oil industry.	NUPRC	MPR, NNPC	FGN (MPR, NUPRC)	*	*	*
	(n) Establishing harmonized commercialization plan for the development of the discovered oil and gas resources in the country.	NUPRC	MPR, NNPC	FGN (MPR, NUPRC)	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
	(o) Promoting the use of stratigraphic and strati-structure traps to enhance 3D seismic coverage.	NUPRC	MPR, NNPC, NGSA	FGN (MPR, NUPRC)	*	*	*
	(p) Developing of cluster of marginal fields in offshore conditions by creating common facilities/utilizing nearby existing infrastructure.	NUPRC	NNPC, MPR, OPS	FGN (MPR, NUPRC), OPS	*	*	
	(q) Pursuing extensive exploration in non-producing and frontier basins.	NUPRC	NNPC, MPR, OPS	FGN (MPR, NUPRC), OPS	*	*	*
<i>(ii) Investing in exploration, production and refining activities in other countries to promote national development and energy security.</i>	(a) Reviewing modalities for participation in the oil exploration, production and refining activities in other countries.	MPR	NUPRC, NNPC, NMDPRA, ECN	FGN (NUPRC, MPR)	*	*	*
	(b) Conducting periodic oil market studies.	ECN	NNPC, NUPRC, NMDPRA, IPMAN, MPR	FGN (ECN)	*	*	*
	(c) Developing micro-economic marketing strategies for the emerging oil markets to take advantage of global demand for oil.	ECN	MPR, NNPC, NMDPRA, NUPRC, FMIT&I, CBN	FGN (ECN)	*	*	
	(d) Reviewing modalities of state of the art technology for widening the exploration base in geological areas.	NUPRC	MPR, NNPC, ECN, NGSA, PTDF	FGN (MPR, NUPRC)	*	*	*
	(e) Reviewing modalities for equipping domestic refining industry to meet the challenge of producing fuels in an environmentally friendly manner.	NNPC	MPR, NUPRC, NMDPRA, ECN, FMEnv	FGN (MPR, NNPC)	*	*	*
<i>(iii) Maximizing and expanding the refining capacity in the country to cater fully for local consumption and export of products.</i>	(a) Reviewing existing modalities to encourage private sector participation in the refining sector.	MPR	NNPC, NUPRC, OPS NMDPRA	FGN (MPR)	*	*	*
	(b) Ensuring refinement of at least 50% of Nigeria's crude oil production by 2030 and 75% by 2035.	NNPC, OPS	MPR, NUPRC, OPS, FMIT&I, NMDPRA	FGN (NNPC)	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
	(c) Ensuring optimal recovery from ageing oil and gas fields	NUPRC	MPR, NNPC, ECN	FGN (MPR, NUPRC)	*	*	*
<i>(iv) Expanding and promoting research and development activities in the country, including improved access to available data for R & D institutions and universities.</i>	(a) Identifying R & D priorities that will fast-track local content development.	PTDF	RIs, NNPC, NUPRC, MPR, NCDMB, FMSTI, OPS, ECN, TIs,	FGN (MPR, PTDF, NCDMB, NUPRC)	*	*	*
	(b) Implementing identified R&D priorities.	NNPC	PTDF, NCDMB, NOTAP, NUPRC, ECN, OPS, MPR, FMSTI, NNPC, NUC, NBTE, RIs, TIs	FGN (NNPC, PTDF), OPS	*	*	*
	(c) Developing linkages with international institutions for R&D purposes.	ECN	PTDF, NNPC, MPR, MFA, DPs	FGN (ECN, NNPC)	*	*	*
	(d) Encouraging major oil companies operating in the country to establish R&D outfits in Nigeria with robust working affiliations with institutions and universities.	NNPC, PTDF	MPR, NUPRC, RCs, RIs, TIs, FMSTI	FGN (NNPC, PTDF)	*	*	*
	(e) Strengthening R & D outfits in the country to contribute about 45% of the overall studies conducted by oil companies in the short term and 70% in the medium term	NNPC, PTDF	MPR, NUPRC, RCs, RIs, TIs, FMSTI	FGN (NNPC, PTDF)			
	(f) Strengthening the National Petroleum Research Centre as proposed in the report of the Oil and Gas Sector Reforms and Implementation Committee.	MPR, ECN	PTDF, NNPC, NASS, FMSTI	FGN (ECN, MPR)	*	*	*
<i>(v) Taking appropriate measures to ensure that Nigerians are adequately involved in all sections of the oil industry.</i>	(a) Reviewing the existing modalities to ensure increase in the number of Nigerians in the oil industry.	NCDMB	MPR, PTDF, ECN, NNPC	FGN (PTDF, NCDMB)	*	*	*
	(b) Reviewing the existing modalities to empower Nigerians to participate as major operators of joint venture agreement.	NCDMB, NNPC	MPR, PTDF, OPS, NUPRC	FGN (NNPC, NCDMB, PTDF)	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
	(d) Building human capacity needed to attract investment in the frontier basins.	NCDMB , PTDF	MPR, NNPC, FMJ, PTI, OPS	FGN (NCDMB, PTDF)	*	*	*
<i>(vi) Providing appropriate incentives to attract investments and ensure reasonable returns.</i>	(a) Reviewing the existing framework of fiscal incentives that will attract investment to accelerate development of deep-water acreages and guarantee equitable benefits to the Nigerian government and the oil companies.	NIPC	MPR, NNPC, OPS FMIT&I, FMFBNP	FGN (MPR, NIPC)	*	*	*
	(b) Ensuring Nigeria maintains a minimum of 51% in JV companies.	NNPC	MPR, NUPRC, NIPC, OPS	FGN (NNPC), OPS	*	*	*
	(c) Ensuring periodic review of the policy and principles of licensing new exploration acreage such as Production Sharing Contract or Service Contract in line with prevailing international practices and national economic interest.	NUPRC, MPR	IOPs, IOCs, NNPC, OPS	FGN (NUPRC, MPR)	*	*	*
	(d) Ensuring periodic review and evaluation of the Production Sharing Contract agreement in line with changing technologies to enhance oil recovery and to protect national economic interest.	MPR, NUPRC	NNPC, OPS	FGN (MPR, NUPRC)	*	*	*
	(e) Reviewing unfavorable fiscal regime, and uncompetitive legal and regulatory framework that may tend to discourage investment in the industry.	MPR	NUPRC, NNPC, OPS	FGN (MPR)	*	*	*
<i>(vii) Encouraging local engineering design and fabrication of equipment and spare parts in Nigeria.</i>	(a) Implementation of PIA	MPR, NNPC, NUPRC, NMDPRA	FMJ, OPS, NCDMB	FGN (MPR)	*	*	*
	(b) Enforcing of the Nigerian Local Content Law.	NCDMB	FMJ, NNPC, NUPRC, MPR, OPS	FGN (NCDMB)	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(viii) Ensuring the use of locally available materials for oil exploration, production and processing including refining.</i>	(a) Identifying, quantifying, and qualifying oil exploration and production materials deposits in Nigeria.	NGSA, RMRDC	MPR, FMJ, NNPC, NUPRC, PTDF, NNRA, OPS, MMSD	FGN(MMSD, NGSA, RMRDC)	*	*	*
	(b) Conducting studies on national demand and export possibilities for locally produced drilling fluid muds.	NUPRC, NGSA, NEPC	FMSTI, NNPC, MPR, NEPC, PTI, FMIT&I, MMSD	FGN (NEPC, NUPRC)	*	*	*
	(c) Establishing oil exploration, production and refining materials processing plants in Nigeria.	MPR, NNPC	FMIT&I, NUPRC, BPE	FGN (NNPC,MPR)	*	*	*
	(d) Ensuring 100% local sourcing of materials used for oil exploration, production and refining in Nigeria.	NCDMB, NUPRC	RMRDC, MMSD, NNPC, OPS, MPR	FGN (NCDMB, NUPRC)	*	*	*
<i>(ix) Improving the living standards of people in oil producing communities through the provision of socio –economic infrastructure.</i>	(a) Ensuring continuous Environmental Impact Audit of all oil projects.	NESREA, NOSDRA	FME _{env.} , NNPC, MPR, OPS, NDDC	FGN (NESREA, NOSDRA)	*	*	*
	(b) Providing adequate socio-economic infrastructure (e.g. schools, motorable roads, health facilities, energy and water services, etc.) in the oil producing communities.	NDDC	NNPC, OPS, IOCs, FMH, FMed., FMWH, FMWR, DPs, NGOs	FGN (NDDC)	*	*	*
	(c) Providing scholarships for the Niger Delta people by the establishment of a special trust fund.	MPR	PTDF, NCDMB	FGN (MPR)	*	*	*
<i>(x) Ensuring adequate geographical coverage of oil refining and petroleum products distribution network.</i>	(a) Developing package of incentives to encourage the establishment of private refineries in all parts of the country.	MPR, NUPRC, NMDPRA	NNPC, NMDPRA, OPS	FGN (MPR, NUPRC)	*	*	*
	(b) Rehabilitating and expanding existing rail infrastructure for the movement of petroleum products nationwide.	NMDPRA, FMT	MPR, NNPC, NRC, OPS	FGN (FMT, NMDPRA)	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
	(c) Sustaining the Petroleum Equalization Fund until nationwide supply and distribution network is achieved.	MPR, NMDPRA	NMDPRA, NNPC, IPMAN, NUPRC	FGN (NMDPRA)	*	*	*
	(d) Fast-tracking the establishment of mini-refineries by NNPC and JV partners.	NNPC, OPS	NUPRC, MPR, IOCs	FGN (NNPC), OPS	*	*	*
<i>(xi) Ensuring the availability of adequate strategic reserves of storage capacity for refined products for at least 90 days of forward consumption.</i>	(a) Establishing purpose-built 90-day strategic storage facilities across the six geopolitical zones of the country.	NNPC, MPR, NUPRC, NMDPRA	NNPC, OPS	FGN (MPR), OPS	*	*	*
	(b) Ensuring that the strategic reserve storage facility is operational at all times.	NNPC, MPR, NUPRC, NMDPRA	NNPC, OPS	FGN (MPR)	*	*	*
	(c) Approving and implementing the biofuel policy and incentive blueprint.	MPR	PTDF, FMA&RD, FMSTI, MPR, ECN, NUPRC, NARICT, NNPC, NMDPRA	FGN (NNPC, PTDF), OPS	*	*	*
	(d) Continuing the establishment of the mega stations across the country.	NNPC, OPS	MPR, NUPRC, NMDPRA	FGN (NNPC)	*	*	*
	(e) Establishing medium-sized petrol stations in all Local Government Headquarters.	NNPC, OPS	NUPRC, MPR, NMDPRA	FGN (NNPC)	*	*	*
	(f) Encouraging increased private sector participation in the establishment of new refined products depots and ensuring that the existing ones are operated on an open access basis to all operators in the downstream sub-sector.	NNPC, OPS	MPR, OPS, NUPRC, NMDPRA	FGN (NNPC), OPS	*	*	*
<i>(xii) Updating laws and regulations constantly to create the enabling environment for increased private sector participation in the oil industry, especially in the downstream sub-sector.</i>	(a) Reviewing existing laws to further encourage private sector participation in the industry.	MPR	BPE, NNPC, OPS, FMJ, NASS, NUPRC	FGN (MPR)	*	*	*
	(b) Ensuring intensified implementation of the reviewed laws.	NUPRC, NMDPRA	MPR, NNPC, FMJ	FGN (NUPRC, MPR, NMDPRA)	*	*	*

3.2 NATURAL GAS

3.2.1 Policies

- i. The nation's gas resources shall be harnessed and optimally integrated into the national economy, energy mix and industrial processes.
- ii. The nation shall intensify efforts in gas exploration and development.
- iii. The nation shall put in place necessary infrastructure and incentives for indigenous and foreign investors.
- iv. The nation shall put in place necessary infrastructure and incentives for adequate geographical coverage of the gas transmission and distribution network.
- v. The nation shall promote a competitive and efficient domestic market for natural gas and establish indigenous-based natural gas facilities.
- vi. The nation shall aggressively pursue research and development and human capacity development to derive maximum economic benefit from its gas resources.
- vii. The nation shall develop Building Code to include domestic gas piping and installation within residential buildings.
- viii. The nation shall develop corporate social responsibility document for implementation by the Oil Companies (OCs) in order to end conflict and insecurity in the oil producing areas.
- ix. The nation shall develop policy to advocate the incorporation of de-sulphurization unit in the existing refinery and also ensure that any new refinery to be built contains de-sulphurization unit to ensure low level of sulphur to an acceptable level of 50ppm as against the current 150ppm

3.2.2 Objectives

- i. To determine the level of gas reserves available to the nation.
- ii. To eliminate the flaring of associated gas as determined by the government.
- iii. To expand the utilization of natural gas as industrial and domestic fuel, as well as for power generation.
- iv. To increase the use of natural gas as industrial feedstock for petrochemical, pharmaceutical and fertilizer plants, etc.
- v. To diversify the foreign exchange earning base of the nation using gas..
- vi. To accelerate the process of technology acquisition and diffusion in the gas industry.
- vii. To encourage indigenous entrepreneurial capability in the gas industry including the development of end-use devices.
- viii. To ensure reliability of energy supply to all parts of the country.
- ix. To support private sector participation in natural gas infrastructure for rapid development of energy intensive industries.
- x. To promote efficiency and reliable supply of natural gas.

3.2.3 Action Plan

Table 3.2: Natural Gas Development Action Plan

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(i) Embarking on deliberate exploration and development of gas reserves in all parts of the country.</i>	(a) Intensifying exploration activities to increase national gas reserves.	NNPC, OPS	NLNG, OPS, MPR, NUPRC	FGN (NNPC, NLNG), OPS	*	*	*
	(b) Developing infrastructure to deliver gas to all parts of the country and beyond.	NNPC, OPS	NLNG, NMDPRA, OPS, MPR, NUPRC, FMT	FGN (NNPC, NMDPRA), OPS	*	*	*
	(c) Ensuring the Petroleum Industry Act implementation.	MPR	FMJ, NUPRC, NNPC, MPR, NMDPRA, ECN	FGN (MPR, NASS)	*	*	
	(d) Developing a comprehensive set of technical and safety standards.	NUPRC	OPS, MPR, , NNPC	FGN (NNPC), OPS	*	*	*
<i>(ii) Encouraging the oil producing companies to gather and utilize associated gas to eliminate flaring as determined by the government.</i>	(a) Reviewing the existing fiscal regime for the utilization of flared gas.	MPR	NLNG, NNPC, OPS, FMFBNP, NUPRC, IOCs	FGN (MPR)	*	*	*
	(b) Reviewing existing legislation on gas flaring.	NASS, MPR	NLNG, NUPRC, NNPC, FMJ	FGN (MPR)	*	*	*
	(c) Ensuring the completion of all on-going gas utilization projects and commencement of the proposed ones.	NNPC, OPS	MPR, NUPRC, OPS	FGN (NNPC, NLNG), OPS	*	*	*
<i>(iii) Imposing appropriate and effective penalties to discourage gas flaring.</i>	(a) Increasing the penalty for gas flaring as may be stipulated in the PIA.	MPR, NLNG	NNPC, OPS, NUPRC, NMDPRA	FGN (MPR, NNPC), OPS	*	*	
	(b) Strengthening existing legislation to back gas flare penalty.	NASS, MPR	NUPRC, FMJ, NNPC, NLNG	FGN (NASS, MPR), OPS	*	*	
<i>(iv) Encouraging the establishment of the necessary infrastructure for the effective gathering, transmission and distribution of gas nationwide.</i>	(a) Developing a natural gas gathering and transmission infrastructure to deliver gas across the country.	NNPC, OPS	OPS, MPR, NUPRC, NMDPRA	FGN (NLNG, NNPC), OPS	*	*	
	(b) Completing the on-going Trans-National Gas Pipeline (Ajaokuta-Abuja-Kaduna-Kano) project.	NNPC, NLNG	NUPRC, MPR, NMDPRA, OPS	FGN (NNPC, NLNG), OPS	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
	(c) Developing underground storage of natural gas in Nigeria.	NNPC, MPR	NUPRC, NMDPRA, OPS	FGN (NNPC, NLNG), OPS	*	*	
	(d) Developing “virtual” pipeline transport infrastructure for gas across the country	NUPRC, NMDPRA, MPR	NNPC, OPS	FGN (NNPC), OPS	*	*	*
<i>(v) Providing incentives to encourage industrial and domestic consumers to use gas or to convert to gas.</i>	(a) Developing and reviewing price incentives to encourage industrial and domestic consumers to convert to gas usage.	NNPC, MPR, NMDPRA	NUPRC, OPS, FMIT&I, MAN, SON, NMDPRA, NIPC	FGN (NNPC, MPR), OPS	*	*	*
	(b) Providing incentives for the manufacture and distribution of gas-based end-use appliances.	NNPC, MPR, NMDPRA	NUPRC, OPS, NIPC, FMIT&I, MAN, SON	FGN (NNPC, MPR), OPS	*	*	*
	(c) Enforcing regulations on retail outlets and marketing service obligations.	NUPRC, FMIT&I (Weights and Measures)	MPR, OPS, FMIT&I, MAN, SON, NNPC, NMDPRA, NLNG	FGN (NUPRC, FMIT&I), OPS	*	*	*
<i>(vi) Providing incentives to encourage the penetration and use of LPG as alternative cooking fuel nationwide.</i>	(a) Reactivating the existing butanization programme of the NNPC.	NNPC	NUPRC, MPR, OPS, NMDPRA	FGN (NNPC), OPS	*	*	
	(b) Providing incentives for the manufacture and distribution of LPG end-use appliances.	NNPC, MPR, NMDPRA	NUPRC, MPR, OPS, FMT, SON, FMFBNP	FGN (NNPC, MPR), OPS	*	*	*
	(c) Intensify public awareness to encourage consumers’ preference for LPG.	NNPC, , MPR, NUPRC, NMDPRA, OPS	NUPRC, MPR, OPS, FMI FMIT&I, MAN, SON, NOA	FGN (NNPC, MPR), OPS	*	*	*
<i>(vii) Establishing suitable infrastructure for the export of natural gas.</i>	(a) Ensuring speedy completion of the ongoing LNG and West African Gas Pipeline projects.	NNPC, OPS	NUPRC, MPR, OPS, DPs, NLNG	FGN (NNPC), OPS	*	*	
	(b) Establishing other suitable infrastructure for the export of natural gas.	NNPC, OPS	MPR, OPS, NUPRC, DPs, NLNG	FGN (NNPC), OPS	*	*	

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
	(c) Building indigenous capacity to enhance export of Natural Gas.	NNPC, PTDF, NCDMB	MPR, OPS, NUPRC, DPs	FGN (NNPC, PTDF, NCDMB), OPS	*	*	*
<i>(viii) Expanding and promoting gas related R&D outfits in the country.</i>	(a) Instituting more professorial chairs for natural gas R & D in Nigerian universities.	PTDF	OPS, FMed, DPs, TIs	FGN (PTDF), OPS	*	*	*
	(b) Identifying and focusing gas-based R&D priorities.	PTDF, ECN	MPR, NUPRC, NNPC, RIs, ECN	FGN (PTDF)	*	*	*
	(c) Establishing gas research centres in the country.	PTDF, ECN	FMed, ECN, NUPRC, NNPC	FGN (PTDF)	*	*	*
	(d) Undertaking periodic reviews of the manpower requirements in the gas industry.	PTDF, MPR, NMDPRA	NUPRC, NNPC, ECN	FGN (PTDF, MPR)	*	*	*
<i>(ix) Formulating and implementing suitable urban and regional planning regulations needed for the effective distribution of natural gas to, and its utilization by, domestic, commercial and industrial consumers.</i>	(a) Reviewing existing urban and regional planning regulations with a view to incorporating gas utilization infrastructure.	FMWH, FCDA, SGs	COREN, NSE, TOPREC, NITP, NIA, ARCON, NNPC, NUPRC, MPR, NGEP, OPS	FGN (FMWH), SGs	*	*	*
	(b) Developing incentives for estate developers to incorporate gas-utilization facilities into their new estates.	FMWH	SGs, COREN, NSE, TOPREC, NITP, NIA, ARCON, NNPC, NUPRC, MPR, NGEP, OPS	FGN (FMWH), SGs	*	*	*
	(c) Developing and enforcing National Gas Safety Codes and Standards.	SON, NUPRC	FMWH, FMIT&I, MPR	FGN (SON, MPR)	*	*	*
	(d) Sensitizing industrial and domestic end-users on safe utilization of gas.	FMIT&I, NOA	SGs, LGs, NGOs, CBOs, DPs, SON, NUPRC, Community Leaders, NESREA, NMDPRA	FGN (FMIT&I, NOA, MPR)	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
	(e) Monitoring transportation rates charged by natural gas distribution companies to prevent profiteering.	MPR, NUPRC, NMDPRA	SGs, LGs, NGOs, CBOs, DPs, SON, Community Leaders, NNPC	FGN (MPR, NUPRC), OPS	*	*	*
<i>(x) Providing necessary incentives to indigenous and foreign entrepreneurs to facilitate their participation in the gas industry.</i>	(a) Developing appropriate incentives to attract Foreign Direct Investment in the gas industry.	NUPRC, MPR	NNPC, MPR, FMFBNP, OPS, FMIT&I, NUPRCNMDPRA	FGN (MPR, NUPRC)	*	*	*
	(b) Investing in gas delivery infrastructure.	NNPC	NUPRC, MPR, OPS	FGN (NNPC), OPS	*	*	*
	(c) Providing necessary security to natural gas infrastructure.	MPR	NNPC, NUPRC, MPR, OPS, MoD, MOI	FGN (MPR)	*	*	*
<i>(xi) Ensuring that the price of natural gas is cost effective.</i>	(a) Periodic review of Natural Gas price regime.	MPR, NUPRC, NMDPRA	NNPC, MPR, NUPRC, OPS, UCC, NMDPRA	FGN (MPR)	*	*	*
	(b) Maintaining database on the supply and demand of natural gas.	NUPRC, NMDPRA	MPR, NNPC, NMDPRA, ECN	FGN (MPR, NUPRC)	*	*	*
<i>(xii) Developing gas reserves in all parts of the country.</i>	(a) Establishing natural gas storage facilities across the six geopolitical zones of the country.	NNPC, OPS	MPR, NUPRC, NLNG	FGN (NNPC)	*	*	*
	(b) Ensuring that the strategic reserve storage facility is operational at all times.	NNPC, OPS	MPR, NUPRC	FGN (NNPC)	*	*	*
	(c) Fast-tracking the establishment of mini-gas production plants by NNPC and JV partners.	NNPC, OPS	NUPRC, MPR, OPS	FGN (NNPC), OPS	*	*	*
	(d) Encouraging increased private sector participation in the establishment of natural gas depots.	NUPRC	NNPC, MPR, NMDPRA, OPS	FGN (NUPRC), OPS	*	*	*

<i>(xiii) Providing incentives for the use of LPG as automotive fuel.</i>	(a) Creating innovative credit schemes to facilitate the conversion of gasoline-based engines to gas based engines	MPR	NNPC, NUPRC, CBN, FMFBNP	FGN (MPR, NNPC)	*	*	*
	(b) Creating an enabling environment for the emergence of conversion facilities across the country	MPR	NNPC, NUPRC	FGN (MPR, NNPC), OPS	*	*	*
	(c) Granting waivers for imported components of the engine conversion kits	MPR	NNPC, NUPRC, FMFBNP, NCS	FGN (MPR, NNPC)	*	*	*
	(d) Creating market incentives to encourage the installation of auto gas facilities at dispensing stations across the country.	MPR	NNPC, NUPRC, CBN, FMFBNP,	FGN (MPR, NNPC)	*	*	*

3.3 SHALE HYDROCARBON

3.3.1 Policies

- i. The nation shall encourage coordinated baseline studies and research on shale hydrocarbon resources.
- ii. The nation shall put in place the mechanism for development of appropriate legal, fiscal, environmental and other regulations for the guidance and operation of the shale gas/oil industry.
- iii. The nation shall encourage indigenous and foreign companies to participate in exploration and exploitation of shale oil/gas.

3.3.2 Objectives

- i. To encourage geological studies of Nigerian sedimentary basins for shale hydrocarbon resources.
- ii. To increase the national oil and gas reserves base and production capacity.
- iii. To expand the national energy mix.
- iv. To put in place the appropriate regulatory framework for safe and orderly operation of shale gas/oil industry in accordance with global best practices.
- v. To encourage technology acquisition and capacity development for local content value addition.
- vi. To gather relevant information on shale gas/oil prospectivity in all sedimentary basins in the country.

3.2.3 Action Plan

Table 3.3: Shale Hydrocarbon Development Action Plan

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(i) Encouraging and promoting research and development by both public and private institutions for focused studies and geological mapping of shale gas/oil-rich zones in all the sedimentary basins.</i>	(a) Identifying R & D priorities that will fast-track local content development.	NUPRC, RCs, RIs, PTDF	NUC, NNPC, FMSTI, OPS, ECN	FGN (PTDF)	*	*	*
	(b) Developing linkages with international institutions for R&D purposes.	MPR, FMSTI, RCs, RIs, TIs, PTDF	FMed.,ECN, NNPC, MFA, DPs	FGN (PTDF), OPS	*	*	*
	(c) Incorporating shale hydrocarbon research activities into the activities of the existing petroleum research centres.	PTDF	FMed., ECN, NNPC, MFA, DPs, MPR, FMSTI, RCs, RIs, TIs	FGN (PTDF)	*	*	
	(d) Carrying out feasibility studies on the potential of shale oil and gas in the country.	RCs, RIs, MPR	NUC, NNPC, PTDF, FMSTI, OPS, ECN, NUPRC	FGN (MPR, NUPRC)	*	*	*
<i>(ii) Setting in motion appropriate legal and regulatory framework for creating enabling environment for exploration and exploitation of shale hydrocarbons in line with international best practices.</i>	(a) Developing and enacting appropriate law for the exploration of shale oil and gas resources.	NASS, MPR	MPR, ECN, FMJ	FGN (MPR)	*	*	
	(b) Developing comprehensive database on shale oil and gas resources.	NUPRC, PTDF	MPR, ECN, OPS	FGN (MPR, NUPRC, PTDF,)	*	*	
	(c) Undertaking periodic evaluation of the producing reservoirs, and prescribing optimal exploration and production strategies.	NUPRC	MPR, NNPC, OPS	FGN(MPR, NUPRC)	*	*	*
	(d) Establishing and maintaining comprehensive geological and seismic survey programme.	NUPRC, NGSA	MPR, NNPC, NBS, MMSD	FGN (MPR, MMSD, NUPRC, NGSA)	*	*	
	(e) Undertaking periodic reviews of the manpower requirements in the shale oil and gas industry.	PTDF, MPR	FMed., ECN, NNPC, MFA, DPs, NUPRC, FMSTI, RCs, RIs, TIs	FGN (MPR, PTDF)	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(iii) Ensuring land reclamation and zero environmental degradation, including pollution of ground-water resources from chemicals or other materials utilized in shale oil/gas production.</i>	(a) Ensuring continuous Environmental Impact Audit of all shale oil and gas projects.	FMEnv.	OPS, NNPC, OPS, NDDC, NOSDRA, NESREA	FGN (FMEnv.)			
	(b) Ensuring implementation of the reviewed laws.	NUPRC	MPR, NNPC, FMJ	FGN (MPR, NUPRC)	*	*	*
<i>(iv) Delimiting, charting and leasing prospective blocks of sedimentary basins for shale oil and gas exploration and exploitation by indigenous and foreign oil companies.</i>	(a) Encouraging exploration and exploitation of shale oil and gas resource base in the country.	MPR	NUPRC, NNPC	FGN (MPR)	*	*	*
<i>(v) Making adequate provision to improve the living standards of people in shale gas/oil producing areas through provision of appropriate socio-economic infrastructure and other amenities.</i>	(a) Provision of adequate socio-economic infrastructure (e.g. schools, motorable roads, health facilities, energy and water services, etc.) in the producing communities.	MPR, SGs, OPS	NUPRC, LGs, NNPC	FGN (MPR, SGs), OPS	*	*	*
	(b) Sensitizing and creating awareness on the benefits of shale oil and gas.	MPR, PTDF	NNPC, NUPRC, NMDPRA, NOA	FGN (MPR, PTDF)	*	*	*
<i>(vi) Leasing prospective blocks of sedimentary basins for shale gas exploration and exploitation by indigenous and foreign oil companies.</i>	(a) Opening up of blocks for bidding.	MPR	NNPC, OPS, NUPRC	FGN (MPR)	*	*	*
	(b) Adhering to the Local Content Principle in the allocation/bidding for oil blocks.	NUPRC, NCDMB	MPR, NNPC	FGN (MPR, NUPRC, NCDMB)	*	*	*
	(c) Introducing venture capital to finance emerging opportunities in the oil and gas sector.	FMFBNP	OPS, SEC, NNPC, IOCs, IOPs, MPR, NIPC	FGN(FMFBN P), OPS	*	*	*
<i>(vii) Encouraging domestication of the technology for production, processing and utilization of shale hydrocarbon resources.</i>	(a) Encouraging investors to establish heavy oil upgrading facilities within their blocks of interest.	NUPRC	MPR, NNPC	FGN (MPR, NUPRC), OPS	*	*	*

	(b) Ensuring technology acquisition and adoption to fast-track local content development.	NOTAP	NUPRC, PTDF, NCDMB, FMSTI	FGN (NCDMB, PTDF, NOTAP), OPS	*	*	*

CHAPTER FOUR

COAL AND TAR SANDS/BITUMEN

4.0 Introduction

Tar Sands/Bitumen

Nigerian Tar Sands deposits are estimated to contain a total reserve of about 30 billion barrels of oil equivalent. When exploitation commences, the heavy crude oil from the tar sands among others will serve as feedstock for the Lube Plants of the heavy-end refinery, which at present relies on imported heavy oil with similar properties.

Bitumen, which is derived from tar sands, is used in road construction and it is also used in electrical, chemical, petrochemical and other industries. If properly harnessed, the tar sand resources in the country would contribute immensely to the nation's economic resource base. In its drive to open up the tar sands sub-sector, government has set up the Bitumen Implementation Committee to facilitate private sector participation.

Coal

Available data show that coal of sub-bituminous grade occurs in about 22 coal fields spread in over 13 States of the Federation. The proven coal reserves so far in the country are about 639 million tonnes while the inferred reserves are about 2.75 billion tonnes.

Coal mining in Nigeria started in 1906 and recorded an output of 24,500 tons in 1916. Production rose to a peak of 905,000 tonnes in 1958/59 with a contribution of over 70% to commercial energy consumption in the country. Following the discovery of crude oil in commercial quantities in 1958 and the conversion of railway engines from coal to diesel, production of coal fell from the beginning of the sixties to only 52,700 tonnes in 1983. This excludes the civil war years and the period of 1970 and 1971 during the reconstruction years, when there was little or no production. Production rose to about 14,390 tonnes in 2000. In 2001, coal contributed about 0.02% to commercial energy consumption in the country, as compared to 31.9% for oil, 61.9% for natural gas and about 6.2% for hydropower.

Nigeria's coal can be utilized for power generation, steam production, cement production and brick making. It is also applicable as a heat source, reducing agent for steel production, domestic fuel, and as feedstock for the production of chemicals. Other areas of application are as liquid fuels, gaseous fuels, in batteries, carbon electrodes, etc. These potentials of coal need to be effectively

harnessed into the country's energy delivery system and export commodity mix through the development of a vibrant coal industry.

From the onset of coal exploration and exploitation in Nigeria, the Nigerian Coal Corporation was the only institution operating in the coal industry. In 1990, the Federal Government approved the full commercialization of the Corporation, which led to joint venture arrangements with foreign partners for the exploitation of some of the coal deposits. However, with the country's return to democracy in 1999, government has initiated a reform in the mineral sector which has transformed the nature of her participation from Owner-Operator to Administrator-Regulator. However, there is still the need for increased private sector participation in the activities of the coal industry.

The nation's coal industry faces some daunting challenges, which need to be addressed if the potential for coal resource is to be optimally exploited. These include creating and finding markets for the coal, increasing the productivity of the coal mines, reducing cost of production through mechanization and establishing a cost-effective transportation system through an expansion of the rail system and port facilities for the export of coal.

4.1 TAR SANDS/BITUMEN

4.1.1 Policies

- i. The nation shall promote tar sands/bitumen exploration and exploitation.
- ii. The nation shall actively promote private sector as well as local content input through small scale ventures in the exploitation of the tar sands/bitumen resources..
- iii. The nation shall encourage the adoption of environmentally friendly approach for exploration and exploitation of Tar sands.

4.1.2 Objectives

- i. To extract heavy oil from the tar sands/bitumen for refineries.
- ii. To conserve foreign exchange used in importing heavy crude oil and also produce heavy crude oil for export.
- iii. To acquire the technology for developing and harnessing the tar sands/bitumen.
- iv. To ensure adequate financing, efficient operation and management of the tar sands/bitumen.
- v. To encourage local content input in the development of tar sands/bitumen right from its early stages.
- vi. To minimize adverse environmental impacts associated with Tar Sands/Bitumen exploitation.

4.1.3 Action Plan

Table 4.1: Tar Sands/Bitumen Development Plan

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(i) Sustaining the ongoing geological exploration activities for tar</i>	(a) Authenticating existing information on tar sands/bitumen deposits through detailed geological programme.	NGSA	MMSD	FGN (MMSD)	*	*	*
	(b) Evaluating and monitoring of exploration programs as spelt out in investor's work program during bid submission.	MMSD	NGSA, OPS, NASRDA	FGN (MMSD)	*	*	*
	(c) Ensuring adequate compensations are paid to land/farm owners by investors.	FMFBNP, MMSD	FMJ, FMWH, SGs, LGs, CBOs, OPS	FGN (MMSD, OPS)	*	*	*
	(d) Ensuring exploitation method is most environmentally friendly.	FMEEnv.	BPIC, FMA&RD, NASRDA, NESREA.	FGN (BPIC)	*	*	*
	(e) Ensuring that excavated lands are restored.	FMEEnv.	MMSD, BPIC, OPS FMWH, FMA&RD,	FGN (BPIC)	*	*	*
	(f) Ensuring compliance with the Community Affairs Safety, Health, Environment and Security (CASHES) policy.	FMEEnv.	MMSD	FGN(FMEEnv.)	*	*	*
<i>(ii) Providing appropriate incentives to facilitate investment in the exploration and exploitation of tar sands/bitumen resources.</i>	(a) Providing adequate fiscal incentives (such as tax holidays, profit repatriation, deduction before taxes, etc.).	BPIC, MMSD	FMFBNP, NGSA, OPS, NASS, FMJ	FGN (BPIC)	*	*	*
	(b) Establishing Bitumen Project Implementation Committee (BPIC) as a legal entity	BPIC, MMSD	FMFBNP, NGSA, OPS, NASS, FMJ	FGN (BPIC)	*	*	*
	(c) Encouraging transparency in reporting emission data that meet international standards and best practices.	FMEEnv.	MMSD, FMCDE	FGN(FMEEnv.)	*	*	*

<i>(vi) Establishing heavy crude oil upgrading facilities near the tar sands/bitumen deposits.</i>	(a) Encouraging investors to establish heavy crude oil upgrading facilities within their blocks of interest.	BPIC	MMSD, OPS, NGSA	FGN (BPIC), OPS	*	*	*
	(b) Providing enabling environment for laying pipeline network to convey upgraded bitumen to refineries.	BPIC	NUPRC, MMSD, OPS, FMWH, NASRDA, NESREA	FGN (BPIC)	*	*	*
<i>(vii) Intensifying research and development in the production of lubricants and other heavy crude oil products from tar sands/bitumen.</i>	(a) Developing incentives to encourage significant contribution from the private investors in funding research and development on processing and upgrading tar sands/bitumen resources.	BPIC	MMSD, OPS, FMFBNP, FMIT&I	FGN (BPIC)	*	*	*
	(b) Funding research on bitumen technology.	PTDF	NGSA, BPIC, FMSTI, MMSD, FMed.	FGN (PTDF)	*	*	*
<i>(viii) Establishing infrastructural facilities for acquiring the technology for harnessing tar sands/bitumen.</i>	(a) Ensuring the provision of basic physical infrastructural facilities (such as field operational base, stores, laboratories, etc.)	MMSD	NGSA, OPS, BPIC	FGN (MMSD)	*	*	*
	(b) Establishing linkages with relevant tertiary and vocational educational institutions for human resource development in tars sands technology.	BPIC	MMSD, TIs, OPS	FGN (BPIC) OPS	*	*	*

4.2 COAL

4.2.1 Policies

- i. The nation shall pursue vigorously a comprehensive programme of resuscitation of the coal industry.
- ii. The nation shall sustainextensive exploration activities to maintain a high level of coal reserves.
- iii. The nation shall actively promote private sector as well as local content input in the coal industry.
- iv. The nation's exploitation and utilization of the coal shall be in line with global best practices.
- v. The nation shall explore the techno-economic feasibility of new coal technologies such as coal gasification and coal liquefaction.
- vi. The nation shall ensure adequate supply of coal to meet the energy requirements of the country in a cost effective and sustainable manner.

4.2.2 Objectives

- i. To promote production of coal to meet domestic needs and for export
- ii. To promote effective utilization of coal to complement the nation's energy needs and as industrial feedstock.
- iii. To attract increased investment into, and promote local content input, in the industry.
- iv. To promote the utilization of coal in the form of coal briquette
- v. To increase the contribution of coal by 30% to the national energy mix by 2030 in an environmentally sustainable manner.

4.2.3 Action Plan

Table 4.2: Coal Development Plan

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(i) Intensifying the drive for coal exploration and production activities.</i>	(a) Authenticating existing information on coal deposits through detailed geological programme.	NGSA	MMSD, NESREA	FGN (MMSD)	*	*	*
	(b) Completing the privatization of the coal sector.	BPE	MMSD, NGSA, FMJ, NCC, BPIC	FGN (BPE)	*	*	*
	(c) Creating awareness both locally and internationally on the potentials of the Nigerian coals for energy generation.	MMSD	NGSA, MFA, FMIT&I, NESREA, NOA	FGN (MMSD)	*	*	*
	(d) Continuing the concessioning of the coal deposits for open competitive bidding to investors.	BPE, MCO	NCC, NGSA, BPE, MMSD, FMJ, NSRMEA, NESREA	FGN (MMSD)	*	*	*
<i>(ii) Providing adequate incentives to indigenous and foreign entrepreneurs so as to attract investments in coal exploration and production.</i>	(a) Ensuring compliance with the provisions of the Mining Act and Regulations.	MMSD	NCC, NGSA, NESREA	FGN (MMSD)	*	*	*
	(b) Ensuring openness and transparency in acquisition of mining titles.	MCO	MMSD, NGSA, NESREA	FGN (NCC)	*	*	*
	(c) Developing adequate incentives to cater for pre- and post- exploration periods (e.g. tax holidays, etc).	MMSD	NGSA, FMIT&I, OPS	FGN (NCC)	*	*	*
	(d) Ensuring adequate stakeholder participation of the host communities.	MMSD	NGSA, OPS, Host Communities, SGs, LGs	FGN (MMSD), SGs, LGs, OPS	*	*	*
	(e) Ensuring that the Nigerian Geological Survey Agency acquires and provides up-to-date and quality geoscience data.	NGSA	NCC, MMSD, RCs, RIs, TIs, NASRDA	FGN (NGSA)	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(iii) Organizing awareness programmes for the use of smokeless coal briquettes as an alternative to fuelwood.</i>	(a) Organizing sensitization end-user workshop on the use of coal briquettes.	ECN, MMSD	FMIT&I, OPS, NGOs, CBOs, FMWA&SD, FME, FMI	FGN (ECN), MMSD	*	*	*
	(b) Appraising key performance indicators through expert review workshop on the use of coal briquettes.	MMSD, ECN	FMIT&I, OPS, NGOs, CBOs, FMWA&SD, FME, FMI, NOA	FGN(ECN, MMSD)			
<i>(iv) Providing adequate incentives for large-scale production of coal stoves at affordable prices.</i>	(a) Quantifying and characterizing of Nigeria's coal deposits.	NGSA	NCC, MMSD, RCs, RIs, TIs	FGN (NGSA)	*	*	*
	(b) Encouraging tertiary institutions and research institutes & centres to carry out research into coal briquetting & coal stove technology.	MMSD	RCs, RIs, TIs, OPS	FGN (NGSA)	*	*	*
	(c) Identifying and establishing a coal briquetting plant for mass production of coal briquettes.	NCC, MMSD	NGSA, RCs, RIs, TIs, OPS	FGN (SMDF), OPS	*	*	
	(d) Organizing a national programme for selecting efficient coal briquette burning stoves for adoption as national models for mass production.	ECN, MMSD	NCC, NGSA, RCs, RIs, TIs, OPS	FGN (ECN, MMSD)	*	*	*
<i>(v) Encouraging research and development in the production, processing and utilization of coal</i>	(a) Embarking on R & D activities in coal production, processing and utilization.	NMDC	FCC, FMSTI, ECN, NGSA, MMSD, FMEd., RCs, RIs, TIs	FGN (ECN, SMDF)	*	*	*
	(b) Establishing programmes for training of middle level manpower for the coal industry in Polytechnics, Technical Colleges and Vocational Schools.	MMSD, FMEd. , NIMG	NGSA, ECN, NCC, NBTE, MTI	FGN (FMEd., MMSD)	*	*	

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(vi) Minimizing environmental pollution arising from the utilization of coal</i>	(a) Ensuring compliance with the provisions of the Mining and Mineral Act and related regulations.	MMSD, FMEnv.	NGSA, NESREA, OPS, ECN	FGN (MMSD, FMEnv.)	*	*	*
	(b) Conducting environmental impact assessments (EIA) for coal mining and utilization projects in order to avoid excessive damage.	MMSD, FMEnv.	NGSA, NESREA, OPS, ECN	FGN (MMSD, FMEnv.)	*	*	*
	(c) Ensuring that coal mining and projects areas are reclaimed to original conditions.	MMSD, FMEnv.	NGSA, NESREA, OPS, ECN	FGN (MMSD, FMEnv.)	*	*	*
<i>(vii) Supporting increased environmental monitoring, including air quality monitoring for existing and/or proposed mines and power stations in the country.</i>	(a) Adopting appropriate methods, e.g. remote sensing and Geographical Information System, in assessment of environmental impacts of coal projects.	MMSD, FMEnv.	NGSA, NESREA, OPS, ECN	FGN (MMSD, FMEnv.)	*	*	*
	(b) Adequate capacity building for personnel responsible for environmental monitoring	MMSD, FMEnv.	NGSA, NESREA, OPS, ECN	FGN (MMSD, FMEnv.)	*	*	*
<i>(viii) Sustaining the existing emissions performance standard and preventing the construction of coal-fired power station in the country that fails to meet emissions performance standard.</i>	(a) Developing environmental performance metrics and benchmarks.	NESREA, NERC	FMP, REA, ECN	FGN, (NESREA, NERC)	*	*	*
	(b) Regularly carrying out monitoring, reporting and verification.	NESREA, NERC	FMP, REA, ECN	FGN, (NESREA, NERC)	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
	(a) Undertaking feasibility study of the existing transportation system at the coal sites	NRC	FMT, FMWH, SGs, NASRDA	FGN (NRC)	*	*	*
<i>(ix) Developing adequate infrastructure for handling and transportation of coal within and out of the country.</i>	(b) Continuing the on-going revamping and modernization of the nation's railway system.	NRC	FMT, FMWH, SGs, NASRDA	FGN (NRC)	*	*	*
	(c) Continuing the on-going dredging of the inland waterways	FMT, NIWA	SEPA, FMWH, OPS, DPs	FGN (NRC)	*	*	*
	(d) Conducting a technical audit prior to reactivating the NCC coal washing plant at Ogbete.	MMSD	OPS, FMIT&I, FMWR	FGN (NCC, MMSD)	*	*	*
<i>(x) Undertaking more detailed geological exploration for coal deposits in the country.</i>	(a) Concessioning of the coal deposits and calling for bids.	NCC, BPE	NGSA, MMSD	FGN (BPE)	*	*	
	(b) Evaluating and monitoring of exploration programs as spelt out in investor's work program during bid submission.	MMSD	NGSA, OPS, NASRDA	FGN (MMSD)	*	*	
	(c) Ensuring adequate compensations are paid to land/farm owners by investors.	NCC, FMWH, FMFBNP	MMSD, FMJ, FMWH, SGs, LGs, Community Leaders	FGN (FMWH), OPS	*	*	
	(d) Ensuring appropriate resettlement of the affected communities.	FMWH	MMSD, FMJ, FMWH, SGs, LGs, CBOs,	FGN (FMFBNP), OPS	*	*	
	(e) Ensuring exploitation method is most environmentally friendly.	FMEEnv., MMSD	NCC, FMA&RD, NASRDA, NESREA	FGN (FMEEnv.)	*	*	
	(f) Ensuring that excavated lands are restored.	FMEEnv., FMWH	MMSD, BPIC, FMA&RD, OPS, NESREA	FGN (NCC, FMWH)	*	*	

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(xi) Providing adequate incentives to indigenous and foreign entrepreneurs for the establishment of coal-based industries.</i>	(a) Formalizing of the operators in the coal base industry.	NGSA, MMSD	NCC, FMIT&I	FGN(MMSD)	*	*	
	(b) Classifying and categorising the coal based industry operators according to production indices and parameters.	NGSA, MMSD	NCC, FMIT&I	FGN(MMSD)	*	*	
	(c) Identifying and developing disbursement mechanism for identifying the required incentives for the coal based industry operators.	MMSD	FMIT&I	FGN(MMSD)	*	*	
<i>(xii) Ensuring land reclamation and zero environmental degradation at project communities and locations.</i>	(a) Identifying, enumerating and establishing the acclaimed land owners.	FMEnv., FMJ	MMSD	FGN(FMEnv.)	*	*	
	(b) Surveying the escavated areas mapped out for reclamation	FMEnv.	MMSD	FGN(FMEnv.)	*	*	
	(c) Appropriating the required resources for reclamation.	FMEnv.	MMSD	FGN(FMEnv.)	*	*	
	(d) Ensuring compliance with the submitted EIAs.	FMEnv.	MMSD, NESREA	FGN(FMEnv.)	*	*	
<i>(xiii) Introducing clean coal technologies into coal utilization.</i>	(a) Establishing linkages between existing institutions and relevant foreign centres of excellence in clean coal technologies.	ECN	FMed., FMSTI	FGN (FMEnv.)	*	*	*
<i>(xiv) Increasing the exportation capacity of coal.</i>	(a) Generating the required data for coal based industry for local consumption	NGSA	MMSD	FGN (MMSD)	*	*	*
	(b) Establishing the estimated coal reserve of the coal based industry.	NGSA	MMSD	FGN(MMSD)	*	*	*
	(c) Enhancing the capacity for coal exportation value added coal without undermining local utilization.	MMSD	ECN, FMIT&I	FGN(ECN)	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE

<i>(xv) Re-introducing the use of coal for power generation.</i>	(a) Reactivating Oji River coal fired power plant .	FMP	NERC, REA, IPP, NCC, SEPA, MMSD, NESREA	FGN (FMP)	*	*	
	(b) Continuing the on-going drive for establishing coal-fired power plants.	FMP	NERC, REA, IPP, NCC, MMSD, SEPA, FMIT&I, NIPC, NESREA	FGN (FMP)	*	*	

CHAPTER FIVE

NUCLEAR ENERGY

5.0 Introduction

Nuclear energy has been and continues to be a very attractive option in the socio-economic development of nations because of the positive role it plays in electric power generation, food and agriculture, animal production, water supply, health care delivery, petroleum exploration, solid mineral exploration and environmental protection.

In this regard, Nigeria took the first step in 1976 through the creation of the Nigeria Atomic Energy Commission (NAEC) by Act 46 as a specialised agency to promote and streamline the implementation of nuclear energy in the country. However, NAEC was not activated and inaugurated until 2006. In 1976, two nuclear research centres, namely, Centre for Energy Research and Training (CERT) and Centre for Energy Research and Development (CERD) were established in Zaria and Ile-Ife respectively. The Energy Commission of Nigeria (ECN) was also established, by Act 62 of 1979 as amended by Act 32 of 1988 and Act 19 of 1989, with the statutory mandate for the strategic planning and co-ordination of National Energy Policies in all its ramifications. The two university-based research centres at Zaria and Ile-Ife were later brought under the supervision of the ECN. Furthermore, the Sheda Science and Technology Complex (SHESTCO) Abuja, was established in 1991, with the mandate to, among others, conduct research for the development of nuclear energy. The Nigerian Nuclear Regulatory Authority (NNRA) was established by Act 19 of 1995 with the primary responsibility of nuclear safety and radiological protection regulation in Nigeria and it was activated in 2001.

Three Centres were also established by NAEC in 2010; these are Centre for Nuclear Energy Studies (CNES), University of Port Harcourt, Centre for Nuclear Energy Research & Training (CNERT), University of Maiduguri and Centre for Nuclear Energy Studies and Training (CNEST), Federal University of Technology, Owerri. The Nuclear research centres maintain various nuclear research and development facilities including neutron generators, isotopic neutron sources, X-ray Fluorescence facilities, a neutron source reactor, a gamma irradiation facility and a linear accelerator (under construction). These facilities have impacted positively on the socio-economic development of the nation and contributed significantly in creating and promoting awareness in the peaceful uses of nuclear energy in the country. Specifically, the country's plan is to develop nuclear technology for application in medical and human health, food and agriculture, management of water resources and energy sector among others.

The current installed electricity grid capacity generation is about 12,522MWe. It has a grid transmission wheeling capacity of 8,100MWe with barely available average output of about 3,500MWe to 5,000MWe. The generation mix is about 15.4% hydro and 84.6% thermal. Government has continued to invest heavily in expanding the generation capacity and also encouraging investments in power generation through joint ventures and IPPs, which was projected to be 28,261 MWe by 2030. Though remarkable improvement has been recorded, but the desired outcome is far from being achieved as it is subject to the completion of the IPPs, high water level in the hydro dams and less activities of gas pipelines vandalization.

Studies on electricity demand, especially by the ECN, have shown that even with the on-going efforts of expanding generation and grid capacity, it will not be able to meet the requirements of the projected growth rate in the country for attaining the Sustainable Development Goals (SDGs) by 2030. Indeed, a shortfall of between 9,000 – 17,000 MWe will be recorded between 2010 and 2015 based on current energy usage and the projected growth rate in industrial development and the population. The projected peak national energy demand is put at between 28,000 – 31,000 MWe by 2015. Revised demand projections by the ECN using MAED Model indicated that the growth rate of 10% annual GDP is required to meet the SDGs. Nigeria's peak demand will be in the range of 175,000 – 192,000 MW by 2030.

At present, nuclear energy resources are not being used for electricity generation in Nigeria. However, an Inter-Ministerial Committee on energy resources in Nigeria set up in April 2004 by Government concluded that nuclear power should be introduced into the national electric power generation mix. ECN supply studies using MESSAGE Model for the contribution of nuclear energy to the national electricity grid is projected to start with 1000MWe by 2025 and to be increased within an interval of five years to 4000MWe by 2030.

Notable progress has also been made in the Nigeria NPP especially, the attainment of IAEA Milestone 1 in 2009, conducting of preliminary site selection and the signing and ratification of two agreements by the Nigeria Federal Government with the Russian Federation for Cooperation in the development of nuclear energy for peaceful purposes in 2007. Nigeria is currently implementing phase 1 of the Technical Framework (TF) comprising Human Resource Development (HRD) and Nuclear Power Infrastructure Development (NPI) which correspond with the IAEA Milestone 2 activities.

However, the successful introduction of nuclear power technology that will allow the spin-offs from such technology to be efficiently maximized demands a critical mass of professionals in the various fields of nuclear science and technology. Although an initial pool of nuclear scientists and engineers exist in the country, there are currently not enough professionals in these fields. In order to achieve the required critical mass of professionals, the current effort must be intensified. Additionally, necessary incentive should be put in place to retain and attract nuclear science and technology professionals.

It is also important to strengthen and increase the requisite infrastructure for research and manpower development. In fact, the first step towards the use of nuclear energy for power generation entails operating nuclear research reactors and other ancillary facilities to gain mastery of the requisite technology. Currently, there are limited research activities in some areas of nuclear science and technology at CERT-ABU, Zaria; CERD-OAU, Ile-Ife; and SHESTCO, Abuja. These must be coordinated and further developed and strengthened to facilitate the attainment of government directive on electricity generation from nuclear power technology by 2025.

Other critical issues that must be addressed, among others, include public concerns, regulatory environment, and international cooperation. Adequate government funding and private sector investment are requisite to translating pertinent government directives into tangible results.

5.1 NUCLEAR ENERGY

5.1.1 Policies

- i. The nation shall promote the development of nuclear energy, and undertake all activities related to peaceful uses of nuclear energy in its entire ramification.
- ii. The nation shall pay adequate attention to safety, security and safeguard issues in the pursuit and operation of its nuclear programmes.
- iii. The nation shall continuously strengthen all institutional frameworks (legal/legislative) and ensure their effective implementation.
- iv. The nation shall continuously fund and encourage the development of the requisite manpower, and provide the enabling environment for the acquisition of competencies and skills needed for the design, construction and operation of the nation's nuclear facilities.
- v. The nation shall encourage and support research and infrastructural development necessary to enable rapid domestication of nuclear technology, and encourage intellectual property right.
- vi. The nation shall facilitate and sustain cooperation with the International Atomic Energy Agency (IAEA) and other international stakeholders in the peaceful use of nuclear energy.
- vii. The nation shall ensure that the safe management of nuclear waste is done in an environmentally friendly and sustainable manner taking cognizance of national and international obligations.

5.1.2 Objectives

- i. To promote nuclear energy, as an important electricity component in the nation's energy mix.
- ii. To promote the study and development of nuclear science and technology in educational institutions.
- iii. To promote the development and application of nuclear science and technology in industry, agriculture, medicine and water resources management, as well as other relevant sectors.
- iv. To pursue the exploration of nuclear mineral resources in the country.
- v. To develop national capability in the deployment of nuclear energy to all areas of socio-economic development of Nigeria and ensure that spin-off benefits are derived within the shortest possible time for sustainable development.
- vi. To design and implement the strategy for the integration of nuclear energy into Nigeria's programme of accelerated development as contained in the approved nuclear power roadmap.
- vii. To institute the necessary nuclear safety, security and safeguards requirements and obligation in the exploitation of nuclear energy.
- viii. To promote the development of appropriate framework necessary to ensure adequate environmental protection and minimize adverse environmental impacts associated with nuclear and other radioactive materials.
- ix. To promote the development of appropriate framework necessary to attain self-reliance in nuclear matters in the long term.
- x. To ensure that effective policy, legal and regulatory framework, infrastructure and other resources are made available for the provision of safe and sustainable management of spent fuel and radioactive waste.
- xi. To enhance national commitment, speedy and sustainable development of nuclear science and technology in the country.
- xii. To ensure that all nuclear facilities are operated in a safe, secure and transparent manner and in line with international best practices.
- xiii. To support all operational service delivery including research to the extent that localization of all industrial/service operations are achieved.

5.1.3 Action Plan

Table 5.1: Nuclear Energy Development Plan

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(i) Strengthening the institutional framework for the operational and regulatory aspects of the nuclear industry.</i>	(a) Reviewing and harmonizing the existing institutional framework	FMSTI, OSGF, MPR	ECN, NAEC, NNRA, SHESTCO, FMed., NASENI, CERT, CERD	FGN (FMSTI)	*	*	*
	(b) Assessing and upgrading the existing nuclear facilities.	NAEC	ECN, CERT, CERD, NNRA, SHESTCO	FGN (NAEC)	*	*	*
	(c) Assessing and upgrading the existing regulatory framework.	NNRA	ECN, CERT, CERD, NNRA, SHESTCO, FMJ	FGN(NNRA)	*	*	*
	(d) Evaluating the level of implementation of the nuclear energy development plan.	ECN	NAEC, NNRA, SHESTCO, FMSTI, NASENI, CERT, CERD	FGN (ECN)	*	*	*
<i>(ii) Developing all necessary legal/legislative frameworks for the smooth operation of nuclear facilities.</i>	(a) Reviewing the existing legal/legislative framework.	NNRA	ECN, NAEC, FMSTI, NASS, FME _{env.} , NESREA, FMJ	FGN (NNRA)	*	*	*
	(b) Domesticating relevant international legal instruments.	NNRA	FMJ, MFA, NASS NAEC, ECN, FMP, MPR	FGN (NNRA)	*	*	*
<i>(iii) Developing national capacity in all areas related to the use of nuclear energy and attaining self-sufficiency in human capacity development.</i>	(a) Conducting a survey of the available research and technical manpower in the country.	NAEC, ECN	CERT, NUC, CERD, SHESTCO, NASENI, NBTE, NNRA, NCCE	FGN (NAEC, ECN)	*	*	*
	(b) Reviewing periodically the nation's nuclear energy manpower development plan.	NAEC, ECN	FMSTI, NERC, NAEC, NNRA, SHESTCO, NASENI, CERT, CERD	FGN (ECN)	*	*	*
	(c) Developing appropriate framework to attain self-reliance in nuclear energy activities.	NAEC, ECN	FMSTI, NNRA, CERT, CERD, SHESTCO	FGN (NAEC, ECN)	*	*	*
	(d) Assessing the manpower requirement for nuclear electricity generation.	NAEC	ECN, NNRA, FMP, SHESTCO, CERT, CERD	FGN (NAEC)	*	*	*

	(e) Providing research reactor simulators at CERT, CERD and SHESTCO.	NAEC	CERT, CERD, FMSTI, SHESTCO, CNES, CNERT, CNEST, ECN, NNRA	FGN (NAEC)	*	*	
	(f) Providing a heat transfer laboratory at CERD Ile-Ife.	NAEC	ECN, NNRA, FMSTI	FGN (NAEC)	*	*	
	(g) Providing facilities for reactor design neutronics and safety analysis at CERT, Zaria.	NAEC	ECN, NNRA, FMSTI	FGN (NAEC)	*	*	
	(h) Providing facilities for Health Physics and Dosimetry studies at CERT, Zaria.	NAEC	ECN, NNRA, SHESTCO	FGN (NAEC).	*	*	
	(i) Establishing a radiochemistry laboratory at CERT, Zaria.	NAEC	ECN, NNRA, SHESTCO	FGN (NAEC)	*	*	
	(j) Completing the installation and commissioning of the tandem accelerator at CERD Ile-Ife.	NAEC	SHESTCO, NNRA, DPs, ECN	FGN (NAEC)	*	*	
	(k) Completing and commissioning of the proposed radiotherapy centers at Port Harcourt, Gombe and Maiduguri.	FMH	ECN, NNRA, DPs	FGN (FMH)	*	*	
	(l) Completing and commissioning the national isotope hydrology laboratory at CERT, Zaria.	FMH	CERD, ECN, ABU, DPs, NAEC	FGN (FMH)	*	*	
<i>(xvi) Producing, acquiring, treating, storing, transporting and disposing of any radioactive substances.</i>	(a) Developing an adequate radioactive waste management system.	NAEC	ECN, NNRA	FGN (NNRA)	*	*	*
	(b) Designing and constructing Low Level Waste (LLW) and Medium Level Waste (MLW) disposal facilities	NAEC	NNRA, ECN, FMEnv., FMW	FGN (NAEC)	*	*	*
	(c) Periodically reviewing the existing laws and regulations for the safety, security and safeguard.	NNRA	NNRA, FMEnv., ECN, NASS, NAEC, FMJ	FGN (NAEC)	*	*	*

CHAPTER SIX

RENEWABLE ENERGY

6.0 Introduction

Environmental concerns are alerting the world on the imminent dangers of over dependence on fossil based energy sources, oil, gas, coal etc as the main driver of industrialization. Global warming has steadily emerged from the realm of speculative science to the reality of definitive global concern in the form of rising water levels with consequent flooding and weather vagaries. Oil spillage and the loss of arable and habitable land areas are fuelling community disenchantment with oil exploration activities. These have forced a rethink by world leaders on the dominant role of oil and indeed other fossil fuels as the driver of modern industrialization. There is now a global consensus for alternative driver of future industrialization. Renewable energy sources have emerged as the most favoured prospective driver .

Nigeria is endowed with abundant renewable energy resources, the significant ones being solar energy, biomass (crop residues, animal wastes, municipal wastes, etc), wind, small and large hydropower , geothermal, ocean energies as well as potentials for hydrogen fuel. The estimated capacity of the main renewable energy resources is given in Table 6.1.

Table 6.1: Nigeria’s Renewable Resource Estimates

ENERGY SOURCE	CAPACITY
Large Hydropower	24,000MW
Small Hydropower	3,500 MW
Fuelwood	13,071,464 Hectares
Animal Waste	61 million tonnes/yr
Crop Residue	83 million tonnes/yr
Solar Radiation	3.5 – 7.0 kWh/m ² -day
Wind	2 – 4 m/s (annual average) at 10m height

Source: Energy Commission of Nigeria; 2019

Except for large scale hydropower, which serves as a major source of electricity, the current state of exploitation and utilization of the renewable energy resources in the country is very low; limited largely to pilot and demonstration projects developed by the two research centres: Sokoto Energy Research Centre located at the Usman Danfodiyo University, Sokoto and National Centre for Energy Research and Development located at University of Nigeria, Nsukka. The Centres, which are under the supervision of the Energy Commission of Nigeria, have developed renewable energy

systems such as solar dryers, solar chick brooders, solar distillers, solar water heaters, solar cookers, biogas digesters and efficient woodstoves. These are all ready for large-scale production and commercialization, which calls for the participation of private entrepreneurs. Other establishments, include Solar Panel Manufacturing Plant at Karshi, National Centre for Hydropower Research and Development, University of Ilorin, etc. The Centres and other renewable energy companies also provide services in the installation and maintenance of solar photovoltaic systems for power supply and refrigeration. It is pertinent to point out that the systems mentioned above are a limited part of a wide spectrum of renewable energy systems and appliances in the global market.

The main constraint in the rapid development and diffusion of technologies for the exploitation and utilization of renewable energy resources in the country are the lack of consistency in policy implementation needed to stimulate demand and attract investors. The comparative low quality of the systems developed and the high initial upfront cost also constitute barriers to the development of markets. Therefore, if the country is to unleash the enormous potential of its renewable energy resources on its drive towards achieving sustainable energy for all (SE4All), these barriers must be eliminated through significant investment in critical areas of R&D, building of indigenous human and manufacturing capacities and the intensification of the on-going economic reform to create investor friendly environment.

From Table 6.2(i), based on a 7% economic growth rate, and the corresponding ECN's projected electricity supply profiles of about 26,000MW, 52,000MW and 160,000MW renewable energy (RE) would contribute about 17%, 19% and 20% in meeting the total electricity demand of the nation in the short, medium and long terms, respectively.

Table 6.2: Summary of Renewable Energy Targets

(i) Renewable Electricity Supply Projection in MW (7% GDP Growth rate)

S/N	System	Short Term	Medium Term	Long Term
1	Hydro (LHP)	3,000	6,000	6,000
2	Hydro (SHP)	43	533	533
3	Solar PV	1,400	3,000	20,000
4	Solar Thermal	-	45	6,000
5	Biomass	5	16	50
6	Wind	20	22	30
	All Renewable (MW)	4,468	10,026	32,613
	All Energy Resources (MW)	26,000	52,000	160,000
	% RE	17%	19%	20%

Source: Energy Commission of Nigeria

(ii) Renewable Electricity Supply Projection in MW (10% GDP Growth rate)

S/N	System	Short Term	Medium Term	Long Term
1	Hydro (LHP)	4,000	8,000	8,000
2	Hydro (SHP)	350	1,332	1,332
3	Solar PV	2,000	4,000	25,000
4	Solar Thermal	-	936	12,000
5	Biomass	5	23	77
6	Wind	28	32	42
	All Renewable (MW)	6,383	14,323	46,451
	All Energy Resources (MW)	32,000	72,000	230,000
	% RE	20%	20%	20%

Source: Energy Commission of Nigeria

(iii) Renewable Electricity Supply Projection in MW (13% GDP Growth rate)

S/N	System	Short Term	Medium Term	Long Term
1	Hydro (LHP)	11,207	12,132	12,132
2	Hydro (SHP)	320	760	2,600
3	Solar PV	2,500	5,000	30,000
4	Solar Thermal	-	1,400	18,132
5	Biomass	5	30	100
6	Wind	36	41	54
	All Renewable (MW)	14,068	19,363	63,018
	All Energy Resources (MW)	48,000	90,000	315,000
	% RE	29%	22%	20%

Source: Energy Commission of Nigeria

If however, the contribution of large hydropower is discounted, the contribution of RE declines to about 5.6%, 7.7% and 16.6%, respectively in meeting the national electricity demand under the 7% growth scenario. Moreover, renewable energy resources are envisaged to contribute an average of about 80% to the non-electricity energy demand in the country as shown in Table 6.3. The contribution is, however, expected to decline over the years due to planned decreases in the consumption of fuelwood.

Table 6.3: Targets for Non-Electricity (Thermal) Energy Production

S/N.	ITEM	SHORT	MEDIUM	LONG
1.	Total Thermal Energy Production (GWh)	193,789	202,128	248,869
2.	Renewable Energy Share (%)	85	80	79
3.	Other non-renewable energy share (%)	15	20	21

Source: Energy Commission of Nigeria, REMP 2nd Ed 2012

The projected contribution of biofuels in meeting the demand for automotive fuels in the country is shown in table 6.4.

Table 6.4: Targets for Bio-Fuel for Automotive Use in Nigeria, 7% Growth Scenario

Biofuel Type		Time Frame		
		Short	Medium	Long
Bio-ethanol	Demand (billion litres / annum)	1.446	2.817	5.646
	% contribution to motor spirit	10	10	10
Bio-diesel	Demand (billion litres / annum)	0.460	0.835	1.780
	% contribution to diesel fuel	20	20	20

6.1 HYDROPOWER

6.1.1 Policies

- i. The nation shall fully harness the hydropower potential in the country for electricity generation.
- ii. The nation shall pay particular attention to the development of the small, mini and micro hydropower schemes for the growth of the rural economy.
- iii. The nation shall exploit hydropower resources in an environmentally sustainable manner.
- iv. The nation shall actively promote private sector and indigenous participation in hydropower development.
- v. The nation shall support Research and Development activities for local adaptation of hydropower plant technologies.

6.1.2 Objectives

- i. To increase the contribution of hydropower to the total electricity supply mix.
- ii. To extend electricity to rural and remote areas, through the use of small, mini and microhydropower schemes to promote economic activities.
- iii. To pursue hydropower production in an environmentally friendly and sustainable manner that minimizes the adverse impacts on the environment, ecosystem and population.
- iv. To attract private sector investments into the hydropower sub- sector.
- v. To develop local manufacturing capabilities for hydropower technologies.
- vi. To encourage the development of standards on the locally manufactured SHP components.
- vii. To encourage local and international collaboration as well as international best practices in hydropower development and utilization.

6.1.3 Action Plan

Table 6.5: Hydropower Development Plan

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(i) Promoting and supporting research and development activities on hydropower exploitation for increased indigenous participation in the planning, design and construction of hydropower projects.</i>	(a) Identifying and embarking on R & D priorities that will fast-track local content development.	ECN, FMSTI, NASENI, OPS	NCDMB, NASENI, FMWR, RCs, RIs, TIs	FGN (ECN), OPS, DPs	*	*	*
	(b) Fast tracking the establishment of R & D centres on hydropower for electricity generation.	ECN, FMSTI, NASENI, OPS, FMWR	FMP, NUC, NBTE, NCCE, FMIT&I, NCDMB, NASENI FMWR, TIs	FGN(ECN), OPS	*	*	
	(c) Organizing sensitization workshops, seminars, conferences, lectures etc.	ECN, FMSTI, NASENI, OPS, FMWR	FMP, NUC, NBTE, NCCE, FMIT&I, NCDMB, NASENI FMWR, RCs, RIs, TIs	FGN (ECN)	*	*	*
	(d) Establishing linkages/collaboration between Universities, Research Institutes and Centres with OPS and the relevant International Centres of Excellence.	ECN, FMSTI, NASENI, OPS, FMWR	FMIT&I, NCDMB, NASENI, FMWR, RCs, RIs, TIs, DPs	FGN (ECN, FMSTI), DPs, OPS	*	*	
	(e) Introducing competitive research grants based on the best hydropower R&D adoption design and proposals.	ECN, FMSTI, NASENI	FMP, FMFBNP, NUC, NBTE, NCCE, FMIT&I, NCDMB, NASENI, FMWR, RCs, RIs, TIs, TETFUND, NAS, NAE, DPs, OPS	FGN (ECN), OPS	*	*	*
	(f) Supporting the endowment of professorial chairs in hydropower technologies in the universities, research institutes and centres.	ECN/ FMSTI, NASENI, OPS, FMWR	NUC, NBTE, NCCE, FMIT&I, NCDMB, NASENI, OPS, FMWR, RCs, RIs, TIs, TETFUND, NAS, NAE	FGN (ECN)	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(ii) Establishing more hydro-meteorological stations across river basins.</i>	(a) Conducting comprehensive survey of existing infrastructural facilities across the river basins in the country.	FMWR	FMP, NIHSA, NiMet, NASENI, ECN, NWRI, RBDA, OPS, FMSTI, NIWA	FGN (FMWR)	*	*	
	(b) Building the capacity of indigenous manpower in the planning, design, and construction of hydro meteorological stations.	FMWR, NiMet	NIHSA, FMP, FMSTI, ECN, OPS, RCs, RIs, TIs, NERC, NSE, NAS, NWRI, NAE, NIWA	FGN (FMWR, NiMet, OPS)	*	*	*
	(c) Creating enabling environment for indigenous participation in the establishment and operation of the stations.	FMWR, NiMet	ECN, FMFBNP, CBN, NIPC, OPS, NERC, FMJ, FMAv., FMSTI, NIWA	FGN (FMWR, FMAv.)	*	*	
<i>(iii) Generating and updating data on all rivers, identifying possible locations for hydropower projects and facilitating detailed survey of the potential SHP sites.</i>	(a) Conducting a national survey of hydropower potentials.	ECN, FMSTI	NBS, FMWR, NIHSA, RCs, RIs, TIs, OPS, DPs, NGSA, NIWA	FGN (ECN)	*	*	*
	(b) Strengthening the RBDAs to provide data on small hydropower potentials of sites within the basin.	FMWR	NIHSA, ECN, FMSTI	FGN (FMWR)	*	*	
<i>(iv) Organizing sensitization workshops, seminars and enlightenment programmes on the roles of SHP in rural development.</i>	(a) Sensitizing the Federal, State and LGs' rural electrification agencies on the potential of SHP as source of electricity.	ECN, FMSTI, REA	NIHSA, SGs, OPS, NGOs, FMIT&I, FMP, NIWA	FGN (ECN, FMSTI, REA), SGs, OPS	*	*	
	(b) Introducing legislation that will ensure the incorporation of SHP in the development plans of the federal, state and local governments.	ECN, FMSTI, REA	NASS, FMJ, OPS, SASS, FMP, SGs, LGs, NIWA	FGN (ECN, FMSTI, REA)	*	*	
<i>(v) Introducing tax reductions, soft loans, grants, bilateral concessional funding to encourage private investments and public-private partnerships in the development of hydropower projects.</i>	(a) Providing low interest soft loans for hydropower projects.	BOI	CBN, FMFBNP, OPS, FMP, FMWR, NIWA	FGN (BOI, FMFBNP, CBN), DPs, OPS	*	*	*
	(b) Providing market incentives such as fixed price, fixed payment, competitive license bidding etc.	NERC	FMP, FMFBNP, ECN, MAN, FMIT&I, NIPC, NIWA	FGN (NERC), DPs, OPS	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
	(c) Lowering profit tax for corporate organizations that are involved in hydropower development.	FMFBNP	CBN, NIPC, NERC	FGN (FIRS)	*	*	*
	(d) Reducing import duty for the importation of materials, components and equipment by bona fide manufacturers of hydropower equipment.	FMFBNP	CBN, FIRS, NERC, SON, NASENI	FGN (NCS)	*	*	
<i>(vi) Putting in place a framework for power purchase agreement between owners of SHP, the grid and users.</i>	(a) Introducing legislation that will ensure the incorporation of power purchase agreement in the development of SHP in Nigeria.	NERC, NBET	NASS, FMJ, FMP, ECN, FMWR, BPE, FMSTI	FGN (NERC)	*	*	
	(b) Developing codes and standards for SHP.	SON	NERC, ECN, FMIT&I, FMWR, FMSTI, FMP, NASENI	FGN (SON)	*	*	
<i>(vii) Exploiting the multifunctional use of hydropower infrastructure (e.g. flood control, water supply, electricity generation, recreation, etc.).</i>	(a) Establishing small hydropower pilot schemes in each geopolitical zone.	FMP, FMWR	ECN, NERC, FMIT&I, FMWR, IPPs, FMF, FMSTI	FGN (FMP, ECN, FMSTI), DPs	*	*	
	(b) Incorporating, where appropriate, hydro electricity generation into water management programmes.	FMWR, FMP	ECN, FMSTI, FMFBNP, DPs, IPPs, RBDA, NASENI, NWRI, NIHSA	FGN (FMWR, FMP), OPS	*	*	
	(c) Implementing existing Memorandum of Understanding between relevant agencies.	FMWR	NERC, ECN, FMP, DPs, IPPs, NIHSA, NWRI, FMEnv.	FGN (FMWR, NERC, ECN)	*	*	
	(d) Managing water resources for effective water supply and flood control.	FMWR	NERC, FMP, ECN, IPPs, RBDA, FMEnv.	FGN (FMWR)	*	*	*
	(e) Incorporating where appropriate recreational facilities into water management programmes.	FMWR, FMIC	NTDC, NIHSA, NIHOTOUR	FGN (FMWR, FMIC)	*	*	

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(viii) Ensuring that State Rural Electricity Boards incorporate small-scale hydropower projects in their agricultural, industrial and economic development plans.</i>	(a) Establishing and maintaining linkages/collaboration between REA & the State Rural Electricity Boards.	REA, SGs	FMP, NERC, ECN, IPPs, FMWR, FMA&RD, FMIT&I, FMSTI	FGN (REA, FMP), SGs	*	*	*
<i>(ix) Supporting cutting-edge research and the development of mitigation techniques and technologies to reduce or eliminate adverse impact of hydropower development and operation on the ecosystem.</i>	(a) Identifying and embarking on R & D priorities to mitigate the adverse impact of hydropower development.	FMEnv., FMSTI	ECN, NIHSA, FMWR, RCs, RIs, TIs, FMP	FGN (FMEnv., FMSTI), OPS, DPs	*	*	
	(b) Strengthening the existing R & D centres and institutes on hydropower development.	ECN, FMSTI	FMWR, FMP, RCs, RIs, TIs, NASENI	FGN(ECN, FMP)	*	*	
	(c) Establishing linkages/collaboration between Universities, Research Inst. & Centres with OPS and relevant International Centres of Excellence.	ECN, FMSTI	FMed., NUC, NBTE, NCCE, FMIT&I, NASENI, RCs, RIs, TIs	FGN (ECN), DPs, OPS	*	*	*
<i>(x) Establishing local training institutions to produce skilled manpower in hydropower technology.</i>	(a) Strengthening the local training institutions on hydropower technology.	NAPTIN, NASENI	FMP, ECN, FMSTI, TIs, RCs, RIs, NBTE	FGN (NAPTIN, NASENI), OPS	*	*	
<i>(xi) Integrating capacity building in the procurement of hydropower projects to encourage technology transfer to indigenous personnel.</i>	(a) Building indigenous manpower capacity in the planning, design, and construction of hydropower stations .	ECN, NASENI, NAPTIN	FMSTI, FMWR, FMP, RCs, RIs, TIs, NERC, NSE, NAS, NWRI, NIHSA, NAE, NOTAP, NBTI	FGN (ECN, FMSTI, NAPTIN, NASENI), OPS	*	*	*
	(b) Increasing progressively indigenous participation in the planning, design and construction of hydropower plants in a ratio that ensures full benefits to the country.	FMP, ECN, FMSTI	NASENI, NAPTIN, FMWR, RCs, RIs, TIs, NERC, NSE, NAS, NWRI, NAE, NOTAP, NBTI	FGN (ECN, FMSTI, FMP), OPS	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(xii) Encouraging the private sector establishment of Indigenous Manufacturing Industries for hydropower equipment and accessories.</i>	(a) Creating enabling environment for attracting FDI and indigenous participation in the local production of hydropower plants, equipment and accessories.	NIPC, SMEDAN	FMP, FMIT&I, ECN, FMFBNP, CBN, FMWR, BPE, OPS, FMSTI, NASENI, NOTAP	FGN (NIPC, NOTAP, FMIT&I)	*	*	*
	(b) Developing and promoting market for both small and large hydropower manufacturers.	NIPC	FMP, FMIT&I, ECN, FMFBNP, CBN, FMWR, BPE, OPS, FMSTI, NASENI, REA, SMEDAN	FGN (NIPC)	*	*	*
	(c) Building indigenous entrepreneurial capacity.	SMEDAN	FMP, FMIT&I, ECN, FMFBNP, CBN, FMWR, BPE, OPS, NIPC, NAPTIN, NASENI	FGN (SMEDAN)	*	*	*
<i>(xiii) Exploring the potential of hydrokinetic energy for selected rivers.</i>	(a) Feasibility studies on generation capacities of the selected rivers	ECN, NASENI	FMWR, FMP	FGN (ECN, NASENI, FMP)	*	*	*
	(b) Capacity building on local turbine fabrication						
<i>(xiv) Generation of energy through hydrokinetic system downstream of Jebba Hydropower scheme.</i>	(a) Feasibility studies on the generation capacity of downstream of Jebba Hydropower	ECN, FMP	FMP, FMWR, Jebba Electric Co.	FGN (ECN, FMP) OPS	*	*	*

6.2 SOLAR

6.2.1 Policies

- i. The nation shall aggressively pursue the integration of solar energy into the nation's energy mix, which should be based on the established potentials and available technologies nationwide.
- ii. The nation shall keep abreast of worldwide developments in solar energy technology and utilization to adopt global best practices.
- iii. The nation shall utilize solar energy resources where it is more cost effective and advantageous.
- iv. The nation shall support the establishment of local manufacturing industries for solar energy conversion technologies and applications.
 - v. The nation shall encourage individual and corporate bodies to generate solar power and feed into the grid.
 - vi. The nation shall encourage research and development in solar energy technology.

6.2.2 Objectives

- i. To develop the nation's capability and capacity in the utilization of solar energy.
- ii. To use solar energy as the main energy option in the rural and peri-urban areas with higher solar energy potential.
- iii. To develop the market for solar energy technologies and services.
- iv. To develop local manufacturing capabilities for solar energy conversion technologies.
- v. To encourage individuals and corporate bodies to generate solar power and reduce total dependence on the national grid as well as feeding the excess generated power into the national grid.
- vi. To encourage research and development in solar power.

6.2.3 Action Plan

	(e) Encouraging collaboration between tertiary institutions, research centres and industries.	ECN, FMSTI	FMP, NASENI, OPS, RCs, RIs, TIs, TETFUND, NUC, FMIT&I	FGN (ECN, TETFUND), OPS	*	*	*
<i>(iii) Providing adequate incentives to suppliers of solar energy products and services.</i>	(a) Developing and promoting market for solar energy appliances.	ECN, FMSTI	FMFBNP, OPS, DPs, FMT&I, NBTI, BOI, NIPC	FGN (ECN, FMSTI), OPS	*	*	*
	(b) Developing market incentives such as adequate feed in tariffs for solar energy.	NERC	FMF, FMIT&I, NBTI, OPS	FGN (NERC)	*	*	*
	(c) Assessing national demand for solar energy systems.	ECN	NBS, RCs, RIs, TIs, NASENI, FMP, FMSTI, NERC	FGN (ECN)	*	*	
	(d) Developing and signing legally binding Power Purchase Agreements with utilities.	NERC, NBET	ECN, FMP, FMFBNP, FMJ, BPE, OPS, NNPC	FGN (NERC)	*	*	
<i>(iv) Providing adequate incentives to local manufacturers for the production of solar energy systems and accessories.</i>	(a) Providing fiscal incentives such as suspension of import duty.	NCS, FMFBNP	NIPC, FMP, NERC	FGN (FMFBNP, NIPC), OPS	*	*	
	(b) Providing investment grants, operational grants, etc. to encourage local production of solar energy systems.	BOI	NIPC, FMP, FMFBNP, NERC, NCS, FMIT&I	FGN (BOI), OPS	*	*	
	(c) Providing tax holiday for companies involved in solar energy technology development.	FIRS, FMFBNP	CBN, FMIT&I, ECN, OPS	FGN (FIRS), OPS	*	*	*
	(d) Establishing solar PV and solar thermal production plants.	NASENI, ECN	FMSTI, OPS, FMIT&I	FGN (NASENI, ECN), OPS	*	*	

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
	(e) Encouraging local and foreign investors to establish factories for the production of major components, (such as inverters, deep cycle batteries, charge controllers, etc).	NIPC	ECN, FMFBNP, FMSTI, OPS, DPs	FGN (NIPC), OPS, DPs	*	*	*
	(f) Establishing Renewable Energy energy efficiency and conservation Fund.	ECN, FMSTI, NASS	FMSTI, OPS, DPs, FMFBNP	FGN (ECN, FMSTI), OPS, DPs	*	*	
<i>(v) Introducing measures to fast-track the local solar energy industry.</i>	(a) Introducing legislation to encourage hotels, estates and government agencies use solar energy for water heating and electricity backup.	ECN, FMSTI	NASS, FMJ, SGs, LGs, OPS, FMIT&I, SMEDAN	FGN (ECN, FMSTI)	*	*	
	(b) Introducing appropriate Policy, Legal and Regulatory framework to support the local solar energy industry.	ECN, FMSTI	FMP, NASS, FMF, FMJ, OPS, NERC, NASENI	FGN (ECN, FMSTI)	*	*	
<i>(vi) Setting up extension programmes to popularise solar energy technology and solutions to the rural and peri-urban communities.</i>	(a) Developing and siting of appropriate pilot and demonstration schemes.	ECN, FMSTI	FMIT&I, OPS, DPs	FGN (ECN, FMSTI), OPS, DPs	*	*	
	(b) Training extension workers on the applications, installation and maintenance of solar energy systems.	ECN, NASENI, NAPTIN	FMSTI, RCs, RIs, TIs, DPs	FGN (ECN, NASENI, NAPTIN)	*	*	*
<i>(vii) Providing fiscal incentives for the installation of solar energy systems.</i>	(a) Introducing tax incentives such as suspension of import duty, tax holiday etc.	NCS, FIRS, FMFBNP	FMSTI, OPS, DPs, CBN, NIPC	FGN (FIRS, NCS, OPS)	*	*

6.3 WIND

6.3.1 Policies

- i. The nation shall commercially develop its wind energy resource and integrate this with other energy resources into a balanced energy mix.
- ii. The nation shall take necessary measures to ensure that this form of energy is harnessed at sustainable costs to both suppliers and consumers in the rural areas.
- iii. The Nation shall apply global best practices in the exploitation of wind energy resources.
- iv. The nation shall encourage the utilization of wind energy for agricultural purposes.

6.3.2 Objectives

- i. To develop wind energy as an alternative energy resource.
- ii. To develop local capability in wind energy technology.
- iii. To use wind energy for provision of power to rural areas and remote communities far removed from the national grid.
- iv. To apply wind energy technology in areas where it is technically and economically feasible.
- v. To encourage the utilization of wind energy for agricultural purpose.

6.3.3 Action Plan

Table 6.7: Wind Energy Development Plan

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(i) Encouraging research and development in wind energy utilization.</i>	(a) Identifying and embarking on appropriate R&D activities.	ECN, FMSTI	RCs, RIs, TIs, NiMet, DPs, NASENI	FGN (ECN, FMSTI)	*	*	*
	(b) Introducing competitive research grants based on the best innovative wind energy technology proposals/designs.	FMSTI, ECN, NASENI	TETFUND, FMEd., OPS, FMP, FMIT&I, FMFBNP, RCs, RIs, TIs, DPs, NUC	FGN (PTDF, TETFUND), OPS	*	*	
	(c) Organizing national and international conferences, workshops and short courses.	ECN, FMSTI, NASENI	FMP, NASENI, NiMet, OPS	FGN (ECN, FMSTI)	*	*	
<i>(ii) Developing skilled manpower for provision of basic engineering infrastructure for the local production of components and spare parts of wind power systems.</i>	(a) Building indigenous capacity in design and development of turbines, blades, towers etc.	NASENI, ECN, FMSTI	ECN, NBTE, FMP, DICON, RCs, RIs, TIs OPS, DPs	FGN(ECN, FMSTI, NASENI), OPS	*	*	*
	(b) Identifying and assessing existing infrastructure, skills and knowledge gaps.	ECN, FMSTI	NASENI, FMP, RCs, RIs, TIs, OPS, DPs	FGN (ECN, FMSTI)	*	*	*
	(c) Introducing appropriate programmes in existing national energy institutions to address identified infrastructure, skills and knowledge gaps in (b) above.	NAPTIN, ECN, FMSTI	FMEd., NUC, NBTE, RCs, RIs, TIs, OPS, NASENI	FGN (NAPTIN)	*	*	*
	(d) Encouraging linkages between tertiary institutions, research institutes and centres with excellence in wind energy technologies.	ECN, FMSTI	FMEd., RCs, RIs, TIs, OPS, NASRDA, NASENI	FGN (ECN, FMSTI)	*	*	*
<i>(iii) Intensifying work in wind data acquisition and development of wind maps.</i>	(a) Establishing more Meteorological stations across the country.	NiMet	OPS, DPs, FMSTI, ECN, RCs, RIs, TIs	FGN (NiMet) DPs, OPS	*	*	*
	(b) Expanding the on-going national wind mapping programme to cover the whole country.	ECN, FMSTI	NiMet, FMP, DPs, OPS, NBS	FGN (FMSTI), OPS, DPs	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE

	(c) Acquiring appropriate ICT facilities for processing and documenting wind energy information system.	ECN	FMSTI, NiMet, NBS, FMCT, FMP, DPs, OPS	FGN (ECN), OPS, DPs	*	*	*
	(d) Developing national data base on the acquired information on wind energy resources and systems.	ECN, FMSTI	NiMet, NBS, FMP, DPs, OPS	FGN (ECN), OPS, DPs	*	*	*
<i>(iv) Training of skilled local craftsmen to ensure the operation and maintenance of wind energy systems.</i>	(a) Training local experts on fabrication, installations, utilization, maintenance and safety of wind energy systems.	ECN	NASENI, FMSTI, TIs, RIs, RCs, NAPTIN	FGN (ECN), OPS, DPs	*	*	*
	(b) Executing and commissioning of wind energy pilot projects.	ECN, FMSTI	FMP, NASENI, TIs, RIs, RCs	FGN (ECN, FMSTI)	*	*	*
<i>(v) Providing appropriate incentives to producers, developers and consumers of wind power systems.</i>	(a) Providing fiscal incentives such as suspension of import duty, tax holiday, investment grants, operational grants, etc.	NCS, FIRS, BOI	NIPC, FMP, FMIT&I, FMFBNP, OPS, CBN, NERC	FGN (FIRS, BOI), OPS	*	*	*
	(b) Encouraging local and foreign investors to establish factories for production of major components of wind energy systems (e.g. wind turbines, blades, deep cycle batteries, charge controllers).	NIPC	ECN, FMSTI, BOI, NASENI, FMP, FMIT&I, FMFBNP, OPS	FGN (NIPC, ECN), OPS	*	*	*
	(c) Providing market incentives for wind energy systems.	NIPC	ECN, FMSTI, FMP, REA, OPS, FMFBNP, FMIT&I, NERC	FGN (NIPC), OPS	*	*	*
	(d) Establishing Renewable Energy Fund.	FMSTI, ECN	OPS, DPs, FMFBNP, FMP, NERC	FGN (FMSTI)	*	*	*
<i>(vi) Developing extension programmes to facilitate the general use of wind energy technology.</i>	(a) Conducting public enlightenment through workshops, seminar, lectures etc.	ECN, FMSTI	DPs, FMP, REA, NGOs, CBOs, FMWA&SD, NASENI, FMA&RD	FGN (ECN, FMSTI), OPS, DPs	*	*	*
	(b) Designing and sponsoring publicity through the print and electronic media.	ECN, FMI	NOA, FMSTI, DPs, NGOs, CBOs	FGN (ECN, FMI), OPS, DPs	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
	(c) Building human capacity on the installation, utilization, maintenance and safety of wind energy systems.	ECN, NASENI, NAPTIN	FMSTI, FMP, RCs, RIs, TIs, FMWA&SD	FGN (ECN, NASENI, NAPTIN), OPS, DPs	*	*	*
<i>(vii) Developing local capability through the establishment of local manufacturing in the area of wind energy technology.</i>	(a) Identifying and developing indigenous capacities in the design, development, installation and maintenance of wind energy technologies.	FMSTI, ECN, NASENI	FMP, NAPTIN, OPS, RCs, RIs, TIs, DPs	FGN(ECN, FMSTI, NASENI), OPS	*	*	*
<i>(viii) Development of wind data acquisition for wind farm development.</i>	Acquisition (gathering) of Wind data in selected areas with high potentials	ECN, FMSTI	ECN, NiMet, FMSTI	FGN (ECN, FMSTI)	*	*	*

6.4 HYDROGEN

6.4.1 Policy

- i. The nation shall integrate hydrogen as an energy source in the energy mix of the country.

6.4.2 Objectives

- i. To keep abreast of international trends in hydrogen production and application.
- ii. To develop local production capacity for hydrogen.
- iii. To ensure hydrogen utilization as a preferred energy source, where possible, on account of its high environmental friendliness.

6.4.3 Action Plan

Table 6.8: Hydrogen Development Plan

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(i) Encouraging research and development in hydrogen energy related technologies.</i>	(a) Identifying existing hydrogen fuel technologies in the world.	ECN, FMSTI	RCs, RIs, TIs	FGN (ECN, FMSTI)	*	*	
	(b) Establishing focal points for Hydrogen fuel R&D within existing institutions.	ECN, FMSTI	RCs, RIs, TIs	FGN (ECN, FMSTI)	*	*	*
	(c) Identifying and embarking on appropriate R&D in hydrogen technologies in the country.	ECN, FMSTI	RCs, RIs, TIs	FGN (ECN, FMSTI)	*	*	*
	(d) Introducing competitive research grants based on the best hydrogen R&D design and proposals.	ECN, FMSTI	FMed., NUC, NBTE, NCCE, FMSTI, RIs, RCs, TIs, DPs, TETFUND	FGN (ECN, FMSTI)	*	*	
<i>(ii) Developing domestic capacity in hydrogen production and application technologies.</i>	(a) Organizing and participating at national and international workshops, conferences and short courses.	ECN	FMSTI, RCs, RIs, TIs, OPS, DPs	FGN (ECN), OPS, DPs	*	*	*
	(b) Encouraging post-graduate training at national and international institutions specializing in hydrogen and fuel cell technologies.	FMed.	ECN, NUC, FMSTI, RCs, RIs, TIs, OPS, DPs	FGN (ECN, FMed.), DPs	*	*	*
	(c) Developing and creating market for hydrogen energy.	NIPC	FMSTI, ECN, OPS, DPs, NBTI	FGN (NIPC), DPs OPS	*	*	*
	(d) Acquiring and installing state of the art training facilities for the production of hydrogen and fuel cells at the focal centres.	ECN	FMSTI, RCs, RIs, TIs, TETFUND, DPs, OPS, NOTAP,	FGN (ECN), TETFUND, OPS, DPs	*	*	*
<i>(iii) Providing incentives to popularize the use of hydrogen as an energy source.</i>	(a) Estimating hydrogen energy resource base.	ECN, FMSTI	FMIT&I, NBS, RCs, RIs, TIs, DPs	FGN (ECN, FMSTI), DPs	*	*	*
	(b) Estimating the percentage of energy demand that can be met through hydrogen fuel and fuel cells.	ECN	RCs, RIs, TIs, FMSTI, DPs	FGN (ECN), DPs	*	*	*
	(c) Developing and promoting market for hydrogen energy systems.	NIPC, ECN	FMSTI, OPS, DPs, NOTAP, NBTI	FGN(ECN, NIPC)	*	*	*
	(d) Providing market incentives, such as tax holidays, duty waivers, pioneer status, for hydrogen energy systems and fuel cells.	NCS, FIRS, NIPC	OPS, NOTAP, FMFBNP, CBN	FGN (FMFBNP, NCS, CBN)	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE

<i>(iv) Embarking on intensive awareness and sensitization campaign</i>	Awareness creation and sensitization on Hydrogen energy	ECN, FMSTI	RCs, RIs, TIs	FGN (ECN, FMSTI)	*	*	*
<i>(v) Building indigenous capacity</i>	Local and international training on hydrogen energy	ECN, FMSTI	FMBNP, FMIT&I, NIPC, DPs, OPS	FGN (ECN, FMSTI)	*	*	*
<i>(vi) Targeting the use of hydrogen in transportation.</i>	(a) Conducting feasibility studies on the use of hydrogen for transportation in Nigeria	ECN	ECN, NADDC	FGN (ECN, FMSTI)	*	*	*
	(b) Building local capacity for the use of hydrogen in the transport sector	ECN	ECN, NADDC		*	*	*
<i>(vii) Promoting automation and standardization requirement to scale up hydrogen systems.</i>	Advocacy on hydrogen as a fuel for transportation	ECN, FMSTI	FMT, NADDC	FGN (ECN, FMSTI)	*	*	*

6.5 Other Renewables (Geothermal, Ocean, Tidal, Wave, etc.)

6.5.1 Policies

- i. The nation shall maintain an interest in other emerging sources of renewable energy.

6.5.2 Objectives

- i. To develop a database on the potentials of these emerging energy resources.
- ii. To keep abreast of international trends in energy technology development.
- iii. To ensure incorporation of any new proven cost-effective energy resource into the energy mix.

6.5.3 Action Plan

Table 6.9: Other Renewable Energy Sources Development Plan

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(i) Gathering and disseminating information on the development of these emerging technologies.</i>	(a) Identifying emerging renewable energy technologies both nationally and international.	ECN, FMSTI	DPs, NASENI, RCs, RIs, TIs, RMRDC	FGN (ECN, FMSTI)	*	*	*
	(b) Identifying and quantifying the national resource base for each other renewable energy source.	ECN, FMSTI	FMP, OPS	FGN (ECN, FMSTI)	*	*	*
<i>(ii) Encouraging research and development in the technologies of the exploitation of these emerging energy resources.</i>	(a) Establishing focal points for R&D for identified viable emerging technologies within existing institutions.	ECN, FMSTI	NASENI, RCs, RIs, TIs	FGN (ECN)	*	*	*
<i>(iii) Prioritizing the level of need, level of technological development and viability of emerging renewable energy resources.</i>	(a) Assessing the potentials of emerging technologies and prioritizing them according to national energy needs.	ECN, FMSTI	NASENI, RCs, RIs, TIs	FGN (ECN, FMSTI)	*	*	*

CHAPTER SEVEN

BIO-ENERGY

7.0 Introduction

The abundant energy available from bio-energy can be meaningfully introduced into the nation's energy mix through the development of a comprehensive programme. The programme should encompass fully supported research, development, demonstration and manpower training components.

Biomass is a non-fossil material of biological origin. The biomass resources of Nigeria can be identified as wood, forage grasses and shrubs, animal wastes and wastes arising from forestry, agricultural, municipal and industrial activities, as well as aquatic biomass. The biomass energy resources of the nation have been estimated to be significant.

Fuel wood is solid plant biomass that is used for household heating and cooking. Plant biomass can be used as fuel in thermal power plants or converted to produce solid briquettes, which can then be utilized as fuel for small-scale industries. Biogas digesters of various designs are capable of sustaining household, industrial and institutional energy needs. It has indeed been shown that the remaining biomass material after digestion is a better fertilizer than the original waste. The intensive application of this will reduce the existing heavy reliance on chemical fertilizers.

7.1 BIOMASS

7.1.1 Policies

- i. The nation shall effectively harness non-fuel wood biomass energy resources and integrate them with other energy resources.
- ii. The nation shall promote the use of efficient biomass conversion technologies.
- iii. The nation shall improve measures required to support a greater degree of efficient forest thinning, and to enhance collection and use of forest residues.
- iv. The nation shall enhance the demand side measures that support the use of biomass for the production of renewable energy.
- v. The nation shall undertake the life cycle analysis of all biomass feedstock to determine their relative climate change benefits.
- vi. The nation shall undertake a comprehensive mapping of agro-ecological suitability for energy crops for the purpose of obtaining a regional view of production potentials and contribute to decision making on support for handling and/or processing facilities.
- vii. The nation shall incorporate waste-to-energy strategy in its overall waste management framework.

7.1.2 Objectives

- i. To promote biomass as an alternative energy resource especially in the rural areas.
- ii. To promote efficient use of agricultural residues, animal and human wastes as energy sources.
- iii. To reduce health hazards arising from combustion of biomass fuel.
- iv. To focus biomass utilization close to production, for community heating schemes and domestic heating, particularly off the national grid network.

7.1.3 Action Plan

Table 7.1: Biomass Development Plan

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(i) Developing extension programmes to facilitate the general use of new biomass energy technologies.</i>	(a) Developing and siting of appropriate pilot and demonstration schemes.	ECN, FMSTI	NGOs, DPs, RCs, RIs, TIs, FMEnv., OPS	FGN (ECN, FMSTI), OPS, DPs	*	*	*
	(b) Conducting public enlightenment through workshops, seminar, lectures etc.	ECN, FMSTI	NGOs, DPs, RCs, RIs, TIs, FMEnv.	FGN (ECN)	*	*	*
	(c) Designing and sponsoring publicity through the print and electronic media.	ECN, FMSTI	NOA, NGOs, DPs, RCs, RIs, TIs, FMEnv.	FGN (ECN)	*	*	*
	(d) Training extension workers on the applications, installation, and maintenance of biomass energy technologies.	ECN, PRODA	FMSTI, RCs, RIs, TIs, SGs, LGs, DPs, OPS, NGOs, FMEnv.	FGN (ECN, PRODA)	*	*	*
<i>(ii) Promoting research and development in biomass energy technology.</i>	(a) Assessing and reviewing available biomass technologies in the world with the view of adapting and adopting the technologies..	ECN, FMSTI, PRODA, NASENI	RCs, RIs, TIs, FMA&RD, FMWA&SD, OPS, DPs, FMP, NNPC, RMRDC, ARCN	FGN (ECN, FMSTI, PRODA, TETFUND)	*	*	*
	(b) Identifying suitable technologies and embarking on intensive R&D activities.	ECN, FMSTI, FMA&RD	NASENI, TIs, RIs, RCs, OPS, RMRDC	FGN (ECN, FMSTI, TETFUND), OPS	*	*	*
	(c) Instituting national and international fairs on innovative designs and models.	ECN, FMSTI	NASENI, FMEd., RCs, RIs, TIs, OPS, MFA, FMP, NNPC, FMEnv, RMRDC	FGN (ECN, FMSTI, TETFUND), OPS	*	*	*
	(d) Encouraging collaboration between tertiary institutions, research institutes and centres with OPS.	ECN	FMEd., RCs, RIs, TIs, OPS, FMEnv., FMSTI, RMRDC, ARCN	FGN (ECN, FMSTI, TETFUND)	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
	(e)Producing and field-testing of R & D results on biomass technologies.	ECN, PRODA	RCs, RIs, TIs, OPS, NOTAP, FMA&RD, FMSTI	FGN (ECN, PRODA, TETFUND)	*	*	*
	(f) Encouraging commercialization of biomass R & D results.	FMSTI, NOTAP	RCs, RIs, TIs, OPS, NBTI, FMIT&I, FMA&RD, SMEDAN	FGN (ECN, NOTAP)	*	*	*
<i>(iii) Establishing pilot projects for the production of biomass energy conversion devices and systems.</i>	(a) Identifying and selecting appropriate sites for biomass briquette pilot projects.	ECN, FMSTI	RCs, RIs, NGOs, FMA&RD, FMEnv., OPS, NARICT	FGN (FMSTI, ECN), OPS	*	*	
	(b) Scaling up, executing and commissioning of the pilot projects.	ECN, FMSTI	RCs, RIs, NGOs, FMEnv.	FGN (FMSTI, ECN), OPS	*	*	
	(c) Establishing local management and maintenance strategies for the pilot projects.	ECN, FMSTI, SGs, LGs	SGs, LGs, CBOs, NGOs, DPs, RIs, RCs, TIs	FGN (FMSTI, ECN)	*	*	*
<i>(iv) Providing adequate incentives to local entrepreneurs for the production of biomass energy conversion systems.</i>	(a) Providing tax break as incentives to encourage local production of biomass energy systems.	FIRS, NIPC	FMIT&I, ECN, SMEDAN, NGOs, FMFBNP, OPS	FGN (NIPC, ECN)	*	*	*
	(b) Providing financial incentives at a reduced interest rate for the scaling up of viable biomass businesses.	BOI, BOA	FMA&RD, FMFBNP, FMIT&I, OPS, FMEnv.	FGN (BOI, BOA, CBN)	*	*	
<i>(v) Training of skilled manpower for the maintenance of biomass energy conversion systems</i>	(a) Identifying and assessing of, skills and knowledge gaps.	ECN, NNPC, RMRDC	RCs, RIs, TIs , FMSTI, NBS	FGN (ECN) OPS, DPs	*	*	
	(b) Introducing appropriate programmes to address skills and knowledge gaps in (a) above.	ECN, NAPTIN	FMed., RCs, RIs, TIs, OPS, DPs , FMSTI	FGN (ECN)	*	*	
	(c) Training local personnel and end users on installation, utilization, maintenance and safety of biomass systems.	ECN, PRODA	NGOs, DPs, OPS, NDE, FMSTI,NAPTIN	FGN (ECN, PRODA, NAPTIN)	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE

<i>(vi) Developing skilled manpower and providing basic engineering infrastructure for the local production of components and spare parts for biomass systems.</i>	(a) Building indigenous capacity in the design, development, and fabrication of biomass systems.	ECN, PRODA, NAPTIN, NASENI	FMIT&I, FMFBNP, FMSTI, FMA&RD, FMEnv., NCAM	FGN (ECN, PRODA), OPS	*	*	*
	(b) Encouraging local investors to establish small and medium scale industries for manufacturing efficient burners, briquetting machines, etc.	NIPC, NOTAP	SMEDAN, FMIT&I, OPS, ECN, FMEnv.	FGN (NIPC)	*	*	
	(c) Establishing linkages between tertiary institutions, research institutes and centres of excellence (national and international) on biomass technologies.	ECN, MFA, FMEd.	DPs, , RCs, RIs, TIs, FMA&RD, NOTAP, FMEnv. ARCN	FGN (ECN, MFA)	*	*	
	(d) Encouraging graduate and postgraduate training in national and international energy institutions on RET.	ECN, FMEd.	NUC, NBTE, OPS, FMSTI, RCs, RIs, TIs, FMA&RD	FGN (ECN, FMEd.)	*	*	*
	(e) Encouraging the use of local materials for the production of components and parts for biomass systems.	ECN, FMEnv.	SMEDAN, SON, FMIT&I	FGN (ECN, FMEnv.), OPS	*	*	
<i>(vii) Promoting electricity and heat generation from biomass waste.</i>	(a) Reviewing periodically feed in tariff for biomass based electricity.	NERC	FMP, ECN, NARICT	FGN (NERC)	*	*	*
	(b) Putting in place regulation and standards on biomass technology for energy generation.	ECN, FMSTI, SON, NERC	FMP, ECN, OPS	FGN (ECN, SON)	*	*	
	(c) Installing suitable biomass conversion technologies at waste disposal sites.	ECN, FMENV	FMEnv., OPS	FGN (FMEnv.)	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(viii) Mainstreaming waste-to-energy strategy in the overall waste management framework.</i>	(a) Conducting waste to energy technology needs assessment.	FMSTI, ECN, FMEEnv.	FMEEnv., OPS, ARCEN	FGN (FMSTI, ECN), OPS	*	*	*
	(b) Promoting the adoption of appropriate waste to energy technologies .	ECN, FMSTI, FMEEnv.	FMEEnv., FMP, OPS, FMA&RD	FGN (FMSTI, ECN), OPS	*	*	*
	(c) Creating awareness on the potential of waste as an energy resource through workshops, conferences etc .	ECN, FMSTI, FMEEnv.	FMEEnv., FMP, OPS, CSOs, NGOs	FGN (ECN)	*	*	*
	(d) Promoting waste sorting programmes in major cities.	FMEEnv.	NESREA, SGs, EPAs, LGs, OPS, NGOs	FGN(FMEEnv.), SGs	*	*	*
<i>(ix) Promoting the production of biomass sources across the ecological zones of Nigeria for sustainable biomass technology production.</i>	(a) Developing mechanism to mobilize investors through financial incentives for the biomass production.	FMEEnv., ECN, NGOs, SGs, LGs, FMFBNP, NNPC, FMA&RD	RIs, RCs, OPS, TIs	FGN (FMEEnv.), FMA&RD	*		
	(b) Promoting the establishment of more biomass specific professional and industry associations.	FMFBNP, ECN, NNPC,	RCs, OPS	PTDF, NNPC,	*		
	(c) Identifying the fast growing indigenous plant species	FMA&RD, FMEEnv., FRIN, LGs,	NGOs, OPS	FGN(FMA&RD), DPs	*		
<i>(x) Adopting measures to ensure that biomass is converted to energy in an efficient manner to maximize its benefit while at the same time to ensure that biomass is produced in a sustainable way.</i>	(a) Establishment of small scale industries for the design and production of improved bioenergy plants and systems.	ECN, NASENI,	BOI, BOA, OPS	FGN (FMEEnv.), FMA&RD,		*	
	(c) Establishment of briquetting plants for the particle of biomass.	NNPC, ECN, FMEEnv., LGs, SGs, FMA&RD	NGOs, OPS,	FGN (ECN)	*		

7.2 FUELWOOD

7.2.1 Policies

- i. The nation shall promote the use of alternative energy sources to fuelwood.
- ii. The nation shall promote improved efficiency in the use of fuelwood.
- iii. The nation shall de-emphasize the use of wood as a fuel in the nation's energy mix.
- iv. The nation shall intensify efforts to increase the percentage of land mass covered by forests in the country.
- v. The nation shall ensure that harvested areas are regenerated.
- vi. The nation shall promote the commercial growing of fuel wood.
- vii. The nation shall promote energy conservation.

7.2.2 Objectives

- i. To conserve the forest resources of the nation.
- ii. To greatly reduce the percentage contribution of fuelwood consumption in the domestic, agricultural and industrial sectors of the economy.
- iii. To mitigate the ecological problems of desert encroachment, soil erosion and deforestation.
- iv. To facilitate the use of alternative energy resources to fuelwood.
- v. To reduce health hazards arising from fuelwood combustion.
- vi. To invest in community education/sensitization regarding benefit and disadvantages of using wood for energy.
- vii. To ensure that forest greenhouse gas balance is maintained.

7.2.3 Action Plan

Table 7.2: Fuelwood Development Plan

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(i) Cultivating improved and fast growing tree species needed to accelerate the regeneration of forests.</i>	(a) Identifying non-invasive fast growing indigenous tree species.	ECN, NIFOR, RRIN, CRIN	FMSTI, FMA&RD, ARCN, FMEnv.	FGN (ECN, FMA&RD)	*	*	*
	(b) Identifying & sourcing suitable foreign fast growing tree species.	RRIN, CRIN, NIFOR	FMA&RD, FMSTI, FMEnv., ARCN.	FGN (ECN, FMA&RD, NARIs)	*	*	*
	(c) Developing nurseries and intensifying the cultivation of plantation of fast growing trees/plants.	NABDA, RRIN, CRIN	FMSTI, RCs, RIs, TIs, FMA&RD, FMEnv., ARCN	FGN (FMA&RD, FMEnv., NABDA, NARIs)	*	*	*
	(d) Developing indigenous human and institutional capacities in the genetic manipulation of fast growing tree/plantspecies.	FMEnv., RRIN, NIFOR, CRIN, NABDA	FMSTI, FMA&RD, ARCN, RCs, NARIs, TIs	FGN (FMEnv, NABDA), DPs	*	*	*
	(e) Establishing more shelter belts in the semi-arid frontal states and woodlots in the buffer states.	FMEnv., SGs	FMSTI, FMA&RD, DPs, RCs, RIs, TIs	FGN(FMEnv.), SGs, DPs	*	*	*
<i>(ii) Improving on appropriate technologies for the utilization of alternative energy sources to fuelwood.</i>	(a) Developing indigenous capacity in the design, development, installation and maintenance of Renewable Energy Technologies.	ECN, NOTAP, NASENI	FMP, FMEnv., FMSTI, RCs, RIs, TIs, FMWA&SD, NGOs	FGN (ECN, NOTAP, NASENI), OPS	*	*	*
	(b) Identifying and developing appropriate R&D activities.	FMSTI, ECN	FMEnv., FMWA&SD, NASENI, NABDA, RCs, RIs, TIs	FGN (FMSTI, ECN), OPS	*	*	*
<i>(iii) Improving appropriate efficient wood stoves in the short term.</i>	(a) Building indigenous capacity in the design, development, installation and maintenance of efficient wood stoves and briguetting machines.	ECN	FMSTI, NGOs, FMWA&SD, FMEnv., NAPEP, SGs, RCs, RIs, TIs, NBTE	FGN (ECN, NAPEP)	*	*	*
	(b) Identifying, and embarking on relevant R&D activities.	ECN	FMed., FMSTI, NGOs, FMWA&SD, FMEnv., NAPEP, SGs, TIs, RIs, RCs,	FGN (ECN, NAPEP)	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(iv) Encouraging the establishment of private and community woodlots for supply of fuelwood in the short term.</i>	(a) Developing and siting of woodlot Pilot schemes.	ECN, FMA&RD, FMEnv.	SGs, LGs, CBOs	FGN (ECN, FMA&RD)	*	*	
	(b) Sensitizing and mobilizing CBOs and NGOs.	ECN	FMEnv., SGs, LGs, FMA&RD, DPs, CBOs, NGOs	FGN (ECN, FMA&RD)	*	*	
<i>(v) Establishing micro-credit facilities for entrepreneurs, especially for women groups, for the establishment and operation of commercial fuelwood lots and the production of renewable energy devices and systems.</i>	(a) Encouraging the establishment of CBOs and NGOs, especially women-based.	FMEnv.	NPC, SGs, LGs, FMA&RD, ECN, DPs, CBOs, NGOs, SMEDAN, NDE	FGN(FMEnv.), DPs	*	*	*
	(b) Establishing adequate and appropriate micro-credit facilities.	SMEDAN, FMWA&SD	SGs, LGs, FMA&RD, ECN, FMEnv., DPs, CBOs, NCWD	FGN (SMEDAN, FMWA&SD), DPs	*	*	*
	(c) Ensuring easy and regular access to micro-credit facilities.	SMEDAN, FMWA&SD	SGs, LGs, FMA&RD, ECN, FMEnv., DPs, CBOs, NCWD	FGN (FMWA&SD)	*	*	*
	(d) Building indigenous women capacity in the design, development and fabrication of RET devices and systems.	ECN, FMWA&SD	FMSTI, OPS, SGs, LGs, FMA&RD, FMEnv., DPs, CBOs, NCWD	FGN(ECN, FMWA&SD), DPs	*	*	*
	(e) Sensitizing the public especially women on available relevant micro credit facilities.	ECN, FMWA&SD	NCWD, CBOs, NGOs, DPs, SMEDAN	FGN (ECN, FMWA&SD), DPs	*	*	*
	(f) Encouraging local entrepreneurship in RET.	ECN, SMEDAN	FMWA&SD, NCWD, CBOs, NGOs, DPs	FGN (ECN, SMEDAN), DPs	*	*	*
<i>(vi) Ensuring the availability and effective distribution of alternative energy sources to fuelwood at all times.</i>	(a) Identifying viable RE alternatives.	ECN	OPS, DPs, FMSTI, RCs, RIs, TIs	FGN (ECN)	*	*	
	(b) Ensuring mass Production and diffusion of the identified alternative RET.	ECN	FMIT&I, SMEDAN, OPS, TIs, RCs, RIs, DPs, FMSTI	FGN (ECN, FMIT&I)	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(vii) Establishing training programmes on the use, maintenance and fabrication of efficient woodstoves and other alternative technologies.</i>	(a) Conducting training and sensitization workshops with appropriate monitoring & evaluation mechanism to assess effectiveness.	ECN	NDE, FMSTI, FMWA&SD, RCs, RIs, TIs	FGN (ECN), OPS	*	*	*
	(b) Incorporating RET into the educational curricula at all levels.	FMed., ECN, NERDC	NUC, NBTE, NCCE	FGN (FMed., ECN)	*	*	*
<i>(viii) Organizing systematic public enlightenment campaigns on the problems of desertification and soil erosion arising from deforestation.</i>	(a) Conducting public awareness workshops, seminars, lectures etc.	ECN, FMEnv.	FMA&RD, FMWA&SD, NGOs, CBOs, RCs, RIs, TIs, FMI, NOA	FGN (FMEnv., ECN)	*	*	*
	(b) Sponsoring publicity in electronic and print media.	FMEnv., ECN	FMA&RD, FMWA&SD, NOA, NGOs, CBOs, OPS, DPs, SGs, LGs	FGN (FMEnv., ECN)	*	*	*
	(c) Continuing the national tree planting campaign.	FMEnv., FMA&RD	ECN, SGs, LGs, NGOs, CBOs, DPs	FGN (FMEnv.), DPs	*	*	*
<i>(ix) Ensuring the existence of effective forestry laws to stop the willful felling of trees.</i>	(a) Reviewing and strengthening the relevant forestry laws.	FMEnv.	FMA&RD, LGs, FMWA&SD, FMJ, ECN, NASS, SGs	FGN (FMEnv.)	*	*	
<i>(x) Ensuring effective enforcement of the forestry laws.</i>	(a) Providing adequate facilities and motivation for relevant forestry personnel for effective enforcement of the laws.	FMEnv.	FMA&RD, FMJ, NGOs, CBOs, SGs, LGs, DPs	FGN (FMEnv.)	*	*	*
<i>(xi) Disseminating the alternative technologies to fuelwood through extension programmes, pilot plants, etc.</i>	(a) Siting of appropriate demonstration schemes on the alternative technologies .	ECN	FMA&RD, FMEnv., FMWA&SD, NGOs, CBOs, DPs, OPS	FGN (ECN), OPS, DPs	*	*	*
	(b) Conducting public enlightenment workshops, seminar, lectures etc.	ECN	FMA&RD, FMEnv., NOA, NGOs, CBOs, FMWA&SD, DPs	FGN (ECN), DPs	*	*	*
	(c) Sponsoring Publicity through the print and electronic media.	ECN	FMA&RD, FMEnv., FMWA&SD, NOA, NGOs, CBOs, DPs	FGN (ECN), DPs	*	*	*
	(d) Training extension workers on the applications, installation, and maintenance of RET.	ECN	FMA&RD, FMEnv., FMWA&SD, NGOs, CBOs, DPs	FGN (ECN), DPs	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(xii) Increasing the area covered by forest reserves.</i>	(a) Creating nurseries across the country.	FMEnv., FMA&RD, NARIs	DPs, RCs, RIs, TIs, Ecological Fund, LGs	FGN (FMEnv., FMA&RD), OPS, DPs	*	*	*
<i>(xiii) Improving an effective system of forest regeneration.</i>	(a) Creating and maintaining nurseries.	FMEnv., FMA&RD, NARIs	DPs, RCs, RIs, TIs, Ecological Fund, LGs	FGN (FMEnv., FMA&RD), OPS, DPs	*	*	*
	(b) Replacing aging trees regularly.	FMEnv.	FMA&RD, DPs, RCs, RIs, Ecological Fund, LGs	FGN (FMEnv.), OPS, DPs	*	*	*
<i>(xiv) Developing an appropriate pricing structure to encourage substitution from fuelwood to alternative fuel types.</i>	(a) Developing and promoting Market for RET.	ECN	NIPC, SMEDAN, FMEnv., FMFBNP, FMWA&SD	FGN (ECN)	*	*	*
	(b) Providing appropriate incentives for the utilization of alternative fuel types.	ECN, NIPC	FMEnv., FMFBNP, FMWA&SD, DPs	FGN (ECN), DPs	*	*	*
<i>(xv) Establishing the production of renewable energy devices and systems.</i>	(a) construction of briquetting plants for fine particle of biomass	NNPC, ECN, FMEnv, FMA&RD, SGs	NGOs, DPs, LGs, OPS	FGN, OPS, DPs,	*		
	(b) Develop local capacity for large scale production of renewable energy devices	OPS, FMEnv, FMA&RD, NASENI	DPs, LGs, SGs,	FGN, OPS, DPs	*		
	(c) Promoting the development of energy efficient charcoal production technologies	ECN	FME, OPS, LGs, SGs,	FGN, OPS, DPs			
<i>(xvi) Advancing the development of alternative fuel wood technologies.</i>	(a) Encouraging local and foreign investors to establish factories for production of components for renewable devices	ECN, FMSTI, FMFBNP, NIPC	LGs, SGs, NGOs	FGN, OPS, DPs,	*		

7.3 BIOFUELS

7.3.1 Policies

- i. The nation shall improve on the link between the agricultural sector and the energy sector.
- ii. The nation shall promote the blending of biofuels as a component of fossil-based fuels in the country as required for all automotive use. The blend shall involve the process of upgrading fossil-based fuels.
- iii. The nation shall promote investments in the biofuels industry.
- iv. The nation shall grant biofuels pioneer status for an initial 10-year period with the possibility of additional 5-year extension.
- v. The nation shall support the emergence of an industry in which substantial portion of feedstock used by biofuel plants will be produced by large – scale producers and out growers.
- vi. The nation shall ensure that biofuel industry benefit from carbon credit.

7.3.2 Objectives

- i. To gradually reduce the nation’s dependence on fossil fuels while at the same time creating a commercially viable industry that can precipitate sustainable domestic job.
- ii. To gradually reduce environmental pollution.
- iii. To firmly establish a thriving biofuel industry utilizing agricultural products as a means of improving the quality of automotive fossil-based fuels in Nigeria.
- iv. To promote job creation, rural and agricultural development, and technology acquisition and transfer.
- v. To provide a framework capable of attracting foreign investment in the biofuels industry.
- vi. To streamline the roles of various tiers of government in order to ensure an orderly development of the biofuels industry in Nigeria.
- vii. To involve the oil and gas industry in the development of biofuels in Nigeria.

7.3.3 Action Plan

Table 7.3: Biofuels Development Plan

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(i) Encouraging integrated (plants and plantations) biofuels operators to set up agricultural service companies to support out – growers scheme.</i>	(a) Collaborating with farmers associations/ cooperatives to set up agricultural service companies.	ECN, FMA&RD	NNPC, NGOs, CBOs, DPs, RCs, RIs, TIs, FMEnv., OPS, BPE, AFAN	FGN (ECN, FMA&RD), OPS, DPs	*	*	*
	(b) Providing incentives for agricultural service companies eg soft loans, tax holidays, duty waivers etc.	FMA&RD, BOA, NIPC	OPS, NNPC, FMFBNP, NCS, FIRS, FMIT&I	FGN (BOA, FMA&RD, NIPC)	*	*	*
<i>(ii) Mandating biofuel producers to establish public private partnership with biofuels feedstock out – growers.</i>	(a) Registering all feedstock outgrowers as a means of enhancing partnership.	ECN, FMA&RD	FMSTI, AFAN, NGOs, RCs, RIs, TIs, FMEnv., OPS, NIPC, BPE, NNPC	FGN (ECN, FMA&RD), OPS	*	*	*
	(b) Setting minimum technical know-how for due diligence on potential Biofuel partners.	FMIT&I, ECN, SON	FMSTI, NGOs, RCs, RIs, TIs, FMEnv., OPS, NIPC, BPE, FMA&RD, NNPC	FGN (ECN, FMIT&I, SON)	*	*	*
	(c) Ensuring regulatory / legal safeguards for PPP and equitable level of profit repatriation.	FIRS, CBN	FMJ, FMSTI, ECN, OPS, NIPC, BPE, FMA&RD, FMFBNP, NOTAP	FGN (FIRS, CBN)	*	*	
<i>(iii) Facilitating easy market entry for intending biofuel operators through supportive regulations on biofuel activities.</i>	(a) Implementing policy guidelines , procedures and regulating the supply, distribution and use of biofuels for automotive consumption.	NUPRC, NNPC	ECN, OPS, SON	FGN (NNPC), OPS	*	*	*
	(b) Initiating the Bill for Biofuels use mandate in Nigeria.	ECN, FMSTI, NNPC	NASS, FMJ, MPR, NMDPRA, NUPRC, SON	FGN (ECN, FMSTI)	*	*	
	(c) Supporting land acquisition and utilization.	ECN, FMSTI	FMA&RD, FMWH, SGs	FGN (ECN, FMSTI)	*	*	

	(d) Enacting and enforcing Biofuels usage Act Mandate on use of E5, E10, B10 and B20 in Nigeria.	NUPRC, FMJ	NASS, SON, ECN, NNPC	FGN (NUPRC, FMJ)	*	*	*
STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
	(e) Developing appropriate pricing mechanism for biofuels and biofuels blended petroleum liquid fuels.	NMDPRA	NNPC, OPS, MPR, NUPRC, FMFBNP	FGN (MPR, NMDPRA)	*	*	
	(f) Preparing biofuels purchase agreement framework to ensure fair margin to producers and blenders.	NMDPRA	NNPC, OPS, MPR, NUPRC, FMFBNP	FGN (MPR, NMDPRA)	*	*	
	(g) Creating awareness on the benefits of biofuels to the economy.	ECN, NNPC	MPR, FMSTI, NASS, MDAs	FGN (ECN, NNPC)	*	*	
<i>(iv) Granting pioneer status-tax holiday to all registered businesses engaged in biofuels related activities.</i>	(a) Identifying all registered businesses engaged in activities related to biofuels production.	MPR, FMA&RD, ECN	SMEDAN, OPS, FMFBNP, NNPC, FMIT&I, NIPC	FGN (MPR, ECN, FMA&RD)	*	*	*
	(b) Maintaining a database of all registered biofuel companies.	NUPRC, ECN	NBS, SMEDAN, OPS, CAC, NNPC, FMIT&I	FGN (NUPRC, NBS, ECN)	*	*	
	(c) Developing simplified procedures for granting pioneer status to biofuel companies.	NIPC, FIRS	ECN, OPS, FMFBNP, NNPC, FMIT&I	FGN (NIPC, FIRS)	*	*	*
<i>(v) Granting 10 – year import duty waiver for biofuels equipment not produced locally.</i>	(a) Granting waivers on import duties to all identified biofuel companies.	NCS, FIRS	ECN, OPS, FMFBNP, NNPC, NUPRC, FMIT&I	FGN (FIRS, NCS)	*	*	
<i>(vi) Exempting biofuel companies from taxation, withholding tax and capital gains tax in respect of interest on foreign loans, dividends and services rendered from outside Nigeria to biofuel companies by foreigners.</i>	(a) Registering and licencing of all identified biofuel companies with the relevant agency.	NUPRC	FIRS, ECN, OPS, FMFBNP, NNPC, FMIT&I, SMEDAN	FGN (NUPRC, NNPC)	*	*	*
	(b) Providing Tax waivers on expatriate services.	FIRS	ECN, OPS, FMFBNP, NNPC, FMIT&I, NIPC	FGN (FIRS)	*	*	*
	(c) Developing criteria, required to qualify as biofuel company.	NUPRC, ECN	FIRS, ECN, OPS, FMFBNP, NNPC, FMIT&I, NIPC	FGN (NUPRC, ECN)	*	*	

	(d) Providing waivers on capital gains taxes on foreign loan interests.	FIRS	ECN, OPS, FMFBNP, NNPC, FMIT&I, NIPC	FGN (FIRS, FMFBNP)	*	*	*
STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(vii) Granting a single digit interest on a preferential loan to be made available to investors in the biofuels industry to aid the development of large-scale out-growers schemes and co-located power generating plants.</i>	(a) Establishing and supporting outgrowers associations.	FMA&RD, BOA	ECN, NGOs, OPS, FMFBNP, NNPC, FMIT&I	FGN (BOI, BOA, CBN)	*	*	*
	(b) Putting in place guidelines for qualification of preferential loan.	BOI, BOA, CBN	ECN, NNPC, FMFBNP, NIPC	FGN(BOA, BOI, CBN)	*	*	
	(c) Enlightening and training of staff of identified financial institutions to facilitate domestic financing of biofuel Industry.	ECN, BOA	BOI, CBN, NEXIM, FMIT&I	FGN(ECN, BOA)	*	*	
	(d) Reviewing existing framework for agricultural sector, and agriculture related risk hedging.	NDIC, BOA, FMA&RD	FMFBNP, BOI, CBN	FGN (NDIC, BOA, FMA&RD)	*	*	*
<i>(viii) Establishing agro-allied industries capable of benefiting from incentives put in place to foster the development of the agro-allied industry in addition to other incentives.</i>	(a) Formulating and implementing appropriate policy guidelines, regulatory and incentive regimes in the agricultural sector to support the biofuels industry.	FMA&RD, NIPC, ECN	OPS, FMFBNP, NNPC, FMIT&I, BOA	FGN (FMA&RD, BOA), OPS	*	*	
	(b) Creating one stop shops on biofuels business registration, incentives access, and entrepreneurship.	ECN, FMIT&I	ECN, OPS, FMFBNP, NNPC, NIPC, BOA, SMEDAN, FMA&RD, CBN	FGN (ECN, FMIT&I, BOA, CBN), OPS	*	*	
	(c) Developing a monitoring framework for the administration of out-growers schemes.	FMA&RD	ECN, OPS, FMFBNP, NNPC, FMIT&I, NIPC, BOA, CBN	FGN(FMA&RD)	*	*	*
<i>(ix) Establishing a research and development fund to encourage synergy between the private and public sectors in R and D in which all biofuel companies shall contribute 0.25% of their revenue</i>	(a) Developing guidelines on R&D Fund Modalities and Procedures.	ECN	FMSTI, NNPC, DPs, RCs, RIs, TIs, OPS, FMA&RD, FMFBNP, FMIT&I	FGN (ECN), OPS, DPs	*	*	
	(b) Establishing legislation and legal framework for setting up of	ECN, FMSTI, FMJ	NASS, FMFBNP, FMIT&I, FMA&RD,	FGN (ECN, FMSTI, FMJ)	*	*	

<i>for research in feedstock production, local technology development and improved farming practices.</i>	the R&D fund.		OPS, NNPC				
STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(x) Persuading biofuel producers to use auditable feedstock weighing equipment and methodologies as may be prescribed.</i>	(a) Coordinating the activities of Agricultural Research Institutes in the country for the development of improved feedstock seed varieties and modern farming practices.	FMA&RD, ARCN	FMSTI, RCs, RIs, TIs, OPS, FMIT&I, NABDA	FGN (FMA&RD, ARCN), OPS, DPs	*	*	*
	(b) Coordinating the activities of relevant research institutes on the development of appropriate technology for the industry.	FMA&RD, ARCN	ECN, FMSTI, RCs, RIs, TIs, OPS, FMIT&I	FGN(FMA&RD, ARCN)	*	*	*
	(c) Developing methodologies and standard procedures for feedstock weighing.	SON, FMA&RD, Weights& Measures	ECN, OPS, FMIT&I	FGN (SON, FMA&RD), OPS	*	*	*
	(d) Providing guidelines and specifications for feedstock weighing equipment.	SON, FMA&RD, Weights& Measures	OPS, FMSTI, ECN	FGN (SON, FMA&RD)	*	*	*
	(e) Ensuring technical audit of feedstock weighing equipment and processes.	SON, Weights& Measures	OPS, FMSTI, ECN, FMA&RD	FGN (SON)	*	*	*
	(f) Encouraging compliance to standards through, compliance checks, awards, ISO certifications etc.	SON	FMA&RD, OPS, FMSTI, ECN	FGN (SON)	*	*	*
<i>(xi) Creating public awareness and consumer acceptance</i>	(a) Carry out public enlightenment programmes on the biofuels usage	NOA, ECN, ERCs, NNPC, NESREA	CBOs, NGOs, DPs, Media,	FGN, OPS,	*		
	(b) Build up partnerships between government, private sector and civil society for biofuel technologies development	ECN, NASENI, FMSTI, FMoP, ERCs, FMIC	CBOs, NOA, Media	FGN, OPS, DPs,	*		

	(c)Organise regular programmes on radio and TV to demonstrate the uses of biofuel energy	FMSTI, FMIC, Media, NOA	NGOs, LGs, SGs	FGN, OPS, DPs	*		
--	--	-------------------------	----------------	---------------	---	--	--

CHAPTER EIGHT

ELECTRICITY

8.0 Introduction

The Electricity Supply Industry (ESI) in Nigeria dates back to 1866 when two small generating sets were installed to serve the Colony of Lagos. In 1951, the electricity Corporation of Nigeria (ECN) was established through an Act of Parliament to cater for all the power supply systems in the country. The Niger Dam Authority (NDA) was subsequently established for the development of hydroelectric power project at Kainji on the River Niger. The two establishments were merged to form the National Electric Power Authority (NEPA) in 1972. The total installed capacity rose from a mere 30MW in 1956 to about 12,910.4 MW in 2018 with a thermal to hydro mix of about 75% : 25%. Presently, approximately 3,500 MW – 5,000 MW is available for transmission.

By the year 2005, the transmission network consisted of 5000km of 330kV lines and 6000km of 132kV lines. The 330kV lines fed 23 substations of 330/132kV rating with combined capacity of 6,000MVA or 4,800MVA at utilization factor of 80%. In turn, the 132kV lines fed 91 substations of 132/33kV rating with a combined capacity of 7,800MVA or 5,800MVA at utilization factor of 75%. The distribution grid consisted of 23,753km of 33kV lines and 19,226km of 11kV lines. In turn, these fed 679 substations of 33/11kV rating and 20,543 substations of 33/0.415 and 11/0.415kV ratings. In addition, there were 1,790 distribution transformers and 680 injection transformers.

The per capita consumption of Nigeria ranged from 68 to 95 kWh between 1980 and 1997, which was about 17% of the African average and 2% of that of South Africa. Moreover, only 34% and 45% of the population had access to electricity in 1998 and 2003 respectively. Furthermore, as at the year 2006, 661 (85%) of the 774 Local Government Headquarter (LGHQs) towns were connected to the national grid. Only four (4) of the 36 states plus FCT, namely, FCT, Ekiti, Lagos and Osun states had 100% grid electricity connectivity of their LGHQs while Bayelsa state had none of its LGHQs connected to the national grid. To increase access to electricity by the rural dwellers, the Federal Government under the on-going reform in the electricity sector, has established a Rural Electrification Agency (REA). The reform also makes provision for a Rural Electrification Fund for adequate funding of rural electrification projects in the country.

The fundamental objective of the electricity reform is to “ensure that Nigeria has an electricity supply industry that can meet the needs of its citizens in the 21st century”. Others are to

“modernize and expand electricity coverage” and “support national economic and social development”.

The National Electric Power Policy (NEPP, 2002) forms the basis of the provisions of the Electric Power Sector Reform Act (EPSR), which was enacted in March 2005. The Act provides for, among others, the unbundling of the public power sector, the development of a competitive electricity market and the establishment of the Nigerian Electricity Regulatory Commission (NERC) as an independent regulatory agency.

To give effect to its reforms, the Federal Government has invested heavily in the electricity sector and the envisaged deliverables on the investment include an unbundled public power sector resulting in multiple competitive generation and distribution companies; three (3) new gas power plants (of 1,034MW total capacity) already completed; ten (10) new NIPP gas plants in the Niger Delta (of 4,790MW total capacity) with some already completed while others are ongoing. There are two new hydro plants namely Zungeru Hydro Power Plant (700MW) under development and Mambila Hydro Power Plant (3,050MW) under study. There are also about seven (7) new gas plants (of about 2,600 MW total capacity), which are of IPP category some of which are under construction while others are at an advanced stage of planning.

In a study conducted by the Presidential Advisory Committee on 25-year Power Development Plan, the electricity demand projection for a 10% annual growth of the GDP was given as 16,000 MW, 30,000 MW and 192,000 MW for the years 2010, 2015 and 2030 respectively. The same study also suggested an energy source mix of Nuclear (2%); Hydro (7%); Renewables (10%); Coal (11%) and Natural Gas (70%).

The following section gives the strategies and activities for the realization of the targets envisaged in these studies.

8.1 ELECTRICITY

8.1.1 Policies

- i. The nation shall create an enabling environment to ensure a steady, reliable and competitive electricity supply at all times for industrial, commercial and social activities.
- ii. The nation shall continue to engage intensively in the development of electricity value chain and ensure availability of local capability to support the sector.
- iii. The nation shall continue to promote private sector participation in the electricity sub-sector, while ensuring broad-based participation of Nigerian investors.
- iv. The nation shall continue to pursue measures to ensure a strong and diversified energy mix.

- v. The nation shall encourage the state and local governments to provide access to electricity to the rural areas through off – grid and other rural electrification programmes.
- vi. The nation shall pursue market competitive and sustainable power.

8.1.2 Objectives

- i. To make electricity available, accessible, affordable and reliable 100% to the population by the year 2030
- ii. To stimulate industrialization in the rural areas in order to minimize rural-urban migration.
- iii. To provide reliable and secured power supply to the consumers, especially to industries.
- iv. To ensure the removal of bottlenecks militating against the utilization of the full capacity of the existing electric power plants.
- v. To broaden the energy options for generating electricity.
- vi. To attract adequate investment capital, both foreign and domestic, for the development of the electricity industry.
- vii. To maximize access by Nigerians to the investment opportunities in the electricity industry.
- viii. To provide enabling environment for the local manufacture of electrical components within the country.

8.1.3 Action Plan

Table 8.1: Action Plan in the Electricity Sector

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(i) Strengthening the institutional framework for the operational and regulatory aspects of the electricity industry.</i>	(a) Periodic review of the electricity laws.	NERC, FMP, REA, NEMSA, NBET	NASS, ECN	FGN (FMP)	*	*	*
	(b) Promote an efficient market structure in the electricity industries.	NERC	GENCOs, DISCOs, TCN, FMP, FMFBNP	FGN (NERC)	*	*	*
<i>(ii) Establishing a viable cost reflective tariff that will encourage the private investment in power sector.</i>	(a) Periodic review of the existing Multi-Year Tariff Order (MYTO).	NERC	GENCOs, DISCOs, TCN, NBET	FGN (NERC)	*	*	*
<i>(iii) Reinforcing the transmission network and supporting the development of the distribution network expansion to allow consumers to enjoy steady and reliable supply of electricity</i>	a) Rehabilitating, upgrading and continuous expansion of the national grid for a safe, steady and reliable power supply.	TCN, DISCOs, FGN	FMP, NERC, OPS, ECN, FMFBNP, REA, NEMSA, FCTA/FCDA	FGN (TCN)	*		
<i>(iv) Regulating import duties to be paid on generation, transmission and distribution materials/equipments utilized in the whole electricity supply chain, to encourage investment and local production of power components.</i>	(a) Reviewing existing duties and taxes on ESI equipment with a view to making them more investor-friendly	FMFBNP, FMIT&I	NERC, ECN, FIRS, BPE, NIPC, OPS, FMP, SMEDAN	FGN (FMFBNP)	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	S	S
<i>(v) Encouraging research and development in the generation, transmission and distribution of electricity</i>	Strengthening existing institutions to carry out research and development activities on generation, transmission and distribution.	ECN / FMSTI, FMP	RGs, RIs, TIs, NAPTIN, OPS, DPs, TCN, DISCOs, NERC	FGN(ECN, FMSTI, FMP)	*	*	*
<i>(vi) Encouraging off-grid generation and supply of power in remote or isolated areas.</i>	(a) Designing & implementing a long-term coordinated programme for rural electrification based on distributed decentralized generation.	REA, NERC	FMP, ECN, NERC, OPS, NEMSA	FGN (REA), OPS	*	*	*
<i>(vii) Encouraging onshore training facilities as a primary source of human capital capacity development in the power sector.</i>	(a) Fast tracking the commencement and completion of legal and administrative work on the setting up of various Electricity Supply Training Institutes in each geopolitical zone.	NAPTIN	ECN, FMEd., TCN, NERC, DPs, OPS	FGN (FMP)	*	*	*
	(b) Providing the legal, fiscal, administrative and regulatory environment for the setting up of small scale foundries and machine shops dedicated to the ESI within the various Electricity Supply Training Institutes in each geopolitical zone.	NAPTIN	ECN, FMJ, FMEd., OPS, NERC, NASENI, DPs	FGN (FMP)	*	*	

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(viii) Ensuring the participation and involvement of indigenous engineers and applied research groups in the execution of on-going and future projects right from feasibility studies, with the objective of establishing local capacity in the long term.</i>	(a) Involving the various relevant professional bodies in the ESI projects by alerting them on all tender adverts and work plans.	FMP	ECN, BPE, BPP, OPS, RCs, RIs, TIs, NERC, TCN, Relevant Professional Bodies	FGN (FMP)	*		
	(b) Designing and implementing regular training programmes for the indigenous private sector to enable their full participation in the ESI.	NAPTIN	ECN, NASENI, OPS, TCN, FMP	FGN (NAPTIN)	*		
<i>(ix) Developing a bankable feasibility studies for development of Renewable, coal, nuclear and large hydropower sources for power generation.</i>	(a) Reviewing existing information on hydropower, gas- and coal- plants potentials.	ECN, FMP	REA, FMP, NIPPs, OPS, TCN, NEMSA, RCs, RIs, TIs	FGN (ECN)	*	*	
	(b) Conducting feasibility studies for already identified potential sites for hydro, gas and coal-fired plants.	FMP, ECN	REA, NIPPs, OPS, RCs, RIs, TIs	FGN (FMP, ECN), OPS	*	*	
<i>(x) Creating enabling environment, such as Feed –in - Tariff and Model PPP that will encourage power system development in renewable, coal, nuclear and large hydropower sources for power generation.</i>	(a) Ensuring an adequate Feed-in-Tariff that encourage power system development in renewable energy sources of power generation.	NERC	REA, FMP, NIPPs, GENCOs, TCN, DISCOs, RCs, RIs, TIs	FGN (NERC)	*	*	*
	(b) Creating enabling environment through an adequate PPP model that will encourage power system development in renewable, coal, nuclear and large hydropower sources for power generation.	FMP, NNRA	REA, NIPPs, GENCOs, TCN, DISCOs, RCs, RIs, TIs, ICRC	FGN (FMP)	*	*	*
	(c) Providing adequate grid capacity for connection of RE power plants.	TCN	FMP, ECN, NERC, FMWR, OPS	FGN (FMP), OPS	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(xi) Intensifying national effort in training, research and development in using nuclear, solar, wind and other renewable resources for electricity generation.</i>	(a) Increasing progressively the proportion of RE thereby addressing the problem of global warming.	ECN	FMSTI, FMP, NAEC, NNRA, RCs, RIs, TIs, FMWR, NAPTIN, FMEnv.	FGN (ECN), OPS	*	*	*
	(b) Ensuring the use of nuclear energy for power production to encourage optimum mix thereby increasing national energy.	NAEC	FMSTI, ECN, FMP, NERC, NNRA, FMEnv., MMSD	FGN (NAEC)	*		
<i>(xii) Taking effective measures to ensure the security of electricity supply components within the value chain.</i>	(a) Reviewing and enforcing the existing laws on vandalization of public utility infrastructure.	FMP	NASS, NPF, NAF, NGOs, OPS, Community Leaders, FMJ, NEMSA	FGN (FMP), OPS	*	*	*
	(b) Sensitizing the general public on the ills of vandalizing public utility infrastructure.	FMI	ECN, FMP, FRCN, NTA, FMI, OPS, NPF, Community Leaders, NAF, FMJ	FGN (NOA)	*	*	*
	(c) Strengthening laws that deter energy theft	FMP, NERC	NSCDC, NERC, NOA	FGN (FMP)	*	*	*
<i>(xiii) Providing appropriate incentives and support to entrepreneurs to ensure adequate returns on investment.</i>	(a) Ensuring provision of the legal, fiscal, administrative and regulatory environment to entrepreneurs.	NIPC	FMIT&I, OPS, FMP, FMFBNP	FGN (NIPC)	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(xiv) Providing enabling environment and encouraging financial institutions to support indigenous investments in the electricity industry.</i>	(a) Reviewing and updating existing facilities and providing new ones as necessary to support indigenous investments in the ESI.	NIPC	OPS, FMFBNP, CBN, BOI, FMP, RCs	FGN (NIPC)	*	*	*
<i>(xv) Establishing commercial bankable agreement, within the chain.</i>	(a) Strengthening the mandates and activities of relevant institutions such as the Nigerian Bulk Electricity Trading (NBET) Plc.	NBET	NERC, OPS, FMFBNP, FMP, DISCOs, GENCOs	FGN (FMP)	*	*	*
<i>(xvi) Ensuring the proper Operationalization and utilization of the Rural Electrification Fund to facilitate electrification of rural areas.</i>	(a) Ensuring effective administration of Rural Electrification Fund.	REA	NERC, FMP, FMFBNP, DPs, ECN	FGN (REA, FMFBNP)	*	*	*
	(b) Periodic review of regional/rural electricity policies.	FMP	REA, NERC, NPC, ECN	FGN (FMP)	*	*	
	(c) Upgrading of existing rural power grids to meet the technical standards.	REA	FMP, NERC, ECN	FGN (FMP)	*	*	*
	(d) Exploring new and renewable energy sources to supply electricity to the remote communities.	REA	ECN, RIs, TIs, FMEnv., FMP	FGN (FMP)	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(xvii) Ensuring the proper operationalization of an affordable tariff regime for low income electricity consumers and a mechanism for funding the subsidy within the cost reflective tariff structure.</i>	(a) Reviewing the implementation strategy of the existing mechanism for lifeline tariff as in the rural electrification section of the EPSR Act.	NERC	REA, FMFBNP, ECN, OPS, CBOs, NGOs, Community Leaders	FGN (NERC)	*		
	(b) Making available periodic review of the lifeline tariffs and cross-subsidies to all stakeholders, particularly at the local government level.	NERC	NBET, FMP, FMFBNP, OPS, ECN, NOA, REA	FGN (NERC)	*		
<i>(xviii) Carrying out as necessary, the National Electricity Demand Study, to cover 20 to 25 years, and to be updated every 5 years.</i>	(a) Embarking on annual electricity demand survey exercises to capture total electricity supply viz – a – viz electricity consumed at the sectorial level.	TCN, ECN	FMP, NERC, GENCOs, DISCOs, NBS, NPC	FGN (TCN, ECN)	*	*	*
	(b) Compiling, documenting and periodic update of the National Electricity Demand Study findings.	FMP, TCN	ECN, NERC, GENCOs, DISCOs, NBS, NPC	FGN (FMP)	*	*	*
<i>(xix) Ensuring a balanced electricity supply mix to meet the set target.</i>	(a) Reviewing, collating and updating electricity grid and off -grid systems sites within the country.	ECN, TCN	FMP, NERC, GENCOs, DISCOs, REA, NBS	FGN (ECN)	*	*	*
	(b) Monitoring future Power projects to achieve balanced electricity supply mix as well as meeting technical standards.	FMP, TCN	NERC, ECN, NBET, BPP	FGN (FMP)	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(xx) Establishing and strengthening basic engineering infrastructure for the local manufacture of power systems components.</i>	(a) Incorporating curricula/subjects that covers the area of power components design and fabrication to train electrical engineering students within the Higher Institutions.	NUC	NUC, FMed., FMSTI, NAPTIN, ECN, COREN, NSE, TIs, RIs, FMP, RCs	FGN (FMP)	*	*	*
	(b) Designing and implementing a regular training programmes in areas of Power components design and fabrication in recognized training outfits like NAPTIN.	NAPTIN	FMP, COREN, NSE	FGN (NAPTIN)	*	*	*

CHAPTER NINE

ENERGY UTILIZATION

9.0 Introduction

Nigeria is endowed with enormous energy resources ranging from the established ones such as oil, gas, coal, large hydro and biomass to the potential ones such as solar, small hydro, wind, nuclear, ocean, hydrogen fuel and geothermal. However, the exploitation and utilization of the established energy sources and the development of the potentials ones have remained intractable national challenge due to grossly inadequate indigenous technical capacity and prohibitive cost of foreign expertise.

Commercial production of crude oil started in December 1957, with the first exports in 1958. Coal production peaked in 1959 and has experienced continued decline since then, due in part to the dieselization of the railways in the 1960s and to the decline and eventual stoppage of power production from coal. The first gas turbine power plant was built at Afam, near Port-Harcourt, in 1965 with an initial capacity of 56MW. The first domestic refinery with a capacity of 60,000 bpd was also commissioned in Port-Harcourt in 1965, while the first hydroelectric power plant at Kainji, with an initial capacity of 320MW, started operations in 1968. These developments signalled the beginning of the change in the structure of the energy sector from coal to petroleum dominance of commercial energy. They also signalled the beginning of the eventual dominance of the economy by the energy sector, especially by the oil and gas sub-sector.

Prior to the 1960s, energy utilization constituted, very predominantly, of non-commercial energy, namely, fuelwood, charcoal, agricultural wastes and residues as well as solar radiation. The major commercial fuel was coal, which was used by the railways and for power generation. Modest contributions came from petroleum products (petrol and diesel) and electricity (from coal and diesel generators). The structure of energy utilization has drastically changed since then. By 2013, out of total primary energy consumption of 81.92Mtoe, natural gas accounted for 10.38%, fuelwood (21.49%), petroleum products (22.29%) and hydropower (0.72%), while coal contribution had declined to an insignificant level of 0.03% as shown in Table 9.1 and Figure. 9.1.

TABLE 9.1 Total Primary Energy Consumption in Nigeria (2013)

Energy Form	Consumption (TOE)	%
Hydropower	588,384.97	0.72
Fuelwood	54,539,027.42	66.58
Petroleum Products	18,258,605.52	22.29
Coal	28,132.48	0.03
Natural Gas	8,502,790.95	10.38
Total	81,916,941.34	100

Figure 9.1: Total Primary Energy Consumption in Nigeria (2013)

9.1 INDUSTRY

9.1.1 Policies

- i. The nation shall ensure that an adequate supply of energy is made available.
- ii. The nation shall place emphasis on local sourcing of all the energy types to be used by industries.
- iii. The nation shall pursue the optimal utilization of its available energy types for the various industrial activities in an environmentally sustainable manner.
- iv. The nation shall ensure energy efficiency and conservation in industry.
- v. The nation shall enhance the growth of cottage and small-scale industries through adequate supply of energy for the production processes.

9.1.2 Objectives

- i. To encourage maximum capacity utilization by industries.
- ii. To remove the burden of capital investments in energy supply infrastructure from the industries.
- iii. To ensure national security and self-reliance.
- iv. To ensure a balanced mix in the use of the nation's energy resources in the industrial sector.
- v. To ensure long term availability of the nation's energy resources through the encouragement of energy conservation practices.
- vi. To ensure the efficient utilization of all energy types and development of adequate energy management capabilities (human and equipment) in the industrial sector.
- vii. To use energy in such a manner as to ensure minimal negative environmental impact as a result of industrial activities.

9.1.3 Action Plan

Table 9.2: Action Plan for Energy Utilization in the Industry Sector

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(i) Establishing a data bank on energy supply, demand and consumption in the industrial sector.</i>	(a) Enacting a law mandating industries to provide energy and allied data on their energy supply, demand and consumption on a quarterly basis to the ECN.	ECN	FMIT&I, ND, OPS, MAN, NBS, CBN, CAC, NASS, FMJ	FGN (ECN)	*	*	
	(b) Developing a database on energy supply, demand and consumption in the industrial sector.	ECN	FMIT&I, OPS, ND, MAN, NBS, CBN, CAC	FGN (ECN)	*	*	*
	(c) Sensitizing the industrial sector on the need for an industrial energy database.	ECN	NBS, CAC, OPS, FMIT&I, DPs, FMI	FGN (ECN)	*	*	
	(d) Demarcating industrial from residential areas for proper distribution of electricity.	FMWH	FMP, ECN, MAN, NBS, CAC, OPS, FMIT&I, DPs	FGN (FMWH)	*	*	*
<i>(ii) Intensifying research and development efforts to determine the appropriate energy types for different industrial applications.</i>	(a) Conducting studies and surveys on energy utilization in industry with emphasis on energy efficiency.	ECN	FMSTI, OPS, DPs, FMIT&I, NBS, FMP, NUC	FGN (ECN)	*	*	
	(b) Funding energy management R & D adequately with well-enunciated deliverables and targets.	ECN	FMSTI, OPS, DPs, FMIT&I, TIs, RIs, FMFBNP, NUC	FGN (ECN)	*	*	*
	(c) Encouraging collaborative R & D between tertiary institutions, research centres & institutes, and industries.	ECN	FMSTI, OPS, FMIT&I, RCs, TIs, RIs, DPs, MFA, NUC	FGN (ECN), OPS	*	*	*
	(d) Designing and sponsoring publicity through the print and electronic media on industrial energy management R & D results.	ECN	FMI, NOA, FMSTI, RCs, RIs, TIs, OPS, DPs, NUC	FGN (ECN), OPS, DPs	*	*	*
<i>(iii) Strengthening institutional arrangements to ensure energy conservation and efficient use of energy in industries.</i>	(a) Designing a National Programme on Industrial Energy Efficiency and Conservation with cooperation of MAN and experts in higher institutions and research centres.	ECN	FMSTI, OPS, FMIT&I, DPs, MAN, RIs, TIs	FGN (ECN)	*		

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
	(b) Introducing an industrial energy equipment labelling indicating the energy efficiency	SON	OPS, MAN, FMSTI, DPs, FMIT&I, ECN, NEMSA	FGN (ECN), DPs	*	*	
	(c) Encouraging large and medium scale industries to establish energy management units.	ECN	OPS, FMSTI, DPs,	FGN (ECN)	*	*	
<i>(iv) Providing adequate incentives to encourage industries to switch over to more appropriate energy types through import custom waivers, for example.</i>	(a) Providing adequate & necessary incentives in the energy pricing mechanisms thereby encouraging industries to make the switch over to more appropriate and/or environmentally friendly energy types for their production processes.	FMFBNP, MAN	FMIT&I, NERC, OPS, DPs, NMDPRA, NNPC, ECN	FGN (FMFBNP)	*	*	
	(b) Providing adequate energy pricing mechanism through import Custom waivers, for example.	FMFBNP	NCS, SON	FGN(FMFBNP)			
<i>(v) Ensuring strict compliance with energy related environmental pollution standards.</i>	(a) Reviewing and updating all existing energy-related pollution Codes and Standards for industries.	NESREA	SON, MAN, FMH, FMSTI, DPs, OPS, ECN, FMEnv., FMIT&I	FGN (NESREA), DPs	*	*	*
	(b) Ensuring strict compliance with all energy related environmental pollution Codes and Standards by industries.	FMEnv., NESREA	SON, FMH, FMSTI, DPs, OPS, FMEnv., FMIT&I, MAN	FGN (NESREA)	*	*	*
<i>(vi) Ensuring the development of appropriate energy inputs for small scale rural industries.</i>	(a) Developing appropriate and optimal energy inputs for small scale industries in a holistic manner, by industry type, location relative to nearest energy sources, energy source prospecting and processing facilities, etc.	ECN	SMEDAN, FMSTI, FMP, FMIT&I, NASENI, OPS	FGN (ECN)	*	*	*
<i>(vii) Encouraging industries to sell excess electricity generated to other users.</i>	(a) Sensitizing stakeholding industries on energy efficiency conservation and its implications with respect to excess electricity being generated by such industries.	NERC	MAN, FMP	FGN (ECN)	*	*	

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
	(b) Developing and regularly updating a harmonized electricity tariff plan that will guide industries on sale and/or purchase of excess electricity.	NERC	OPS, NBET	FGN (NERC)	*	*	*
<i>(viii) Providing adequate incentives to encourage industries to develop energy management capabilities.</i>	(a) Creating and updating a database carrying detailed information on available energy efficient machineries including comparative technical specifications.	ECN	FMSTI, MAN, ND	FGN (ECN)	*	*	*
	(b) Sensitizing key players in the industrial sector on the benefits/merits on the use of more energy efficient machineries.	ECN	NOA, MAN, FMSTI, FMIT&I	FGN (ECN)	*	*	
	(c) Developing Key Performance Indicators (KPIs) guiding energy management capabilities in the industrial sector.	ECN	MAN, NPC,	FGN (ECN)	*	*	
<i>(ix) Implementing energy audits in the industrial sector to identify and quantify the structure of energy supply, demand, utilization patterns, efficiencies and substitution potentials etc., for both the small scale and large-scale industrial enterprises.</i>	(a) Continuous development of efficient energy consumption and supply patterns through comprehensive energy analysis and planning of the nation's energy resources.	ECN	MAN, FMIT&I	FGN (ECN)	*	*	

9.2 TRANSPORTATION

9.2.1 Policies

- i. The nation shall vigorously pursue the development of an optimal energy mix for the transport sector with particular attention to gas.
- ii. The nation shall ensure regular and adequate availability of all commercially viable fuel types for the transport sector.
- iii. The nation shall ensure the use of energy efficient and environmentally friendly technologies in the transport sector.
- iv. The nation shall vigorously promote the development of mass transit systems.
- v. The nation shall pursue the development of an integrated transportation system through inter-modal transportation systems.

9.2.2 Objectives

- i. To establish a rational utilization of available energy types for various transport applications.
- ii. To promote a reliable and efficient use of energy with minimal negative environmental impact.
- iii. To promote adaptive technology in energy utilization in the transport sector.
- iv. To promote efficient and reliable operation of the transport sector so as to enhance economic growth.
- v. To promote effective and efficient public transit systems.
- vi. To promote inter-modal integration so as to enhance rational and efficient utilization of energy.
- vii. To ensure that urban and commercial development planning takes into account the likely implications for transport and energy demand.

9.2.3 Action Plan

Table 9.3: Action Plan for Energy Utilization in the Transportation Sector

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(i) Establishing a databank on the energy consumption pattern of the transport sector.</i>	(a) Enacting a law mandating petroleum marketers/dealers to supply data to the ECN on the fuel sold monthly.	ECN, OPS	FMT, NBS, DPs, OPS, NUPRC, FMIT&I, NNPC, IPMAN	FGN (ECN)	*	*	*
	(b) Conducting relevant studies to extract transport fuel consumption from above data which would normally include fuel sold to standby generator owners, grinding/milling machines, construction plants, and other stationary equipment such as compressors, pumping machines, etc.	ECN	FMT, NBS, FMIT&I	FGN (ECN)	*	*	*
<i>(ii) Maintaining adequate stocks of the various transport fuels at levels that will ensure internal fuel security.</i>	(a) Establishing National 90-day Strategic Fuel Depots in each of the six geopolitical zones for stockpiles of transport fuel and other petroleum products.	NNPC	MPR, FMSTI, FMT, FMFBNP, NUPRC, OPS	FGN (NNPC)	*	*	*
<i>(iii) Encouraging the development and use of mass transit systems.</i>	(a) Providing adequate mass transit buses.	FMT	FMFBNP, OPS, NADDC	FGN (FMT)	*	*	*
<i>(iv) Pursuing and encouraging the establishment and use of inter – modal system that will ensure rational utilization of energy resources.</i>	(a) Developing the ongoing inter – modal system in the major cities of the Nation.	FGN, SGs, FMT	FMFBNP, OPS, NADDC	FGN (FMT)	*	*	

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(v) Using more stringent traffic management and speed limits to reduce travelling speeds on motor ways and there by cutting fuel consumption and transport emissions.</i>	(a) Improving on existing public sensitization programmes on the ills of over speeding and other traffic related offences.	FRSC	FMT, OPS, NOA	FGN (FMT)	*	*	*
	(b) Reviewing, strenghtening and modifying existing laws on speed limits as well as penalties.	FRSC	FMT, FMJ	FGN (FMT)	*		
<i>(vi) Encouraging the use of gas for commercial tri – cycles and private transportation, petrol for private cars and low – powered commercial transportation, electricity, gas, and diesel for commercial mass transit (road and rail), and diesel for inland water, sea and other heavy powered engines.</i>	(a) Encouraging the present national rail programme for large haulage with emphasis on dieselized and electric train engines.	FMT	ECN	FGN (FMT), OPS, DPs	*	*	*
	(b) Developing a modern urban transportation development plan to phase out environmentally unfriendly motorcycles and their single cylinder, 2-stroke cycle engines, replacing them with large urban transportation buses that are a mix of electric drives, CNG, diesel engines, tramways, railways, subways, etc.	FMT	ECN, FMSTI, OPS, SGs, FCTA, DPs	FGN (FMT), OPS, DPs	*	*	*
<i>(vii) Pursuing vigourously the introduction of compressed natural gas into general use in the rail and road transport systems.</i>	(a) Fast-tracking the establishment of the proposed Institute of Gas for studies into general use of Compressed Natural Gas (CNG) in the rail and road transport systems.	MPR	ECN, FMSTI, FMT, OPS, DPs, SON, PTDF, FMEnv., NNPC, NLNG, PTI	FGN (MPR)	*	*	*
	(b) Intensifying R & D into conversion technologies for petrol carburetors & diesel injectors to CNG fuel.	NADDC	ECN, FMSTI, FMT, OPS, SON , PTDF, FMEnv., TIs, RCs, RIs, DPs, NNPC, NLNG, PTI	FGN (NADDC)	*	*	*
<i>(viii) Encouraging a shift towards more energy- efficient transportation systems like electric cars.</i>	(a) Re-designing our cities for present day transportation realities, with sufficient space for roads which will take care of pedestrians, cyclists, large urban bus lanes, etc.	FMWH	FMT, DPs, SGs, LGs, OPS, FMEnv.,	FGN (FMWH)	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
	(b) Introducing subways and tramways into city transportation systems with electric drives, diesel, biofuel, CNG & hydrogen fuelled engines.	FMT, FMEnv.	FMT, DPs, SGs, LGs, OPS	FGN (FMT, FMEnv.)	*	*	*
	(c) Designing and sponsoring publicity in electronic and print media on the benefits of more energy-efficient vehicles to the corporate health, environment, climate change issues, etc.	FMEnv.	ECN, FMI, NOA, OPS, DPs	FGN (FMT)	*	*	*
	(d) Introducing fuel efficiency labelling programme in the transportation sector for various vehicle types.	SON	ECN, FMIT&I, FMT	FGN (SON)	*	*	*
	(e) Encouraging R&D into more energy efficient air and water transport systems.	ECN	RCs, RIs, TIs, DPs, OPS, FMT	FGN (ECN)	*	*	*
	(f) Introducing the sustainable urban mobility programme of the UN Habitat to address the urban mobility problem.	FMEnv.	FMT, SGs, LGs, DPs, OPS	FGN (FMEnv.)	*	*	*
	(g) Intensifying the involvement of the OPS in the mass transit programme of the Federal & State Governments.	FMT	SGs, LGs, OPS	FGN(FMT), OPS	*	*	*
<i>(ix) Maintaining an active interest in emerging and potentially more energy-efficient transport technologies, such as electric trains and buses for mass transit.</i>	(a) Transforming the Nigerian Institute of Transport Technology (NITT), Zaria into a more vibrant institution capable of meeting the challenges of the modern-day transport sector demand.	FMT	ECN, DPs, OPS, NITT, RIs	FGN (FMT)	*	*	*
	(b) Intensifying indigenous R & D in biofuels technology.	ECN	NNPC, DPs, OPS, FMSTI, PTDF, RIs, TIs	FGN (ECN, PTDF), OPS, DPs	*	*	*
	(c) Discouraging importation of energy inefficient vehicles through fiscal and regulatory measures.	FMT, FMFBNP	ECN, OPS	FGN (ECN)	*	*	*
	(d) Initiating a National CNG transportation fuel programme.	FMT	FMFBNP, ECN, OPS, DPs, MPR	FGN (FMT)	*	*	

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
	(e) Intensifying the phasing out of leaded gasoline in the nation's fuel mix.	FMIT&I	ECN, NUPRC, NNPC, OPS, MPR	FGN (FMT), OPS	*	*	
	(f) Intensifying R & D into conversion and adaptation of automobile engines to biofuels in concert with the on-going NNPC ethanol project.	ECN	NNPC, RCs, RIs, TIs, NADDC	FGN (FMIT&I), OPS, DPs	*	*	*
	(g) Conducting R & D in hybrid vehicles in Nigeria, e.g. electric and petrol or electric and diesel or solar PV and petrol for optimal fuel efficiency.	ECN	FMT, OPS, NNPC, RCs, RIs, TIs, FMSTI, PTDF, NADDC	FGN (ECN), OPS, DPs, PTDF	*	*	*
	(h) Conducting R&D into train transport technologies, tramways, ect.	ECN	FMT, OPS, NNPC, RCs, RIs, TIs, FMSTI, PTDF, NADDC	FGN (ECN), OPS, DPs, PTDF	*	*	*

9.3 HOUSEHOLDS

9.3.1 Policies

- i. The nation shall vigorously pursue the development of an optimal energy mix for the household sector.
- ii. The nation shall ensure regular and adequate availability of all fuel types for the household sector.
- iii. The nation shall ensure the use of energy efficient and environmentally friendly technologies in the household sector.
- iv. The nation shall ensure improved energy performance of building components and systems.

9.3.2 Objectives

- i. To establish a sustainable consumption pattern of available energy sources.
- ii. To promote adaptive technology in energy utilization in the household sector.
- iii. To promote extensive use of renewable energy in both urban and rural households.

9.3.3 Action Plan

Table 9.4: Action Plan for Energy Utilization in the Household Sector

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE

<i>(iv) Discouraging heating and cooking with electricity in household</i>	Organising nationwide sensitization and awareness campaigns.	ECN, NOA	FMIC, GENCOs, DISCOs	FGN (ECN, NOA)	*	*	*
<i>(iv) Pursuing vigourously the electrification programme for both urban and rural households.</i>	(a) Encouraging the use of RE sources for the purpose of supplying electricity to residential buildings.	ECN, REA, SG	NASENI, FMI, FMP, FMWH, NBRRI,	FGN (ECN)	*	*	*
	(b) Improving the propagation of energy – efficient lighting fittings.	ECN, SON, REA, SGs	NASENI, FMI, FMP, FMWH, NOA,	FGN (ECN)	*	*	*
	(c) Developing energy efficiency related curriculum for applications in primary and secondary education.	FMed.	UBEC, ECN, FMP, FMSTI, NERDC	FGN (FMed.)	*	*	*
<i>(vi) Encouraging extensive use of renewable energy through incentives to households.</i>	(a) Promoting the use of renewable energy resources in households.	ECN, REA, FMP	NERC, FMWH	FGN (ECN)	*	*	*

9.4 COMMERCIAL/SERVICES

9.4.1 Policies

- i. The nation shall vigorously pursue the development of an optimal energy mix for the services sector.
- ii. The nation shall ensure regular and adequate availability of all fuel types for the services sector.

9.4.2 Objectives

- i. To establish a rational utilization of available energy types for various services applications.
- ii. To promote adaptive technology in energy utilization in the services sector.

9.4.3 Action Plan

Table 9.5: Action Plan for Energy Utilization in the Commercial/Services Sector

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(i) Establishing a databank on the energy consumption pattern of the services.</i>	(a) Designing and regularly updating an information systems indicating consumption patterns/rates of the services sector in comparion with the recommended pattern/rate for a given period.	ECN	TIs, RIs, NOTAP, FMP	FGN (ECN)	*	*	*
	(b) Supporting energy efficient modernization of services and commercial buildings built with state-of-the-art technologies.	ECN	FMFBNP, FMSTI, FMWH	FGN (ECN)	*	*	
<i>(ii) Implementing building codes and building certification schemes for public and commercial buildings.</i>	(a) Reviewing of existing laws that governs energy related certifications for public and commercial buildings	NASS	FMEEnv., NERC, NBRRI, FMWH..	FGN (NASS)	*		
<i>(iii) Promoting passive energy houses and zero – energy buildings.</i>	(a) Encouraging the public to build zero – energy buildings through sensitizations, documentaries and campaigns.	NBRRI	ECN, FMWH	FGN (NBRRI)	*	*	*
<i>(iv) Developing and implementing energy performance test standards and labelling.</i>	(a) Adopting international best practices in the areas of energy performance test standards and labelling.	SON	ECN, NBRRI, MAN	FGN (SON)	*	*	*
	(b) Upgrading available testing laboratories e.g Standards Organization of Nigeria (SON) and setting up more energy performance test laboratories across the Nation.	SON	MAN, DPs, OPS	FGN (SON)	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(v) Phasing out incandescent bulbs and adopting efficient lighting technology in public and commercial buildings by reducing duties on importation of energy saving bulbs and encouraging local manufacturers.</i>	(a) Embarking on a nation wide retrofitting campaigns in commercial and services buildings.	ECN	NOA, SON, FMP	FGN (ECN)	*	*	
	(b) Developing and implementing of energy efficiency directives related to public procurements.	ECN	BPP, FMJ	FGN (ECN)	*	*	*
<i>(vi) Ensuring least – cost lighting in non residential buildings.</i>	(a) Developing laws that guides non residential buildings on the use of least – cost lighting and sanctioning defaulters.	ECN	FMJ, NASS, SON, NERC	FGN (ECN)	*	*	*
	(b) Providing more efficient gas boilers and solar water heating systems for household use at subsidized rates.	ECN	FMP, NNPC, MPR, NOTAP, FMSTI, FMWH, NASENI, FMFBNP	FGN (ECN)	*	*	*
<i>(vii) Targeting market share of net zero energy consumption building in all new construction by 2025</i>	(a) Providing incentive for the construction of net zero energy consumption in new buildings in Nigeria	FMWH	ECN, NBRRI, FMFBNP, CBN, NIA	FGN (FMWH)	*	*	*
<i>(viii) Promoting the adoption of energy management and control systems that reduce energy consumption and better target energy saving opportunities through incentives.</i>	(a) Providing incentives for energy management in old and new buildings in Nigeria	FMWH	ECN, NBRRI, FMFBNP, CBN, NIA	FGN (FMWH)	*	*	*

9.5 AGRICULTURE

9.5.1 Policies

- i. The nation shall ensure adequate and reliable supply of energy to the agricultural sector.
- ii. The nation shall ensure that appropriate sources of energy are utilized judiciously and efficiently for the overall agricultural activities, with minimum harm to the environment.
- iii. The nation shall emphasize the use of affordable, adaptable, reliable and sustainable agricultural technologies, possessing flexible energy utilization capabilities.
- iv. The nation shall ensure sustainable storage facilities for agricultural products using energy efficient technologies.

9.5.2 Objectives

- i. To increase agricultural productivity and efficiency through the use of appropriate energy sources.
- ii. To exploit alternative sources of energy especially bio-energy resources (agro-forestry waste), thereby minimizing the heavy dependence on electricity and petroleum in the total energy mix of the agricultural sector.
- iii. To enhance the productive capacity of rural farmers who mainly rely on the cumbersome manual methods of farming.
- iv. To develop and promote efficient technologies that would be flexible in their energy requirement.
- v. To promote the establishment of storage facilities that would be flexible in energy requirement for all agricultural products especially the seasonal products.

9.5.3 Action Plan

Table 9.6: Action Plan for Energy Utilization in the Agricultural Sector

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(i) Supporting research and development activities for the evolvement of appropriate technologies that can use available/multiple energy sources, including renewable energy sources.</i>	(a) Encouraging mass cultivation of energy crops such as cassava, jatropha and sugar cane for production of biofuels.	FMA&RD	ECN, RCs, RIs, TIs, SGs, LGs, DPs, OPS, FMWR, FML&E, FAN	FGN (FMA&RD)	*	*	*
	(b) Intensifying R & D effort in developing appropriate technologies that can use available/multiple energy sources.	FMA&RD	ECN, RCs, RIs, TIs, SGs, LGs, DPs, OPS	FGN (FMA&RD)	*	*	*
	(c) Intensifying renewable energy sources in agricultural processes.	FMA&RD	ECN, RCs, RIs, TIs, SGs, LGs, DPs, OPS	FGN (FMA&RD)	*	*	*
	(d) Encouraging genetic engineering application in the production of drought resistant animals and energy crops.	FMA&RD	ECN, RCs, RIs, TIs, SGs, LGs, DPs, OPS, FMWR	FGN (FMA&RD)	*	*	*
<i>(ii) Developing improved crops, quick growing trees for afforestation, and energy crops.</i>	a) Strengthening the national programme on improved crops and selective breeding (including biotechnology) such as the agriculture transformation agenda (ATA).	FMA&RD	ECN, OPS, DPs, FMSTI, SGs (ADP), LGs, RCs, RIs, TIs	FGN (FMA&RD)	*	*	*
	(b) Providing adequate funds and grants to Research Institutes for R & D.	FMA&RD	ECN, OPS, DPs, FMSTI, SGs (ADP), LGs, RCs, RIs, TIs	FGN (FMA&RD)	*	*	*
	(c) Providing improved seeds/seedlings for Farmers at subsidized rates.	FMA&RD	BOA, ECN, OPS, DPs, FMSTI, SGs (ADP), LGs, RCs, RIs, TIs	FGN (FMA&RD)	*	*	*
<i>(iii) Disseminating the developed technologies through extension programmes in the farming communities.</i>	(a) Designing and sponsoring publicities on developed technologies through the print, electronic media and extension workers.	FMA&RD	FMI, NOA, OPS, DPs, NGOs, ECN, CBOs, Community Leaders	FGN (FMA&RD)	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
	(b) Training the Farmers on the use of the new technologies.	FMA&RD	FMI, FMFBNP, BOA, NOA, OPS, DPs, NGOs, ECN, CBOs, FAN, Community Leaders	FGN (FMA&RD)	*	*	*
<i>(iv) Training the existing extension personnel in effective dissemination of the newly developed technologies.</i>	(a) Developing and executing training programmes for extension personnel in effective operation and maintenance of the newly developed, appropriate and efficient energy technologies for the rural agricultural sector.	FMA&RD	FMI, OPS, DPs, NGOs, ECN, CBOs, Community Leaders	FGN (FMA&RD)	*	*	*
<i>(v) Promoting the use of renewable energy resources for agriculture.</i>	(a) Facilitating accessibility and affordability of renewable energy resources to farmers.	ECN	FMA&RD, FMWR, SGs, ADPs, LGs, OPS, FAN	FGN (ECN)	*	*	*
	(b) Intensifying the utilization of renewable energy sources in agricultural activities.	FMA&RD	ECN, SGs, ADPs, LGs	FGN (FMA&RD)	*	*	*
	(c) Developing appropriate promotion programmes and strategies for the use of renewable energy resources in agriculture.	ECN	FMA&RD, FMWR, SGs, ADPs, LGs	FGN (ECN)	*	*	*
<i>(vi) Establishing a databank on energy demand, supply and consumption in the agricultural sector.</i>	(a) Mandating all agricultural facilities (especially large enterprises) including agricultural products processing plants to provide energy demand, supply and consumption data annually to the ECN.	ECN	FMA&RD, FMWR, NBS, CBN, FMJ, OPS, ADPs	FGN (ECN)	*	*	*
	(b) Measuring energy consumption yearly in comparison to the previous year and against comparative weather periods (normalizing energy data).	ECN	NIMET, FMWR, FMA&RD	FGN (ECN)	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(vii) Developing, training and disseminating adaptable storage technologies.</i>	(a) Creating awareness among farmers on the use of Storage facilities using energy efficient technologies at regular intervals.	ECN	NOA, FMA&RD, FMSTI, FAN	FGN (ECN)	*	*	*
	(b) Providing incentives and subsidies to fast track design, fabrication and utilization of energy efficient storage technologies.	ECN	FMA&RD, FMFBNP, BOA, FMSTI, MAN	FGN (ECN)	*	*	
<i>(viii) Developing simple agricultural machines that can use multiple energy sources.</i>	(a) Enlightening commercial and large scale farmers on the merits of agricultural machines that make use of multiple energy sources.	ECN	NOA, FMA&RD, FMSTI, NOTAP, FAN, DPs, OPS	FGN (ECN)	*	*	
	(b) Providing subsidized agricultural machines that can use multiple energy source to commercial and large scale farmers within the country.	ECN	NOA, FMA&RD, FMFBNP, BOA, FMSTI, NOTAP, FAN, DPs	FGN (ECN)	*	*	
<i>(ix) Providing incentives for cost effective and adequate energy supply for agricultural activities.</i>	(a) Sensitizing farmers on the various cost effective energy supply sources that can be utilized while carrying out their agricultural activities.	ECN	NOA, FMFBNP, BOA, FMA&RD, FMSTI, NOTAP	FGN (ECN)	*		
<i>(x) Implementing energy audits in the agricultural sector to identify and quantify the structure of energy supply, demand, utilization patterns, efficiencies and substitution potentials etc., for both the small scale and large-scale farming.</i>	(a) Continuous development of efficient energy consumption and supply patterns through comprehensive energy analysis and planning of the nation's energy resources.	ECN	FMA&RD, FMP	FGN (ECN)	*	*	*

CHAPTER TEN

ENERGY EFFICIENCY AND CONSERVATION

10.0 Introduction

In Nigeria, energy demand-supply imbalance is high, with low energy access. In order to enhance energy access to all, energy efficiency and conservation best practices must be imbibed. Energy efficiency refers to "using less energy to provide a level of energy service". Energy efficiency lowers energy use and therefore relevant in reducing energy demand-supply imbalance. It is achieved by means of more efficient technologies or processes rather than by behavioural changes.

Energy conservation on the other hand refers to "using less energy to achieve a lesser energy service through behavioural change. Energy conservation can be implemented with little or no cost, and result in immediate cost savings; while energy efficiency measures often require cash outlay. Both energy efficiency and energy conservation contribute to achieving environmental and economic enhancement goals.

There is significant potential for energy savings in the supply and demand sides of the nation's energy sector. Therefore, sector-wide adoption of supply and demand side's energy efficiency and conservation measures in the entire energy production and utilization is imperative. Since expenditure on energy constitutes a large proportion of the country's GDP and a particularly large proportion of poor household expenditure, it is necessary to emphasize the effective and efficient use of energy. Fuel substitution is equally important to reduce the negative impact of the use of some fuels on the environment and to reduce the cost of energy services. For instance, substitution in the use of wood-fuel with LPG will reduce deforestation. The major sectors to be considered for energy efficiency and conservation are residential, industrial, transportation, services/commercial, agriculture and energy efficient building designs.

Energy efficiency and conservation best practices have many benefits, which include: reduction in amount of energy used to produce goods or services, thereby improving business's competitiveness; while making more energy available for supply to other parts of the country. It minimizes the urgent need for new power station so that capital is freed up for other projects like health and education. Energy conservation has attractive business opportunities. Energy conservation is a cheap, quick and relatively painless way for most developing countries to stretch energy supplies, slash energy costs, and save foreign exchange. Most energy resources deplete,

increased energy efficiency therefore helps to extend their availability. With economic growth there is likely to be a return to tight energy markets, but increased energy efficiency will delay and lessen the impact of such tightening. Investments in energy efficiency and conservation often provide a better return than in investments in energy supply: increased energy efficiency and conservation will therefore improve the general efficiency of the economies. There is widespread public concern about the environmental consequences of energy production and use: increased energy efficiency and conservation in general reduces greenhouse gas emissions from the avoided energy generation and use.

Unfortunately, energy efficiency is facing a lot of obstacles such as: low level of awareness; lack of baseline energy consumption data; weak enforcement of laws and regulations leading to proliferation of low quality energy-efficient (EE) products; low local manufacturing capacity of energy-efficient equipment/appliances; High initial capital cost; poor billing systems by utilities (e.g, estimated bills); unreliable power supply and poor instrumentation and lack of energy audit toolkits and expertise. The following policies, strategies and corresponding actions are aimed at removing these barriers.

10.0.1 Policies

- i. The nation shall adopt and promote energy efficiency and conservation best practices in the exploration and utilization of the nation's energy resources.
- ii. The nation shall mainstream energy efficiency and conservation best practices into all sectors of the economy.
- iii. The nation shall adopt, promote and enforce standardization of energy appliance standards and code for energy efficiency and conservation technologies.
- iv. The nation shall adopt appropriate energy pricing, metering, and billing mechanisms.
- v. The nation shall integrate energy efficiency and conservation studies into the curricula of educational institutions.

10.0.2 Objectives

- i. To guarantee reliable energy access for all at appropriate costs and in a sustainable and environmentally friendly manner.
- ii. To monitor the energy use patterns of the various sectors of the economy.
- iii. To encourage and incentivize end-users to adopt energy efficiency best practices, minimize energy wastages and enhance energy security.
- iv. To enhance self-reliance in the prudent exploitation of the nation's renewable and non-renewable energy resources.
- v. To reduce adverse effects of energy related activities on the environment.

- vi. To increase the proportion of hydrocarbon resources available for special applications such as industrial feedstock and for export.
- vii. To eliminate avoidable investments by promoting the development of local contents in energy supply infrastructure.

10.0.3 Action Plan

Table 10.1: Energy Efficiency and Conservation Plan

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(i) Strengthening existing institutional and legal framework for the promotion of energy efficiency and conservation.</i>	(a) Expanding ongoing activities and structures of existing institutions.	ECN	FMP, MPR, NERC, NNPC, NASS	FGN (ECN)	*	*	*
	(b) Ensuring effective implementation of the existing regulatory measures to ban the importation and sale of inefficient appliances.	SON	ECN, FMP, NERC, FMIT&I, MAN, FMWH	FGN (SON)	*	*	
	(c) Reviewing periodically the energy efficiency and conservation regulatory and pricing mechanism.	ECN	FMIT&I, NIPC, FMP, NERC, MAN	FGN (SON)	*	*	*
	(d) Building high-level political consensus on energy efficiency and conservation goals and strategies.	ECN	FMP, MPR, FMSTI, NASS, OSGF	FGN (ECN)	*	*	*
	(e) Streamlining and harmonizing all policies and plans on energy efficiency and conservation for a unified target setting.	ECN	FMP, MPR, NNPC, NERC, NASS	FGN (ECN)	*	*	*
	(f) Developing Minimum Energy Performance Standard for end-use appliances.	SON	NERC, NNPC, ECN	FGN (SON)	*	*	*
	(g) Conducting studies to monitor the energy use patterns in the different sectors of the economy.	ECN, NUC, NBTE, NCCE	NNPC, NERC, DISCOs	FGN (ECN)	*	*	*
	(h) Assigning responsibility and creating accountability for energy efficiency and conservation policy implementation.	ECN	NERC, NNPC, MAN, FMIT&I, FMWH, FMA&RD, SON	FGN (ECN)	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(ii) Strengthening national, regional and international collaboration on energy efficiency and conservation.</i>	(a) Expanding cooperation with all stakeholders in both developing and developed countries.	ECN	FMP, MPR, DPs, MFA, FMFBNP	FGN (ECN, MFA), DPs	*	*	*
	(b) Organizing study tours and training to countries already advanced in promoting energy efficiency and conservation best practices.	ECN	FMP, MPR, FMT, FMI&TI, FMWH,, FMA&RD, DPs	FGN (ECN), DPs	*	*	*
	(c) Facilitating coordination amongst stakeholders within the country in the promotion of energy efficiency and conservation.	ECN	FMP, MPR, NNPC, NERC, FMT, FMWH, FMA&RD, FMIT&I	FGN (ECN)	*	*	
	(d) Aligning with regional organizations such as ECREEE to build capacity of relevant national stakeholders.	ECN	FMP, MPR, FMT, FMWH, FMIT&I, FMA&RD	FGN (ECN)	*	*	*
	(e) Accessing international funds and expertise to compliment government efforts in the development of energy efficiency and conservation.	ECN, FMFBNP	DPs, FMP, MPR, MFA	FGN (ECN)	*	*	*
	(f) Encouraging Federal and State Institutions to mainstream energy efficiency and conservation programmes into their development efforts.	NOA, ECN	FMI, SGs, FMFBNP, CSOs, MDAs	FGN (NOA, ECN)	*	*	*
<i>(iii) Adopting appropriate policy instruments – building standards/codes, mandatory labeling, mandatory energy audit, energy use disclosure, soft loans, tax credits, investment subsidies, etc.</i>	(a) Developing Minimum Energy Performance Standards (MEPS) for end-use appliances.	ECN, SON	FMP, NERC, NEMSA, MAN, OPS, DPs	FGN (ECN, SON)	*	*	
	(b) Providing information for consumers about energy efficient labels of all end-use appliances.	NOA, ECN, SON	SON, FMP, NERC, MAN, CSOs, FMI, FCCPC	FGN (NOA, ECN)	*	*	
	(c) Introducing mandatory energy audits in buildings and, industries	ECN, SON	FMP, NERC, NGOs, OPS, DPs, MAN, NEMSA, FMWH,, FMIT&I	FGN (ECN)	*	*	

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
	(d) Setting up an energy efficiency fund to accelerate the implementation of energy efficiency policies and plans.	ECN	NERC, MAN, NNPC, FMFBNP, BOI, REA, SGs	FGN (ECN)	*	*	
<i>(iv) Conducting comprehensive energy end-use analysis in various sectors of the economy.</i>	(a) Carrying out studies to monitor the energy use patterns in the different sectors of the economy.	ECN	NERC, OPS, MAN, NNPC, NURTW, CSOs, NBBRI, NBS	FGN (ECN)	*	*	*
<i>(v) Mandating energy audits in key sectors of the nation's economy.</i>	(a) Conducting energy audit regularly and implementing the recommendations of the audit process.	ECN	NERC, NGOs, OPS, DPs, MAN, NBRRI, FCCPC, NURTW	FGN (ECN), OPS, DPs	*	*	*
<i>(vi) Promoting education, information and public awareness campaign on energy efficiency and conservation best practices.</i>	(a) Organizing public awareness programmes on the need for energy efficiency and conservation practices.	ECN	FMP, NERC, NOA, NGOs, OPS, DPs, MAN, NBRRI, FCCPC, NURTW, NNPC, FMT, FMA&RD, FMWH, FMIT&I	FGN (ECN), OPS, DPs	*	*	*
	(b) Introducing energy efficiency into the nation's education curricular.	ECN, NERDC, NUC, NBTE, NCCE	FMP, NERC, NOA, NGOs, OPS, DPs, MAN, NBRRI, NURTW, NNPC, FMT, FMA&RD, FMWH, FMIT&I	FGN (ECN), OPS, DPs	*	*	*
	(c) Launching public information campaigns and educational programmes to raise awareness of energy efficient systems.	ECN	FMed., FMP, NERC, NOA, NGOs, OPS, DPs, MAN, NBRRI, FCCPC, NURTW, NNPC	FGN (ECN), OPS, DPs	*	*	*
<i>(vii) Promoting and creating enabling environment for the establishment of Energy Services Companies (ESCOs)</i>	(a) Identifying existing EMSCOs in the country.	NERC, NNPC, ECN	FMP, MPR, OPS, CPC	FGN (ECN, NERC, NNPC), OPS	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
	(b) Developing appropriate monitoring and regulatory mechanisms for new and existing EMSCOs.	NERC, NNPC, ECN	FMP, MPR, OPS, CPC	FGN (ECN), OPS	*	*	*
<i>(viii) Launching a national Demand-Side Management (DSM) initiative.</i>	(a) Intensifying Demand Side Management programmes in the electricity companies.	DISCOs, TCN	NERC, GENCOs, FMP, NBET	FGN (SON)	*	*	
	(b) Developing standards and rating electrical appliances under the labeling programme.	SON, ECN, NERC	NERC, DISCOs, GENCOs, NEMSA, DPS	FGN (SON), DPs	*	*	
	(c) Improving the level of implementation of the metering and informative billing system.	DISCOs	NERC, GENCOs, NNPC	DISCOs, FGN	*	*	*
<i>(ix) Providing economic, fiscal and financial incentives to promote energy efficiency in all sectors of the economy.</i>	(a) Developing appropriate incentives for the promotion of energy efficiency in the country.	NIPC, FMWH	ECN, FMIT&I, NERC, NNPC	FGN (NIPC)	*	*	*
	(b) Increasing involvement of local and foreign financial institutions in financing energy efficiency and conservation programmes.	FMFBNP	CBN, BOI, MFA, ECN, NERC, NNPC	FGN (FMFBNP)	*	*	
	(c) Introducing rebate programmes to promote the use of efficient appliances.	NIPC	NCS, FMFBNP, ECN, FMIT&I, NERC, NNPC	FGN (NIPC)	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(x) Promoting research, development and adaptation of internationally available energy efficient technologies and measures.</i>	(a) Establishing more testing laboratories and strengthening the existing ones to enhance R&D and compliance in energy efficiency.	ECN, SON	FMP, NERC, NGOs, RCs, RIs, TIs, MPR, NNPC, FMT, NBBRI	FGN (ECN, SON)	*	*	*
	(b) Supporting exchange programmes in the tertiary institutions to enhance energy efficiency and conservation R&D activities.	ECN, FMed.	NUC, NAPTIN, TIs, RIs, RCs, MPR, NBTE, NCCE, ITF, TETFUND	FGN (ECN, FMed.)	*	*	*
<i>(xi) Introducing energy efficiency awards in all sectors of the economy.</i>	(a) Conducting Annual National Energy Efficiency Awards for all sectors of the economy.	ECN	FMFBNP, FMIT&I, FMT, FMA&RD, OPs, FMP, FMWH, MPR, NGOs	FGN (ECN)	*	*	*
<i>(xii) Increasing the share of green electricity by 1 % every year on year-to-date basis (YTD) basis.</i>	(a) Diversifying energy supply by adopting advanced, cleaner, more efficient and cost-effective energy technologies.	ECN, NERC	FMP, NERC, OPS, FMWH, FMIT&I, MAN	FGN (ECN, NERC)	*	*	
<i>(xiii) Setting and enforcing targets about energy efficiency and conservation.</i>	(a) Setting energy efficiency targets for each sector of the economy.	FMFBNP, ECN	NBS, FMP, MPR, MAN, NAEC, NGSA	FGN (NPC)	*	*	*
	(b) Measuring performance towards set targets.	NPC, ECN	NBS, FMP, MPR, MAN, NAEC, NGSA	FGN (NPC)	*	*	*
<i>(xiv) Establishing necessary guidelines and regulations on energy efficiency, conservation, consumption, technology, fuel mix, information gathering, etc., as appropriate.</i>	(a) Developing energy efficiency guidelines for end-use appliances.	ECN	FMP, SON, NERC, OPS, MPR, FMWH, NGOs,	FGN (ECN)	*	*	
	(b) Developing framework for communicating energy efficiency best practices.	ECN, NOA	FMP, SON, NERC, OPS, MPR, FMWH, NGOs, DPs, FMI, MAN, NNPC, FMIT&I	FGN (ECN, NOA), DPs	*	*	

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(xv) Ensuring reduction of electricity generation, transmission and distribution losses from the current level of 15 – 40 % to less than 10 % within five years.</i>	(a) Refurbishing the existing generation, transmission and distribution network infrastructure.	DISCOs, TCN, GENCOs	FMP, NERC, OPS, ECN, FMWH, MAN, FMIT&I	FGN (TCN, DISCOs, GENCOs)	*	*	
	(b) Replacing the existing inefficient generation, transmission and distribution network infrastructure with the efficient infrastructure.	DISCOs, TCN, GENCOs	FMP, NERC, OPS, ECN, FMWH, MAN, FMIT&I	FGN (TCN, DISCOs, GENCOs), DPs	*	*	*
<i>(xvi) Establishing appropriate energy efficiency regulatory and legislative framework.</i>	(a) Developing MEPS and energy labeling system framework.	ECN, SON	NGOs, DPs, FMP, NERC	FGN (ECN, SON), DPs	*	*	
	(b) Introducing regulatory measures on import and sale of inefficient appliances and equipment.	ECN, SON, NCS	FMP, NERC	FGN (ECN)	*	*	
<i>(xvii) Establishing guidelines for energy efficiency best practices in all sectors of the nation's economy.</i>	(a) Developing energy efficiency guidelines for end-use appliances.	ECN	FMP, SON, NERC, OPS, MPR, NGOs, DPs, FMT, FMWH, FMIT&I	FGN (ECN), DPs	*	*	
	(b) Creating enabling environment for the promotion of energy efficiency and conservation in the country.	ECN	NIPC, SON, OPS, NGOs, DPs, FMP, MPR, FMWH, FMT, FMIT&I	FGN (ECN), DPs	*	*	
<i>(xviii) Enforcement of existing Minimum Energy Performance Standards (MEPS) for energy efficient appliances in the residential, industrial and the commercial sectors.</i>	(a) Developing, Revising and implementing MEPS and energy labelling	ECN, SON	FMP, NERC, OPS, MPR, FMT, NGOs, DPs, FMWH, FMIT&I	FGN (ECN, SON)	*	*	

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(xix) Ensuring the certification and accreditation of energy auditors and energy efficiency practitioners.</i>	(a) Developing standards in line with international best practices for energy managers and auditors.	ECN, SON, NAPTIN	FMP, NERC, OPS, MAN, FMIT&I, FMT, FMWH, NNPC	FGN (ECN)	*	*	*
	(b) Implementing qualification accreditation and certification schemes.	ECN, SON, NAPTIN	FMP, NERC, OPS, MAN, FMIT&I	FGN (ECN)	*		
<i>(xx) Integrating energy efficiency and conservation studies into the curricula of educational institutions in Nigeria.</i>	(a) Developing energy efficiency and conservation curricula.	NERDC, ECN, NUC, NBTE, NCCE	FMP, FMed. NGOs, DPs	FGN (ECN, FMed.), DPs	*	*	*
	(b) Organizing sensitization workshops on energy efficiency and conservation curricula.	ECN, NUC, NBTE, NCCE	FMed., NUC, NBTE, NCCE, NERDC	FGN (ECN)	*	*	*
<i>(xxi) Replacing all incandescent light bulbs in every home, industry, institution and establishment in Nigeria with LEDs and other high energy saving lamps by year 2025.</i>	(a) Encouraging the replacement of inefficient lamps with efficient lamps.	ECN	FMP, NGOs, DPs, NERC, OPS FMWH, FMIT&I	FGN (ECN), DPs	*	*	
	(b) Phasing out the importation and sale of inefficient appliances.	NCS, MAN	SON, ECN	FGN (ECN)	*	*	*
<i>(xxii) Achieving the establishment of a broad range of equipment energy efficiency standards and labeling within ten years.</i>	(a) Encouraging importers and manufacturers to increase the efficiency of their products.	ECN, SON, MAN, SMEDAN	MAN, FMIT&I, OPS, NGOs	FGN (ECN, SON)	*	*	
	(b) Taking action, where appropriate, to phase-out subsidies on inefficient appliances.	ECN, SON	NCS, FMFBNP, NIPC, MAN, OPS	FGN (ECN, SON)	*	*	
<i>(xxiii) Reducing the energy-related greenhouse gas emissions 15 % of 2013 level.</i>	(a) Developing framework to ensure energy savings that is equivalent to 1.5 % emission reduction annually.	ECN, SON, MAN	FMEEnv., NESREA, NGOs, DPs	FGN (ECN, SON), DPs	*	*	
	(b) Developing framework for environmental management of the used lamps.	NESREA, MAN	ECN, FMEEnv., DPs	FGN (NESREA), DPs	*	*	

10.1 INDUSTRY

10.1.1 Policies

- i. The nation shall promote the adoption, development and application of industrial energy efficiency and conservation best practices.
- ii. The nation shall require large, energy-intensive industries, and encourage other industrial energy users, to implement cost-effective energy savings best practices, and mandatorily report annually to designated-authorities.
- iii. The nation shall adopt appropriate Minimum Energy Performance Standards (MEPS) for electric motors and other categories of industrial equipment, and implement portfolios of measures to address barriers to the optimization of energy efficiency in the design and operation of industrial systems and processes.
- iv. The nation shall develop and implement a package of specially designed incentives and other measures to promote energy efficiency in small and medium scale enterprises (SMEs).
- v. The nation shall over time, remove energy subsidies and internalize environmental costs to encourage industrial energy efficiency practices.

10.1.2 Objectives

- i. To promote the efficient utilization of all energy types in industrial activities.
- ii. To decouple the rate of growth of industrial energy consumption from the rate of growth in industrial output.
- iii. To bring the energy intensities of industrial sectors in line with international standards and best practices.

10.1.3 Action Plan

Table 10.2: Energy Efficiency and Conservation Plan for the Industrial Sector

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(i) Mandating industries to provide information on equipment energy performance, training initiatives, audits, technical advice documentation, and system-assessment protocols.</i>	(a) Enacting appropriate law mandating industries to provide information on their energy efficiency and conservation related activities.	ECN, FMIT&I	FMP, FMIT&I, SON, OPS, MPR, MAN	FGN (ECN)	*	*	*
	(b) Developing an inventory of industrial energy consuming appliances.	ECN, FMIT&I	FMP, MAN, SON, OPS	FGN (ECN, FMIT&I)	*	*	
	(c) Sensitizing the industrial sector on industrial energy efficiency best practices.	ECN, FMIT&I	FMP, MAN, SON, OPS	FGN (ECN, FMIT&I)	*	*	
<i>(ii) Encouraging effective operational use of information flow in power factor, reduction peak load management and the use of energy efficient equipment and machinery.</i>	(a) Encouraging timely maintenance of equipment.	ECN, FMIT&I, MAN	OPS	FGN (FMIT&I, ECN), OPS	*	*	*
	(b) Encouraging the use of capacitor bank in the industries.	ECN, FMIT&I, MAN	FMP, OPS	FGN (ECN, FMIT&I), OPS	*	*	*
	(c) Institutionalizing energy audit industries	ECN, FMIT&I, SON	OPS, DPs, MAN	FGN (ECN), OPS	*	*	*
	(d) Building the capacity of personnel of relevant agencies to monitor implementation of energy efficiency best practices in industries.	ECN, FMIT&I	FMP, OPS, MAN, DPs	FGN (ECN), OPS	*	*	
<i>(iii) Setting up and promoting Minimum Energy Performance Standards (MEPS) and Labels for electric motors and other categories of industrial equipment such as distribution transformers, compressors, pumps and boilers, etc.</i>	(a) Developing MEPS for industrial machinery	SON, ECN, FMIT&I	ECN, FMIT&I, FMP, NERC, MAN	FGN (SON)	*	*	
	(b) Providing enforcement mechanism to ensure compliance to industrial MEPS.	SON, FMIT&I, NCS	ECN, FMIT&I, FMP, NERC, MAN	FGN (SON)	*	*	
	(c) Building the capacity of implementing agencies to monitor and enforce MEPS.	SON, ECN	ECN, FMIT&I, FMP, NERC, MAN, NAPTIN	FGN (SON)	*	*	

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(iv) Strengthening the existing testing laboratories to support national and regional Labeling and Standards (S&L) programmes.</i>	(a) Developing and implementing an energy labelling programme for the industrial sector.	ECN, SON, FMIT&I	MAN, OPS, FMIT&I, FMP, DPs	FGN (ECN, SON)	*	*	
	(b) Upgrading the existing specialized equipment laboratory to certify locally manufactured and imported electrical appliances and industrial equipment.	SON, FMIT&I	ECN, FMP, FMIT&I, OPS, MAN	FGN (ECN)	*	*	*
<i>(v) Setting up guidelines for implementing energy efficiency projects in the industry, as well as, guidelines for consumers and manufacturers.</i>	(a) Developing industrial energy efficiency implementation guidelines.	ECN, FMIT&I	SON, FMIT&I, MAN, FMP	FGN (ECN)	*	*	
<i>(vi) Strengthening institutional framework to promote energy conservation and efficient use of energy in industries.</i>	(a) Strengthening institutions and agencies promoting energy efficiency best practices in the industrial sector.	ECN, NASS, FMIT&I	NERC, FMP, SON, NNPC, MPR, SMEDAN, MAN, Academia	FGN (ECN)	*	*	
	(b) Building human capacity in the implementation of industrial energy efficiency programmes.	ECN, MAN	FMIT&I, OPS, FMP, MPR, SON, SMEDAN	FGN (ECN)	*	*	*
<i>(vii) Providing high-quality and relevant information on proven practices for energy efficiency in industries.</i>	(a) Disseminating information on industrial energy efficiency best practices.	ECN, MAN	FMP, NOA, MPR, FMIT&I	FGN (ECN)	*	*	
	(b) Intensifying energy efficiency campaign to accelerate the shift to energy efficient appliances in the sector.	ECN, MAN	SON, FMP, NOA, MPR, FMIT&I, OPS	FGN (ECN)	*	*	
<i>(viii) Making available energy performance benchmarking information that can be easily used by industries and structured to allow international and national economy comparisons.</i>	(a) Establishing industrial energy consumption benchmark.	ECN, MAN	NERC, FMP, FMIT&I	FGN (ECN, FMIT&I)	*	*	*
	(b) Creating awareness on the set benchmark.	ECN, MAN	OPS, NERC, FMP, FMIT&I, MPR	FGN (ECN, FMIT&I)	*	*	

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(ix) Encouraging investment in energy-efficient industrial equipment and processes by putting in place targeted financial incentives such as tax incentives for energy-efficient investments in industry (particularly the SMEs).</i>	(a) Creating incentives to promote investments in industrial energy efficiency.	NIPC	ECN, FMFBNP, MAN, FMP, NOA, MPR, FMIT&I, SMEDAN	FGN (NIPC)	*	*	*
	(b) Government to create fund to support the audit of energy usage in the industry.	NIPC	ECN, FMFBNP, MAN, FMP, NOA, MPR, FMIT&I, SMEDAN	FGN (NIPC)	*	*	*
	(c) Special incentives for local manufacturers of electric motors, transformers, pumps, compressors, boilers.	NIPC	ECN, FMFBNP, MAN, FMP, NOA, MPR, FMIT&I, SMEDAN	FGN (NIPC)	*	*	*
<i>(x) Fostering public private financing of energy efficiency upgrades in industry through risk-sharing or loan guarantees with private financial institutions and enabling the market for energy performance contracting.</i>	(a) Providing rebates and other incentives to industries for enhancing energy performance contracting.	NIPC, MAN	FMIT&I, BOI, OPS, SMEDAN	FGN (NIPC), OPS	*	*	
	(b) Encouraging the financial institutions to provide financing opportunities for industrial energy efficiency projects, and federal, state, and local governments to patronize the products of the companies.	ECN, MAN	FMIT&I, BOI, OPS, FMFBNP, FIs, SGs, CBN, MDAs, LGs	FGN (ECN, FMIT&I)	*	*	
<i>(xi) Reducing specific energy consumption of key industrial outfits within the range of international best practices.</i>	(a) Encouraging the establishment of energy units in industries.	ECN, MAN	FMIT&I, OPS, SMEDAN	FGN (ECN, FMIT&I)	*	*	
	(b) Promoting the adoption of state-of-the-art industrial energy efficient appliances and equipment.	ECN, MAN	FMIT&I, SMEDAN, OPS	FGN (ECN, FMIT&I)	*	*	
<i>(xii) Identifying and assessing energy saving opportunities by benchmarking, measuring and documenting energy consumption in industries.</i>	(a) Ensuring all registered corporations submit annually, energy consumption report.	ECN, FMIT&I	FMP, MAN, OPS, CAC, NERC, SMEDAN	FGN (ECN, FMIT&I), OPS	*	*	*
	(b) Establishing industrial energy consumption benchmark.	ECN, FMIT&I	MAN, FMP, OPS, NERC	FGN (ECN, FMP), OPS	*	*	

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
	(c) Creating awareness on the set benchmark.	ECN, FMIT&I	MAN, FMP, OPS, NERC, NOA, DPs	FGN (ECN, FMIT&I), OPS	*	*	
(xiii) Implementing actions to capture identified energy-saving opportunities.	(a) Promoting the adoption of energy efficiency and conservation best practices.	ECN	NERC, FMP, FMIT&I, MAN, SMEDAN, OPS	FGN (ECN)	*	*	
(xiv) Reporting publicly the energy-saving opportunities identified and the actions taken to capture them.	(a) Conducting public enlightenment through workshops, seminar, lectures etc.	ECN	FMP, FMIT&I, MPR, OPS, NERC, NOA, SMEDAN	FGN (ECN), OPS	*	*	*
	(b) Creating energy efficiency and conservation awareness.	ECN	FMP, FMIT&I, SMEDAN, MPR, OPS, NERC, NBRRI	FGN (ECN), OPS	*	*	
	(c) Promoting mandatory energy auditing for medium and large scale industries.	ECN, SMEDAN, MAN	FMP, FMIT&I, OPS, NERC	FGN (ECN, SMEDAN), OPS	*	*	*
(xv) Ensuring that energy audits are carried out by qualified personnel in industry, and the audit reports are widely promoted and easily accessible.	(a) Developing appropriate Industrial Energy Auditor Certification Scheme.	ECN, SON	ECN, NERC, FMP, SMEDAN, FMIT&I	FGN (ECN)	*	*	
	(b) Developing standards in line with international best practices for industrial energy managers and auditors.	ECN, SON	FMP, NERC, OPS, MAN, FMIT&I, SMEDAN	FGN (ECN, SON)	*	*	
	(c) Implementing qualification accreditation and certification schemes for Industrial Energy Auditors.	ECN, SON, SMEDAN	FMP, NERC, OPS, MAN, FMIT&I, NAPTIN	FGN (ECN)	*	*	*
(xvi) Removing energy subsidies and internalizing the external costs of energy through policies such as carbon pricing.	(a) Developing appropriate pricing regime for all energy products.	NERC, NMDPRA	NNPC, ECN, OPS, MPR, FMP	FGN (NERC, NMDPRA)	*	*	
(xvii) Promoting the adoption of the more-efficient industrial equipment and machinery e.g. electric motors and drives in industry with the view to achieving 50 % retrofit by 2030.	(a) Developing MEPS for industrial equipments.	ECN, SON	MAN, FMFBNP, FMP	FGN (SON, ECN)	*	*	
	(b) Establishing mandatory retrofit of inefficient equipment for the industries.	ECN, MAN	FMFBNP, FMP, FMIT&I, BOI, SON	FGN (ECN, SON, FMIT&I)	*	*	

10.2 TRANSPORTATION

10.2.1 Policies

- i. The nation shall ensure the use of energy efficient and environmentally friendly technologies in the transport sector.
- ii. The nation shall vigorously promote the development of mass transit systems.
- iii. The nation shall establish regulations to provide incentives for the purchase and use of higher-efficient vehicles and disincentives for less-efficient vehicles.
- iv. The nation shall encourage and establish an organized and reliable public transportation system.
- v. The nation shall establish energy efficiency, fuel quality and emissions standards for vehicles.
- vi. The nation shall establish and enforce regulations, standards & codes of practice which will stimulate the supply of energy efficient vehicle technologies.
- vii. The nation shall encourage modal shift to public transport or non-motorized modes, walking and cycling, from road to rail and waterways and urban mobility planning.
- viii. The nation shall encourage the enforcement of highway speed limit to 110km/h or lower to save fuel and reduce vehicle emission.
- ix. The nation shall encourage collaboration among relevant stakeholders, institutions and industries towards the development of energy efficiency and conservation in transport sector.
- x. The nation shall encourage carbon credit incentives for the use of non-fossil fuel vehicles.

10.2.2 Objectives

- i. To shift transport to more environmentally friendly and energy efficient modes.
- ii. To reduce energy consumption and greenhouse gas (GHG) emissions from transportation systems.
- iii. To encourage and/or enforce transport fuel efficiency in the design of public and private transport facilities.
- iv. To orient the demand towards more efficient vehicles, and encourage people to drive less.
- v. To lessen the huge reliance on private vehicles for mobility, and encourage car-pooling system.
- vi. To highlight the importance of transport energy and put in place actions to develop a more energy efficient transport system.
- vii. To reduce transport-related environmental pollutions and associated health problems.
- viii. To promote optimum and efficient utilization of petroleum fuels and substitution in order to reduce the nation's dependence on fuel imports, thereby releasing resources to deal with other imperatives and funding for more productive investment.
- ix. To increase public knowledge and awareness of efficiency issues in the transport industry, including specific efficiency indicators.
- x. To increase the overall energy efficiency of local, national and regional transport systems, and promote shifts of passengers and freight to more efficient modes.
- xi. To ensure that transport infrastructure is built to support the most energy efficient transport modes.

10.2.3 Action Plan

Table 10.3: Energy Efficiency and Conservation Plan for the Transport Sector

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(i) Embarking on public education and information programmes on energy efficiency in transport system.</i>	(a) Organizing public awareness programmes on energy efficiency in transport sector.	ECN, FMT	NBS, NURTW DPs, OPS, NUPRC, FMI, NNPC, IPM	FGN (ECN)	*	*	*
	(b) Introducing transport energy efficiency into the nation's education curricular.	ECN, FMT	FMed., NERDC, NUC NOA, NGOs	FGN (ECN), OPS, DPs	*	*	
	(c) Organizing public information campaigns and educational programmes to raise awareness on energy efficient vehicles.	ECN, FMT	FMP, NERC, NOA, NGOs, OPS, DPs, MAN, NBRRI,CPC, NURTW, NNPC	FGN (ECN), OPS, DPs	*	*	
	(d) Organizing campaigns in motor parks and other traffic spots on energy efficiency in the transportation system.	ECN, FMT	FMT, NBS, FMI, NURTW	FGN (ECN)	*	*	*
<i>(ii) Encouraging eco – driving techniques (training courses, awareness raising campaigns) that enable drivers to optimize their car fuel economy.</i>	(a) Organizing training courses, sensitizations and campaigns on the use of eco friendly driving techniques.	ECN, FRSC	FMEnv, FMT, FMI, NOA	FGN (ECN)	*	*	*
	(b) Encouraging local production of fuel economy vehicles.	MPR	ECN, MAN, FMFBNP, FMT	FGN (MPR)	*		
<i>(iii) Creating awareness on fuel economy and CO₂ emissions reduction strategies in transportation sector.</i>	(a) Introducing mandatory energy labeling of vehicles on fuel economy and CO ₂ emission. .	SON, MAN	FMT, ECN	FGN (SON)	*	*	*
	(b) Educating the public on fuel economy and the implication of CO ₂ emissions.	ECN	FMI, NOA, FMT, FMEnv.	FGN (ECN)	*	*	*
<i>(iv) Encouraging sustainable modal shift in transportation like: motorized modes to cycling and walking; private vehicles usage to public mass transport.</i>	(a) Promoting the use of mass transit transport system.	FMT, SGs	FMT, NBS, FMIC	FGN (FMT)	*	*	*
	(b) Providing infrastructure for cycling and walking in the transport systems.	FMT, LGs	FMEnv, FMT, FMI, NOA	FGN (FMT)	*	*	*
	(c) Providing proper town planning to reduce distances between offices and residential areas.	FMWH	FMEnv, FMT, FMI, NOA NITP, ECN	FGN (FMWH)	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(v) Energy use efficiency improvements through the use of less carbon emitting fuels, such as natural gas as well as unleaded fuel.</i>	(a) Promting the use of clean transport fuels.	NNPC, FMT	FMSTI, FMFBNP, NUPRC, OPS, ECN	FGN (NNPC, FMT)	*	*	*
	(b) Introducing mandatory energy labeling of vehicles on fuel economy and CO ₂ emission.	NNPC, FMT	FMSTI, FMFBNP, NUPRC, OPS, ECN	FGN (NNPC, FMT)	*	*	*
	(c) Sensitizing the public on the use of clean transport fuels.	NNPC, FMT	FMSTI, FMFBNP, NUPRC, OPS, ECN, NOA	FGN (NNPC, FMT)	*	*	*
<i>(vi) Reviewing the legislative and other arrangements for public transportation management, regulation and monitoring.</i>	(a) Reviewing existing legislation on public transport management in the country..	FMT	NASS, FMFBNP, OPS, NADDC	FGN (FMT)	*	*	
	(b) Encouraging the private sector to invest and provide services in the public transportation sector.	FMT	OPS, DPs	FGN (FMT)	*	*	
<i>(vii) Introducing measures to encourage the use of cleaner vehicles like labelling, taxation and infrastructure charges, grants and subsidies and srcappage schemes .</i>	(a) Introducing mandatory energy labeling of vehicles on fuel economy and CO ₂ emission.	SON	FMT, ECN, FMPR, FMEnv.	FGN (SON)	*	*	*
	(b) Phasing out vehicles with high CO ₂ emission from the auto mobile market.	SON	FMT, ECN, FMPR, FMEnv.	FGN (SON)	*	*	*
<i>(viii) Implementing and periodically strengthening mandatory fuel efficiency standards for light- and heavy – dutyvehicles; for heavy – duty vehicles; via establishment of testing procedures.</i>	(a) Developing internationally–accepted fuel efficiency standards.	FMT	SON, ECN, FMPR, FMEnv., NASS	FGN (FMT)	*	*	*
	(b) Strengtheningmotor vehicles testing centres. within the country.	FMT	SON, ECN, FMPR, FMEnv., NPA	FGN (FMT)	*		
	(c) Strengthening the relevant government agencies for effective enforcement and monitoring of motor vehicles in relation to vehicle emission.	FMT	VIO, FRSC, FMEnv., ECN	FGN (FMT)	*	*	*
	(d) Discouraging the use of old vehicles.	FMT, VIO	FRSC, FMEnv., NOA	FGN (FMT)	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(ix) Adopting measures such as labelling, incentives and taxes to boost vehicle efficiency and accelerate the market penetration of new efficient vehicle technologies. This should include infrastructure support and incentive schemes for very low CO₂ – emitting and fuel – efficient vehicles.</i>	(a) Providing incentives and tax waivers for the manufacturing of low CO ₂ emitting and fuel efficient vehicles.	FMT, FMFBNP	FMT&I, SON, FMEnv., MAN, NADDC	FGN (FMT)	*	*	*
	(b) Strengthening policies with respect to the sales of very low CO ₂ emitting and fuel efficient vehicles.	SON, ECN	FMT, ECN, FMPR, FMEnv.	FGN (SON)	*	*	*
<i>(x) Improving the performance of tyres, air conditioning, lighting and other non engine components that affect vehicle's fuel efficiency, including mandatory fitting of tyre – pressure monitoring systems on new road vehicles and the introduction of energy efficiency requirements for air conditioning systems.</i>	(a) Providing tyre pressure monitoring systems for road users at subsidized prices to encourage its use.	FMT, NUPRC	DPs, FMFBNP, CBN	FGN (FMT)	*	*	*
	(b) Sensitizing road users on energy efficient airconditioning systems for vehicles.	FMT, ECN	ECN, VIO, NOA	FGN (FMT)	*	*	*
<i>(xi) Increasing progressively km/fuel ratio of automobiles on Nigeria roads by a factor each year to meet international best practices.</i>	(a) Developing international-accepted annual km/fuel mobile ratio.	MPR, FMT	FMT, ECN, NBS, FRSC, VIO	FGN (FMPR)	*	*	*
	(b) Periodic review of the annual automobile ratio.	MPR, FMT	FMT, ECN, NBS, FRSC, VIO	FGN (FMPR)	*	*	*
<i>(xii) Ensuring better integration between different public transport systems, walking and cycling.</i>	(a) Developing framework for the proper design of the different modes of transportation.	FMT	VIO, FMPR, NASS, FMEnv	FGN (FMT)	*	*	*
	(b) Integrating energy efficiency into the design and building of transport systems.	FMT, ECN	VIO, FMPR, NASS, FMEnv	FGN (FMT)	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
	(c) Building human capacity in the implementation of transport energy efficiency programmes.	FMT, ECN	VIO, FMPR, NASS, FME _{env} .	FGN (FMT)	*	*	*
<i>(xiii) Enforcing appropriate legislation on fuel economy standards, including compulsory fitting of certified speed limiters.</i>	(a) Integrating energy efficiency best practices into the existing National Transport Policy.	FMT, FRSC, VIO	VIO, FMPR, NASS, FME _{env} .	FGN (FMT)	*	*	*
	(b) Introducing mandatory fitting of speed limiters in vehicles.	FMT, FRSC, VIO	VIO, FMPR, NASS, FME _{env} .	FGN (FMT)	*	*	*
<i>(xiv) Mandating installation of pollution control devices such as catalytic converters in vehicular exhaust emission systems and the implementation of tougher legislation relating to exhaust emissions.</i>	(a) Enforcing the use of catalytic converters in vehicle's exhaust systems.	FMT, VIO	VIO, FMPR, NASS, FME _{env} .	FGN (FMT)	*	*	*
	(b) Ensuring that vehicle inspection criteria include exhaust systems.	FMT, VIO	VIO, FRSC, FME _{env} .	FGN (FMT)	*	*	*
<i>(xv) Enforcing periodic emission testing, including: Implementing, monitoring and disseminating mandatory standards/regulations for vehicle efficiency.</i>	(a) Developing MEPS for automobiles.	FMT, SON	VIO, SON, FMPR, ECN, NASS, FME _{env} .	FGN (FMT)	*	*	*
	(b) Establishing testing laboratories for the efficiency of automobiles.	FMT, SON, ECN	VIO, FRSC, FME _{env} .	FGN (FMT)	*	*	*
	(c) Building human capacity on enforcement of automobiles MEPS.	FMT, ECN	VIO, SON, FMPR, ECN, NASS, FME _{env} .	FGN (FMT)	*	*	*
<i>(xvi) Preparing master plan to include route evaluations, costs, efficiency, parking fees including reducing the flow of traffic within city limits, and ensuring the enforcement of adopted measures.</i>	(a) Developing masterplan for reducing flow traffic	FMT, FRSC	NESREA, VIO, OPS, NAC	FGN (FMT)	*	*	*
<i>(xvii) Introducing car purchase and circulation taxes, which are dependent on the fuel efficiency or CO₂ emissions of the vehicle.</i>	(a) Providing car purchase, incentives and circulation taxes for fuel efficient vehicles	FMT, NCS, FMFBNP	NASS, FME, NESREA	FGN (FMT)	*	*	

10.3 RESIDENTIAL

10.3.1 Policies

- i. The nation shall promote the use of energy efficient and environmentally friendly technologies in the residential sector.
- ii. The nation shall promote energy efficiency standards for heating and air conditioning systems, appliances, and other plug-in-loads such as lighting and consumer electronics in residential homes.

10.3.2 Objectives

- i. To combat health-sensitive indoor pollutants.
- ii. To reduce the effects of peak demand on power capacity.
- iii. To introduce labeling/efficiency standards for household appliances.
- iv. To introduce state-of-the-art energy-efficient technologies in residential sector.

10.3.3 Action Plan

Table 10.4: Energy Efficiency and Conservation Plan for the Residential Sector

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(i) Promoting local content development and use of energy efficient domestic cookstoves in the residential sector.</i>	(a) Carrying out demonstration projects on energy efficient cookstoves in residential sector.	ECN	ECN, FMEnv., SON, NOA, NBRRI, TI, RIs, RCs	FGN (FMEnv.), OPS, DPs	*	*	*
	(b) Providing subsidized cookstoves to end-users.	ECN	ECN, FMEnv., SON, NBRRI, TI, RIs, RCs, NGOs	FGN (FMEnv.), OPS, DPs	*	*	*
	(c) Creating effective markets for energy efficient cookstove in Nigeria.	ECN	ECN, FMEnv., SON, NBRRI, TI, RIs, RCs, NOA, NGOs	FGN (FMEnv.), OPS, DPs	*	*	*
	(d) Encouraging R and D on energy-efficient cookstoves.	ECN	ECN, FMEnv., SON, TETFUND, NBRRI, TI, RIs, RCs	FGN (FMEnv.), OPS, DPs	*	*	*
<i>(ii) Designing, promoting and implementing Minimum Energy Performance Standards (MEPS) and mandatory labeling for household energy consuming appliances.</i>	(a) Developing MEPS for household appliances.	SON, ECN	ECN, FMIT&I, FMP, NERC, MAN, NBRRI, NEMSA, OPS,	FGN (SON)	*	*	
	(b) Providing enforcement mechanism to ensure compliance to residential MEPS	SON	ECN, FMIT&I, FMP, NERC, MAN, FMWH	FGN (SON)	*	*	
	(c) Building human capacity on enforcement of MEPS in the residential sectors.	SON	ECN, FMIT&I, FMP, NERC, MAN, NOA, FMWH, NBRRI, NGOs	FGN (SON)	*	*	
<i>(iii) Raising awareness on the cost-benefits of energy efficiency in the homes.</i>	(a) Organizing public awareness programmes on energy efficiency in the residential sector.	ECN, FMWH, NOA	NBRRI, NBS, DPs, OPS, NUPRC, FMC&I,	FGN (ECN)	*	*	*
	(b) Introducing household energy efficiency into subjects/courses of the nation's education curricular.	ECN, FMWH	FMed, NERDC, NUC, NCCE, NBTE, NOA, NGOs,	FGN (ECN), OPS, DPs	*	*	

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
	(c) Organizing public information campaigns and educational programmes to raise awareness on energy efficient household appliances.	ECN, FMWH, NUC, NBTE, NCCE	FMP, NERC, NOA, NGOs, OPS, DPs, MAN, NBRRI, CPC, FCC&PC	FGN (ECN), NNPC OPS, DPs	*	*	
<i>(iv) Establishing demonstration projects to encourage investment in energy efficiency measures in the residential sector.</i>	(a) Carrying out demonstration retrofitting projects in residential sector.	ECN, NBBRI	ECN, NCS, DPs, SON, FMWH, NBBRI	FGN (ECN), DPs	*	*	
	(b) Providing subsidized energy efficient appliances to end-users in the residential sector.	ECN	ECN, NCS, DPs, SON, FMWH, NBRRI	FGN (ECN), DPs	*	*	
	(c) Creating effective markets for energy efficient appliances in Nigeria.	ECN, MAN, SMEDAN	ECN, NCS, DPs, SON, FMWH, NBRRI	FGN (ECN), DPs	*	*	
<i>(v) Encouraging widespread adoption of energy saving lamps e.g. light-emitting diodes (LEDs) and compact fluorescent lamps (CFLs) and the phasing-out of inefficient lamps e.g. incandescent bulbs.</i>	(a) Providing energy efficient lamps at subsidized rates.	ECN, NIPC	FMFBNP, OPS, SON, FMP, DPs	FGN (ECN), DPs	*	*	
	(b) Encouraging the replacement of inefficient lamps with efficient ones.	ECN	FMP, FMFBNP, NGOs, DPs, NERC, OPS, MPR, FMWH	FGN (ECN), DPs	*	*	*
	(c) Phasing out the importation and sale of inefficient lamps.	ECN, NCS	FMP, FMEd. NUC, NBTE, NCCE, NGOs, DPs, NERC, OPS, MPR, FMWH	FGN (ECN), DPs	*	*	*
	(d) Encouraging local manufacturing of energy saving lamps.	ECN, MAN, SMEDAN	FMP, NCCE, NGOs, DPs, NERC, OPS, MPR, FMWH	FGN (ECN), DPs	*		
	(e) Highway streetlights to be replaced with energy efficient lamps	ECN, FMWH	FMP, FMT, NEMSA, NGOs, DPs, NERC, OPS, FMWH	FGN (ECN), DPs	*	*	
<i>(vi) Encouraging a shift towards modern energy services and more energy-efficient household appliances through utility end-use energy efficiency schemes such as the Demand Side Management (DSM) techniques.</i>	(a) Intensifying Demand Side Management programmes in the electricity distribution g companies.	DISCOs	SON, DPs, FMH, NERC, DISCOs	FGN (SON)	*	*	

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE

<i>(x) Achieving within ten years universal access to safe, clean, affordable, efficient and sustainable cook stoves/fuel switching to LPG in all households.</i>	(a) Sensitizing households on efficient and sustainable cookstoves/clean cooking fuels.	ECN	FMSTI, NUC, NBTE, NCCE, TIs, RIs	FGN (ECN)	*	*	*
	(b) Intensifying research on energy efficient cookstoves.	ECN	FMSTI, NUC, NBTE, NCCE, TIs, RIs	FGN (ECN)	*		
	(c) Creating incentives for fuel switching to LPG and mass production of efficient cookstoves and household cooking fuel consumption data..	ECN	FMFBNP, FMSTI, MAN, OPS, DPs, PAs	FGN (ECN), DPs	*	*	

10.4 COMMERCIAL/SERVICES

10.4.1 Policies

- i. The nation shall ensure the use of energy efficient and environmentally friendly technologies in the commercial sector.
- ii. The nation shall promote the adoption and development of energy efficiency and conservation best practices in the commercial and services sector.
- iii. The nation shall require large, energy-intensive commercial/services companies, to implement cost-effective energy savings best practices, and periodically report on their efforts to designated authorities.
- iv. The nation shall develop and adopt appropriate energy efficiency codes and standards for horizontal technologies and machineries used in the commercial sector.
- v. The nation shall adopt appropriate Minimum Energy Performance Standards (MEPS) for major energy-consuming appliances and equipment.
- vi. The nation shall promote energy efficiency standards for heating and air conditioning systems, appliances, and other plug-in loads such as lighting and consumer electronics in commercial/services sector.

10.4.2 Objectives

- i. To promote a reliable and efficient use of energy with minimal negative environmental impact through the use of energy efficient technologies and gradual transition to modern energy services.
- ii. To promote the efficient utilization of all energy types in commercial/services activities.
- iii. To demonstrate the Government's commitment to sustainable energy development within its own building stock.
- iv. To progressively upgrade the energy performance of existing public and commercial building stock.
- v. To achieve best practice energy performance in new public and commercial building stock.

10.4.3 Action Plan

Table 10.5: Energy Efficiency and Conservation Plan for the Commercial/Services Sector

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(i) Enforcing existing minimum energy performance standards (MEPS) for energy-related equipment and appliances for the sector.</i>	(a) Developing MEPS for appliances used in the commercial/service sector.	SON, ECN	ECN, FMIT&I, FMWH,, FMP, NERC, MAN, SMEDAN	FGN (SON)	*	*	*
	(b) Providing enforcement mechanism to ensure compliance to MEPS.	SON, ECN, NCS	ECN, FMIT&I, FMP, NERC, MAN, SMEDAN, FMWH,	FGN (SON)	*	*	*
	(c) Building human capacity on the development of MEPS and its enforcement in the Commercial/Services Sector.	SON	ECN, FMIT&I, FMP, NERC, MAN, SMEDAN, FMWH,	FGN (SON)	*	*	*
<i>(ii) Encouraging the widespread adoption of light-emitting diodes (LEDs), compact fluorescent lamps (CFLs) and other high energy saving lamps, and the phase-out of incandescent bulbs for services sector lighting in order to reduce electricity demand.</i>	(a) Providing energy efficient lamps at subsidized rates.	ECN, NIPC	FMFBNP, OPS, SON, FMP, DPs	FGN (ECN), DPs	*	*	*
	(b) Encouraging the replacement of inefficient lamps with efficient ones.	ECN	FMP, NGOs, DPs, NERC, OPS, FMWH,	FGN (ECN), DPs	*	*	*
	(c) Phasing out the importation and sale of inefficient lamps.	ECN, SON, NCS	FMP, NGOs, DPs, NERC, OPS, FMIT&I, FMWH,	FGN (ECN), DPs	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(iii) Encouraging a shift towards modern energy services and more energy-efficient services sector appliances through (utility end-use energy efficiency schemes such as the Demand Side Management (DSM) techniques.</i>	(a) Organizing periodic technology fair on the results of energy efficiency R&D.	ECN	FMSTI, RCs, RIs, TIs, DPs, FMed.	FGN(ECN)	*	*	*
	(b) Intensifying Demand Side Management programmes in the electricity companies.	GENCOS	SON, DPs, FMH, NERC, DISCOs, TCN	FGN (SON)	*	*	
<i>(iv) Creating framework for the adoption and installation of smart meters or Pay As You Consume (PAYC) meters.</i>	(a) Installing smart meters in commercial buildings nationwide by 2025.	NERC, DISCOs	FMWHNGOs, CBOs, OPS, DPs, ECN, FMP	FGN (NERC)	*	*	*
	(b) Sensitizing end-users on the benefits of smart Meters.	NERC, DISCOs NOA	FMWH, NGOs, CBOs, OPS, DPs, ECN, FMP	FGN (NERC)	*	*	*
	(c) Ensuring the availability of smart meters in all households at subsidized rates.	NERC, DISCOs	FMWH, NGOs, CBOs, OPS, DPs, ECN, FMP	FGN (NERC)	*	*	*
<i>(v) Equipping 50 % of educational institutions and all health centers, and 15 % of all hotels and agro-food industries with solar thermal heating systems to meet their hot water needs within 10 years..</i>	(a) Promoting the installations of solar thermals in schools, hotels and SMEs.	NERC, ECN, NOA	FMSTI, FMed., SGs, LGs, RIs, TIs, ECN	FGN (ECN), OPS	*	*	*
	(b) Providing solar thermal heating systems at subsidized rate to meet energy demand target.	ECN, FMP	FMP, FMSTI, FMFBNP, DPs, OPS	FGN (ECN)	*	*	
	(c) Encouraging health centres, hotels and agro food industries make use of solar thermal heating systems.	ECN, FMH, NUC, NBTE, NCCE, MAN, SMEDAN	FMP, NOA, FMI	FGN (ECN)	*	*	

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(vi) Upgrading progressively the energy performance of existing public and commercial building stock.</i>	(a) Establishing energy management unit to monitor and documents the energy usage of the building.	SON, ECN	ECN, FMWH,NBRRI, DPs	FGN(ECN)	*	*	
	Producing annual energy performance standard	SON, ECN	ECN, FMWH,NBRRI, DPs	FGN(ECN)		*	*
<i>(vii) Achieving best practice energy performance in new public and commercial building stock.</i>	Complying to minimum energy performance standards	SON	ECN, FMWH,NBRRI, DPs, NEMSA	FGN(ECN)	*	*	
<i>(viii) Promoting energy efficiency award for commercial/service sector</i>	Organizing annual award night per each geo-political zone for commecial and service sector	ECN	ECN, FMWH,NBRRI, DPs, NEMSA	FGN(ECN), DPs	*	*	

10.5 BUILDING DESIGNS

10.5.1 Policies

- i. The nation shall integrate and implement energy efficiency building designs and conservation techniques and principles into the construction of a new building and retrofitting existing ones to be more-energy-efficient.
- ii. The nation shall promote passive design techniques in building designs.
- iii. The nation shall promote, implement and enforce building energy efficiency codes

10.5.2 Objectives

- i. To ensure that the energy needs of buildings are met safely, efficiently and at reasonable prices.
- ii. To minimize the environmental impact of energy production and use in buildings.
- iii. To promote the efficient use and conservation of energy in buildings.

10.5.3 Action Plan

Table 10.6 Energy Efficiency and Conservation Plan for Building Designs

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
(i) <i>Establishing Building Energy Consumption Indicators and Benchmarks for buildings.</i>	(a) Developing energy efficiency building indicators and benchmarks.	ECN	NBRRI, FMP, OPS	FGN (ECN)	*	*	*
(ii) <i>Initiating National Energy Efficiency Awards to draw public and professional attention and to encourage wider acceptance of the building energy efficiency and conservation codes.</i>	(a) Initiating annual award for most energy efficient buildings in the public and private sector.	ECN	NBRRI, FMP, OPS, FMWH, DPs	FGN (ECN)	*	*	*
(iii) <i>Introducing energy audit programs in buildings.</i>	(a) Developing accreditation scheme for energy auditors in the building sector.	ECN	NBRRI, FMP, OPS, FMWH, DPs	FGN (ECN)	*	*	*
	(b) Providing capacity building for the existing energy auditors.	ECN	NBRRI, FMP, OPS, FMWH, DPs	FGN (ECN)	*	*	*
	(c) Building capacity of Architects, Builders and other experts in the building sectors on energy efficiency best practices.	ECN	NBRRI, FMP, OPS, FMWH, DPs, Relevant Professional Bodies	FGN (ECN)	*	*	*
(iv) <i>Establishing guidelines for energy efficient practices in all government buildings.</i>	(a) Integrating energy efficiency into the existing building codes.	ECN	FMW, FMP, FMWH, DPs	FGN (ECN)	*	*	*
(v) <i>Integrating the use of passive designs and climatic conditions in (e.g. day lighting and natural ventilation).</i>	(a) Building capacity of relevant agencies/organizations to encourage energy efficiency best practices in the building sector.	ECN	FMW, FMP, FMEnv., FMWH, DPs	FGN (ECN)	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(vi) Enforcing building energy-efficiency and conservation standards and codes.</i>	(a) Integrating energy efficiency in to the existing building codes.	ECN	FMWH, FMP, SON, DPs, FCCPC	FGN (ECN)	*	*	*
<i>(vii) Promoting the adoption of an Energy Efficiency Registration Scheme for buildings.</i>	(a) Developing and adopting energy efficiency registration scheme for buildings in Nigeria.	ECN	FMW, FMP, SON, FMWH, DPs, FCCPC, NBRRI	FGN (ECN)	*	*	*
<i>(viii) Introducing Green Building Standard and Certification System (GBDCS).</i>	(a) Developing certification programme for green buildings.	ECN	FMW, FMP, SON, FMWH, DPs, FCCPC, NBRRI, FMEnv.	FGN (ECN)	*	*	*
<i>(ix) Creating Building Energy Consumption Databases/Energy End-Use Database.</i>	(a) Developing database for energy consumption of building	ECN	NBS, FMP, NBRRI DISCOs	FGN (ECN)	*	*	*
<i>(x) Developing a framework for incentivizing energy efficiency by development control authorities nationwide.</i>	(a) Creating a framework for the development of appropriate incentives.	ECN	FMWH, NBRRI, DPs	FGN (ECN)	*	*	*
	(b) Creating market incentives for the adoption of energy efficient technologies	ECN	FMWH, NBRRI, DPs	FGN (ECN)	*	*	*

10.6 AGRICULTURE

10.6.1 Policies

- i. The nation shall promote the development and adoption of energy efficiency and conservation best practices in entire agricultural value chain.
- ii. The nation shall develop and adopt appropriate energy efficiency codes and standards for farm machineries and equipment.

10.6.2 Objectives

- i. To promote the efficient utilization of all energy types in agricultural activities.
- ii. To reduce energy use in agricultural practices while increasing outputs.

10.6.3 Action Plan

Table 10.7: Energy Efficiency and Conservation Plan for the Agricultural Sector

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE

<i>(i) Improving the efficiency of irrigation pump set.</i>	(a) Intensifying R & D effort in developing energy efficient irrigation pump set.	FMA&RD	ECN, RCs, RIs, TIs, DPs, OPS	FGN (FMA&RD)	*	*	*
	(b) Creating awareness on efficient irrigation pump sets in Nigeria.	FMA&RD	ECN, RCs, RIs, TIs, DPs, OPS	FGN (FMA&RD)	*	*	*
<i>(ii) Increasing the efficiency of non – pumping farm machinery.</i>	(a) Developing MEPS for farm machinery and equipments	FMA&RD	ECN, RCs, RIs, TIs, DPs, OPS	FGN (FMA&RD)	*	*	*
	(b) Providing enforcement mechanism for MEPS of farm machinery and equipments.	FMA&RD	ECN, RCs, RIs, TIs, DPs, OPS	FGN (FMA&RD)	*	*	*
<i>(iii) Minimizing the need for traction through low – tillage agriculture.</i>	(a) Promoting the use of efficient traction equipment.	FMA&RD	ECN, RCs, RIs, TIs, DPs, OPS	FGN (FMA&RD)	*	*	*
<i>(iv) Using energy efficient equipment and machinery for post – harvest drying and storage.</i>	(a) Commercializing the existing R&D on energy efficiency post harvest drying and storage equipment.	FMA&RD	FMIT&I, ECN, RIs, RCs, FMSTI, NOTAP, OPS	FGN (FMA&RD)	*	*	*
	(b) Improving on the existing R & D outputs for post-harvest drying and storage.	FMA&RD	FMIT&I, ECN, RIs, RCs, FMSTI, NOTAP, OPS	FGN (FMA&RD)	*	*	*

CHAPTER ELEVEN

ENVIRONMENT AND CLIMATE CHANGE

11.0 Introduction

The major environmental problems related to energy production, distribution and consumption in the country are mainly deforestation and pollution among others.

From available statistics, the nation's 15 million hectares of forest and woodland reserves could be depleted within the next fifty years. These would result in negative impacts on the environment, such as soil erosion, desertification, loss of biodiversity, micro-climatic change and flooding. Most of these impacts are already evident in different ecological zones in the country, amounting to huge economic losses and health challenges.

Pollution is the other major environmental concern. Combustion of fossil fuels, especially in the transport and industrial sectors, contributes greatly to air pollution in our major cities. The combustion products (CO₂, N₂O, CH₄ etc.) are greenhouse gases (GHGs) that lead to global warming, with attendant negative consequences on agriculture, water supply, forest resources, sea level rise, health, etc. Another source of air pollution is the continued flaring of large volumes of natural gas in the oil fields in the Niger Delta. Presently efforts are being made by the government to reduce gas flaring through gas gathering projects with some registered under the Clean Development Mechanism (CDM) of the Kyoto Protocol which Nigeria ratified on 10 December, 2004. Currently, the new market mechanism of the Paris Agreement will operate under article 6.2 and 6.4 of the Agreement.

In addition to air pollution, there is substantial water and land pollution occurring due to oil spillage during oil production and distribution. Over the years, oil spillage has had significant adverse impact on aquatic resources and land degradation.

There is need for collaboration with the Nigerian Meteorological Agency (NiMet) for provision of Meteorological services and information which includes real-time meteorological data – observations of temperature, wind velocity, rainfall, solar radiation and satellite imagery. Short-term and climatological forecast of these parameters. This data will be structured in a way that will help all the stakeholders (public, investors and policy-makers) make the best possible decisions for activities affected by weather and climate.

As a result of these possible negative impacts, there is a need to incorporate environmental considerations into the nation's energy development and utilization to ensure bio-diversity and water are protected.

11.0.1 Policy

- i. The nations energy resources shall be exploited, distributed and utilized in an environmentally friendly and sustainable manner.

11.0.2 Objective

- i. To ensure that in the course of producing, processing, distribution and utilizing energy, the environment is adequately protected.

11.0.3 Action Plan

Table 11.1: Action Plan for Environment and Climate Change

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(i) Ensuring the existence of adequate environmental standards for all major energy production, transportation, distribution, transmission and utilization operations.</i>	(a) Reviewing, updating and harmonizing the existing “Guidelines and standards for environmental pollution control in Nigeria” especially as they relate to energy production, supply and utilization.	FMEnv.	ECN, NERC, NADDC, NNRA, NUPRC, NOSDRA, DPs, NESREA, SON, NiMet	FGN (FMEnv.)	*	*	*
<i>(ii) Strengthening and monitoring of the relevant regulatory agencies in order to ensure the enforcement and compliance of appropriate set standards.</i>	(a) Reviewing the terms of reference and laws of environmentally relevant regulatory institutions with a view to strengthening them.	FMEnv.	ECN, NADDC, NUPRC, NERC, SON, FMJ, MMSD, NNRA, NOSDRA, NESREA	FGN (FMEnv.)	*	*	*
	(b) Reactivating and upgrading the Environment Reference Laboratories, and revising their institutional supervision, financial and operational arrangement for greater effectiveness in the execution of their mandates.	FMEnv.	ECN, NADDC, NUPRC, NERC, SON, MMSD, NNRA, FMJ, NOSDRA, NESREA	FGN (FMEnv.)	*	*	*
<i>(iii) Setting appropriate targets for the attainment of definite progress in the mitigation and control of energy related environmental problems.</i>	(a) Establishing definite targets and timelines for the attainment of specific environmental quality parameters.	FMEnv.	NNPC, ECN, NUPRC, OPS, DPs, NESREA, NOSDRA,	FGN (FMEnv.)	*	*	*
	(b) Developing and implementing projects on natural gas power plants, Petrochemical plants, LNG plants, and gas re-injection to ensure complete phase out of gas flaring as soon as possible.	NNPC, FMEnv.	NERC, NUPRC, REA, OPS, FMP, IPPs, FMEnv., NOSDRA	FGN (FMEnv., NNPC), OPS, DPs	*	*	*
	(c) Ensuring 10% reduction in energy-related emissions by 2030.	FMEnv.	ECN, FMT, FMIT&I, OPS, SON, NADDC, NDDC, NESREA	FGN (FMEnv.), OPS, DPs	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
	(d) Ensuring 5% replacement of fuelwood with alternative energy sources by 2030.	FMEnv.	ECN, FMSTI, FMIT&I, OPS, SON, NGOs, CBOs, NESREA, FMWA	FGN (FMEnv.), OPS, DPs, NGOs	*	*	*
<i>(iv) Putting in place appropriate programmes to ensure the attainment of the set target for the mitigation and control of energy related environmental problems.</i>	(a) Establishing a country-wide environment information network and database on energy-related pollutants.	FMEnv.	NNRA, FMWA&SD, NADDC, NNPC, NGOs, CBOs, ECN, FMIT&I, NERC, OPS, DPs, NESREA, NOA, NOSDRA	FGN (FMEnv.), OPS, DPs	*	*	
	(b) Designing and sponsoring publicity through the print and electronic media on energy-related environmental problems, their mitigation and adaptation.	FMEnv.	NNRA, FMA&RD, NADDC, NNPC, NGOs, CBOs, ECN, FMIT&I, NERC, OPS, DPs, NESREA, MEDIA, NOA, FMWA	FGN (FMEnv.), NNPC, FMIT&I), OPS, DPs	*	*	*
	(c) Carrying out massive sensitization and awareness campaign on energy related environmental problems, their mitigation and adaptation.	FMEnv.	NNRA, NADDC, DPs, FMWA&SD, ECN, NNPC, NGOs, CBOs, FMIT&I, NERC, OPS, Media	FGN(FMEnv., NNPC), OPS, DPs	*	*	*
	(d) Monitoring of development trends in energy supply and utilization and their impact on the environment.	ECN	FMEnv., MMSD, OPS, FMP, FMSTI, NERC, NiMet, NOSDRA	FGN (ECN), OPS, DPs	*	*	*
	(e) Establishing coal and biomass briquetting plants.	MMSD	ECN, SGs, LGs, OPS	FGN (MMSD)	*	*	*
	(f) Extending the 8-yr age ban on importation of used cars to include all categories of vehicles and machineries.	FMFBNP	MPA, FMT, SON, OPS, FRSC, NCS, NADDC, NESREA, VIO	FGN (FMFBNP)	*	*

CHAPTER TWELVE

OTHER ENERGY ISSUES

12.1 Research and Development

The crucial dependence of the sustainable socio-economic advancement of any nation on research and development activities is now universally acknowledged. This dependence is applicable also to the development of vital sectors of the national economy, including the energy sector. For this sector therefore, it is important that research and development are given adequate attention with regards to key issues such as energy resources development and utilization.

12.1.1 Policy

- i. The nation's energy resources shall be developed and utilized on a sustainable basis through research and development.
- ii. All viable innovation generated as a result of R&D activities should be protected with Intellectual Property (IP) right.

12.1.2 Objectives

- i. To initiate and promote energy related research and development programmes; and ensure that such programmes are applications- oriented and market driven.
- ii. To promote participation in research and development by Nigerians in all areas of energy exploration, development and utilization.
- iii. To develop intermediate and high level manpower through research and development, training and retraining.

12.1.3 Action Plan

Table 12.1: Research and Development Plan

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(i) Developing and promoting local capability in the nation's energy centers, secondary / technical colleges tertiary institutions and research institutes for the design and fabrication of efficient energy devices and technologies for the utilization of renewable energy resources.</i>	(a) Establishing priorities and setting targets for capacity building of research personnel and scientific officers in the nation's energy centres and research institutes for the acquisition of state –of- the- art techniques in design, fabrication and testing of energy-efficient devices.	ECN	FMSTI, RCs, RIs, TIs, DPs, FMed., NUC, TETFUND	FGN (ECN)	*	*	*
	(b) Upgrading and equipping with full funding existing research centres and institutes to centres of excellence for the design and fabrication of efficient energy devices and technologies for the utilization of renewable energy resources.	ECN	FMSTI, RCs, RIs, TIs, DPs, FMed.	FGN (ECN)	*	*	*
<i>(ii) Promoting the demonstration and dissemination of renewable energy devices and technologies for their adoption and market penetration.</i>	(a) Organizing periodic technology fair on the results of energy R & D.	ECN, NOTAP	FMSTI, RCs, RIs, TIs, DPs, FMed., RMRDC	FGN(ECN, NOTAP)	*	*	*
	(b) Setting up linkages and consultancy units within the research centres for patenting of R & D outputs and their eventual incubation.	ECN	FMSTI, RCs, RIs, TIs, DPs, FMed., FMIT&I, NOTAP	FGN(ECN)	*	*	*
	(c) Designing and sponsoring publicity programmes through the print and electronic media on the effectiveness and cost benefits of renewable energy devices.	ECN	FMSTI, FMIT&I, RCs, RIs, TIs, SGs, LGs, OPS	FGN (ECN), OPS, SGs, LGs	*	*	*
	(d) Acquiring and equipping mobile demonstration vans for promotion and demonstration of renewable energy technology devices.	ECN	NOA, FMSTI, FMIT&I, RCs, RIs, TIs, SGs, LGs, OPS, NGOs	FGN (ECN), OPS, SGs, LGs	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
	(e) Bridging the gap between academia and the industry with regards to research and development	ECN, NBTI, FMSTI	FMed, FMIT&I, NUC, TETFUND, RCs, TIs, RIs, OPS, NGOs	FGN (ECN), TETFUND	*	*	*
	(f) Devopment of national interlectual property policy(IP) on Energy to enhance and stimulate R&D activities in energy	ECN, NOTAP, FMSTI	RI, FMIT&I, FMed		*	*	*
<i>(iii) Monitoring and assessing international technological development in all energy areas; and initiating and sustaining local capability for their applications in all sectors of the economy.</i>	(a)Expanding the mandate of the linkage and consultancy units in the research centres to include monitoring and assessment of international technological developments and products in all energy areas for their local adaptation and application.	ECN	FMSTI, MFA, NOTAP	FGN(ECN)	*	*	*
	(b) Ensuring participation in, and organizing international conferences, workshops and fairs to keep abreast of technological developments.	ECN	FMSTI, OPS, DPs, TIs, RIs, RCs, TETFUND, PTDF, NPC, AUDA-NEPAD	FGN(ECN)	*	*	*
<i>(iv) Initiating and promoting energy educational programmes and research activities insecondary / technical colleges, tertiary institutions and research institutes.</i>	(a) Developing and mainstreaming curricula on energy education and energy programmes for primary, secondary and tertiary institutions.	ECN	FMSTI, FMed., NERDC, UBEC, NUC, NBTE, TIs, RIs, SGs, LGs	FGN (ECN), DPs	*	*	*
<i>(v) Encouraging result oriented research and development in the energy sector by making expenditure on such efforts tax deductible.</i>	(a)Making upward review of existing fiscal incentives on funding result-oriented R & D by the private sector.	ECN	FMSTI, FMFBNP, OPS, RCs, RIs, Tis, CBN	FGN (ECN), OPS	*	*	*
	(b) Sensitizing the OPS on the importance of letting out their energy related problems for research to R & D institutions and Centres.	ECN	FMSTI, OPS, TIs, RIs, RCs	FGN (ECN), OPS	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
	(c) Improving the percentage of energy R&D handled by indigenous research institutes.	ECN	FMIT&I, RCs, RIs, TIs, FMSTI, OPS, DPs	FGN (ECN), OPS	*	*	*
<i>(vi) Establishing research and development training programmes for the development of specialized energy manpower.</i>	(a) Ensuring implementation of the national energy manpower development plan.	ECN	FMed., FMSTI, FMIT&I, OPS, DPs, NERC, NNPC, FME, FML&E, FMWA&SD	FGN (ECN), OPS	*	*	*
<i>(vii) Selecting and deploying appropriate energy technologies through research and development.</i>	(a) Creating more research centers to adopt/adapt and reverse engineer appropriate technology systems for proliferations and deployment.	ECN	FMSTI, RCs, RIs, NASENI	FGN (ECN)	*	*	*
	(b) Funding of research and development infrastructures adequately.	FMSTI	ECN, RCs, RIs, TIs, TETFUND	FGN (ECN)	*	*	*
<i>(viii) Encouraging the energy producing and processing companies to set up research and development outfits in the country and to make use of research and development institutions in Nigeria</i>	(a) Creating awareness on the need to have research and development unit in every company	ECN	FMSTI, RMRDC	FGN (ECN)	*	*	*
	(b) Providing financial incentives by way of tax holiday or tax rebate and corporate social responsibility.	FMFBNP	NIPC, FIRS, FMIT&I, CSR, OPS	FGN (FMFBNP)	*	*	*
<i>(ix) Energy Commission of Nigeria should relate with relevant MDAs to ensure that all viable innovations in the energy sector is protected.</i>	(a) Addition of an energy innovation gallery/archive to the energy data bank, that can be accessible to the general public on request.	ECN	FMSTI, FMP, MPR, NOTAP, OPS, NBS	FGN (ECN)	*	*	*

12.2 Manpower Development and Training

Sufficient and well trained manpower is critical in the energy sector as it constitutes the main pivot in the overall functioning of the entire energy organs, both in the public and private sectors of the economy. Currently, there seems to be a significant lack of indigenous energy manpower training experts in the country. There is inadequacy in capacity building – manpower training and development. Compared to the population of the country, there are insufficient energy related courses in most tertiary institutions in the country. It is necessary to provide linkages with related professional bodies both within and outside the country. Efforts must therefore be made by all to ensure manpower development and training in the nation’s energy sector.

12.2.1 Policy

- i. The nation shall promote manpower development and training in the nation’s energy sector.

12.2.2 Objective

- i. To develop the human capacity needed to meet the manpower requirement of the nation’s energy sector.

12.2.3 Action Plan

Table 12.2: Action Plan for Manpower Development and Training

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(i) Establishing a national human resource data base in the energy sector.</i>	(a) Conducting periodically a national manpower survey to determine the human resource needs and supply in the energy sector.	ECN	NBS, NPC, NBTE, NUC, CBN, NISER, OPS, DPs, Professional Bodies	FGN (ECN), OPS, DPs	*	*	*
	(b) Disseminating the report of the surveys to stakeholders.	ECN	NBTE, OPS, NBS, MI, NPC, NUC, CBN, DPs, NISER, Professional Bodies	FGN (ECN, NISER), OPS, DPs	*	*	*
	(c) Updating the National Human Resource Database.	ECN	NBTE, OPS, NBS, MI, NPC, NUC, CBN, DPs, NISER, Professional Bodies	FGN (ECN, NISER), OPS, DPs	*	*	*
<i>(ii) Determining periodically the manpower stock and needs.</i>	(a) Conducting survey to access the manpower requirement.	ECN	ECN, FMed., NUC, DPs, NBTE, NCCE, FML&E	FGN (ECN)	*	*	*
<i>(iii) Developing a national programme to meet energy manpower needs.</i>	(a) Introducing energy awareness into the nation's educational curriculum.	FMed.	ECN, NERDC, NUC, DPs, NBTE, NCCE, NOA	FGN (FMed.)	*	*	*
	(b) Establishing technical collaboration with specialized institutions and industries on energy programmes outside the country.	ECN	FMed., NNPC, OPS, DPs, MFA, PTDF, NPC	FGN (ECN)	*	*	*
	(c) Call for memoranda from stakeholders on the requirements necessary for an effective training and manpower development in the energy sector.	ECN	NNPC, NAEC, OPS, FMP DPs, PTDF, FMWR, FMA&RD, NUC, NBTE	FGN (ECN)	*	*	*
	(d) Promoting local capability in the nation's Energy Centres and Research Institutes for the design and fabrication of efficient energy devices and technologies.	ECN	FMP, FMSTI, NNPC, NAEC, OPS, PHCN, DPs, PTDF, FMA&RD, FMWR, NUC, NBTE, RMRDC, RIs	FGN (ECN)	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
	(e) Providing increased funding to R & D activities.	ECN	FMFBNP, FMP, NNPC, NAEC, OPS, DPs, PTDF, FMA&RD, FMWR, NUC, NBTE, FMSTI, RMRDC	FGN (ECN)	*	*	*
	(f) Developing and implementing R & D programmes in energy efficiency and conservation.	ECN	FML&E, NNPC, NAEC, OPS, FMP, DPs, PTDF, FMA&RD, FMWR, NUC, NBTE	FGN (ECN)	*	*	*
<i>(iv) Ensuring the integration of Research, Development and Manpower training in the energy sector.</i>	(a) Reviewing energy-related manpower development programmes of the nation's Institutions, Research Institutes and Centres.	FMSTI	ECN, TIs, RCs, RIs, NPC, FMEd., NNPC, FMP, TETFUND	FGN (FMSTI)	*	*	*
	(b) Evaluating the existing infrastructural facilities in the nation's energy Research Institutes and Centres with a view to providing conducive atmosphere for R & D activities.	ECN	FMSTI, RCs, RIs, TIs, NPC, FMWH, NNPC, FMP, FMEnv., TETFUND	FGN (ECN)	*	*	*
	(c) Organizing regular interactive fora for stakeholders in R&D, production and training.	ECN	NOTAP, NNPC, FMPE, OPS, DPs, NBTI, NBTE, NCCE, RCs, RIs, TIs, NUC	FGN (ECN)	*	*	*
	(d) Developing framework for effective hands on training programmes.	ECN	NBTE, ITF, NCCE, FMSTI, RCs, RIs, OPS, DPs	FGN (ECN)			
	(e) Encouraging industries to incorporate R&D projects from pilot stage to production.	FMIT&I	FMP, FMSTI, FMI, OPS, RCs, MAN, FMIT&I, ECN	FGN (FMIT&I)	*	*	*
<i>(v) Formulating legal framework for ensuring inter – agency collaboration in the energy sector manpower development.</i>	(a) Developing institutional framework for collaboration in the energy sector.	ECN	NBTE, OPS, NBS, FMI, NPC, NUC, CBN, DPs, NISER, Professional Bodies, AUDA-NEPAD	FGN (ECN, NISER), OPS, DPs	*	*	
	(b) Establishing an inter – ministerial committee for manpower development.	ECN	MPR, FMP, FMSTI, FMEnv., FMEd., AUDA-NEPAD	FGN (ECN)	*		

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
	(c) Strengthening laws already put in place for energy producers to support training and manpower development.	ECN	NASS, FMJ, FMP, NERC, MPR, ECN, OPS, ITF	FGN (NASS)	*	*	*
	(d) Developing an energy education curricula for all levels.	FMed.	FMP, FMSTI, MI, OPS, DPs, NAEC, ECN, NERDC, NUC, NBTE	FGN (FMed.)	*	*	*
<i>(vi) Ensuring through legislation, that energy producers make available certain percentage of their annual profit to support/fund manpower development and training.</i>	(a) Developing an energy education curricula for all levels.	FMed., NASS	FMP, FMSTI, FMI, OPS, DPs, NAEC, ECN	FGN (FMed.)	*	*	*
<i>(vii) Introducing energy education at all levels of the nation's educational curricula.</i>	(a) Introducing energy education for all, through organization of conferences, seminars, workshops, short term courses, etc.	ECN	FMed., FMP, FMSTI, MI, OPS, DPs, NAEC	FGN (ECN)	*	*	*
	(b) Introducing hands-on training in research laboratories, energy producing units, energy research centres, precision machine workshops, etc.	ECN	FMed., FMP, FMSTI, MI, OPS, DPs, NAEC, RCs, RIs, TIs	FGN (ECN)	*	*	*
	(c) Establishing engineering workshops for the training of energy practitioners.	ECN	FMed., FMP, FMSTI, MI, OPS, DPs, NAEC, RCs, RIs, TIs, COREN, NASENI	FGN (ECN)	*	*	
	(d) Directing the host university of each energy research centre to run certificate and degree programmes in energy studies.	ECN	FMP, FMSTI, MI, OPS, DPs, NAEC, RCs, RIs, TIs, NUC, FMed.	FGN (ECN)	*	*	
<i>(viii) Integrating energy studies into the curricula of secondary and tertiary institutions while emphasizing thier multi-disciplinary nature.</i>	(a) Carrying out survey exercise to determine the manpower stock and needs in the nation.	ECN	NBTE, OPS, NBS, MI, NPC, NUC, CBN, DPs, NISER, Professional Bodies, NOTAP	FGN (ECN, NISER), OPS, DPs	*	*	*

12.3 Local Content

To attain the vision 20:2020 intent and beyond, it is necessary that human capacity development be a major focus in the energy sector. Equally important is the necessity to transform the vast endowment of energy related resources in the country for the benefit of the nation. We need to develop in the country training institutions to enhance the support, design and fabrication not only in the oil and gas industry but in all spheres of the energy mix. We should also develop local coal technology and the vast renewable energy available to the country. Research in these areas should be pursued by encouraging collaboration between the industry and the tertiary institutions to foster world class technological development locally.

12.3.1 Policy

- i. The nation shall encourage the use of locally available Resources in all aspect of the energy sector in Nigeria.

12.3.2 Objective

- i. To encourage local production of inputs required for development of energy sector.

12.3.3 Action Plan

Table 12.3: Action Plan for Local Content

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(i) Identifying, quantifying and qualifying resources for use in the energy sector in Nigeria.</i>	(a) Conducting baseline studies on the quantity and quality of available energy resources in the country.	ECN	NERC, FMFBNP, CBN, OPS, NNPC, MPR, BPE, FMP, MMSD, RMRDC, FMSTI, NBS	FGN (ECN)	*	*	*
<i>(ii) Conducting studies on national demand and export possibilities of locally produced materials in the energy sector.</i>	(a) Funding research studies on the national possibilities of locally produced raw materials in the energy sector.	ECN	CBN, FMFBNP, RIs, Tis, FMIT&I, FMSTI, RMRDC, NAEC	FGN (ECN, CBN)	*	*	*
	(b) Encouraging the local production of materials in the energy sector through tax waivers and provision of subsidies and other incentives..	ECN	FMFBNP, FMIT&I, MI, RMRDC, FMSTI, FMA&RD, FMWR, NIPC, NOTAP	FGN (ECN)	*	*	*
<i>(iii) Providing incentives to encourage local manufacturing and production of equipments and consumables used in the energy sector.</i>	(a) Creating Energy Development Fund.	ECN	FMSTI, FMIT&I, RMRDC, CBN, BOI, BOA, FMFBNP	FGN (ECN)	*	*	*
	(b) Reducing tax on locally manufactured goods.	FMFBNP	CBN, NCS, FIRS	FGN (FMFBNP)	*	*	*
<i>(iv) Enacting law(s) to ensure local sourcing of materials related to energy production and utilization.</i>	(a) Strengthening the institution that are saddled with the mandate of the local content development and raw material sourcing.	NCDMB, RMRDC	FMSTI, RCs, RIs, OPS, FMIT&I, SON	FG (RMRDC, NCDMB)	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(v) Establishing a common and comprehensive local content measurement for the entire energy sector.</i>	(a) Creating an enabling law on local content for the energy sector.	ECN	FMSTI, ECN, FMP, RCs, RIs, ECN, FMJ	FGN (ECN)	*	*	*
<i>(vi) Increasing patronage of indigenous engineering and applied research groups in the execution of projects right from feasibility studies.</i>	(a) Creating laws that compel companies to use certain percentage of indigenous engineers and researchers.	NCDMB, COREN	ECN, NSE, FMSTI, FMFBNP, FMWH, COREN	FGN (COREN)			
	(b) Encourage the use of indigenous experts.	FML&E	FMFBNP, NCDMB, COREN	FGN (COREN), NSE			
<i>(vii) Establishing a financing mechanism which will support indigenous investments in the energy sector industries.</i>	(a) Implementing all the activities prescribed for strategies i, ii, iv, v, vi under financing.	CBN	ECN, FMFBNP, NIPC, OPS	FGN (CBN), OPS	*	*	*
<i>(viii) Putting in place other incentives, appropriate to each energy sub-sector, which will promote indigenous private sector participation and competitiveness in the sub-sector.</i>	(a) Implementing the incentives prescribed in the plans for each energy sub-sector	ECN	NERC, FMFBNP, CBN, OPS, NNPC, MPR, BPE, FMP	FGN (ECN)	*	*	*
<i>(ix) Putting in place schemes to ensure broad-based access by Nigerians to shares in privatized energy sector industries.</i>	(a) Establishing and implementing appropriate monetary policies	BPE	FMFBNP, SEC, OPS, ADB	FGN (BPE)	*	*	
<i>(x) Encouraging the establishment of energy sector production and service industries by indigenous investors.</i>	(a) Providing tax holidays and encouraging indigenous participation in the energy sector	ECN	FMSTI, RCs, RIs, OPS, NIPC, FMIT&I, NCDMB	FG (ECN)	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(xi) Creating appropriate motivation through the Memorandum of Understanding and / or Operating Licenses in the energy sector, for increasing the local content of value added in the activities of energy sector industries.</i>	(a) Including and implementing local content of value added in all energy sector projects.	ECN	NERC, FMFBNP, CBN, OPS, NNPC, MPR, BPE, FMP, FMIT&I, FMJ	FGN (ECN)	*	*	*
	Develop a mechanism for a less stringent procedure of issuance of operational licence without compromising standards	ECN	FMIT&I, FMJ NERC, FMFBNP, CBN, OPS, NNPC, MPR, BPE, FMP, FMIT&I, FMJ	FGN (ECN)	*	*	*

12.4 Bilateral, Regional and International Cooperation

Nigeria is involved in bilateral, regional and international arrangements in the area of energy within the framework of its economic relations with other countries and multilateral institutions. This collaboration is designed to complement domestic efforts towards energy security for the nation. Energy supply, joint management and equity participation in the development of energy sources are important aspects of our bilateral and multilateral cooperation arrangements with other African Countries.

The nation's membership of sub-regional, regional and international organizations such as ECOWAS, APPA, AU, UN, IAEA, WEC, OPEC, AFREC, IRENA, IEC, etc, provides opportunity for it to play an active role in their energy agenda. It is necessary to foster this multilateral co-operation for rapid national economic development. From past experiences in the effort of the Africa region towards economic integration, it is clear that a step-by-step approach based on common interests and the pooling of resources offers the best prospects for a successful and lasting integration. In this respect, the energy sector offers some mutually beneficial opportunities for projects which can be implemented in the short to medium term.

12.4.1 Policies

- i. The nation's energy resources shall be deployed in promoting and enhancing regional and international co-operation for the overall economic and technological advancement of the nation.
- ii. The nation shall lay emphasis on fostering and strengthening energy cooperation and integration within the ECOWAS sub – region.
- iii. The nation shall pursue international collaboration on energy.

12.4.2 Objectives

- i. To enhance Nigeria's effective participation in energy related international organizations.
- ii. To facilitate the adoption of technology for the development of the energy sector.
- iii. To encourage a cooperative approach in the exploitation of energy resources and development of energy supply infrastructure.
- iv. To optimize the utilization of the region's energy resources.
- v. To grow the national economy, promote security and influence regional and international decision on energy.
- vi. To expand access to energy services through international collaboration.

12.4.3 Action Plan

					S	M	L
<i>(i) Strengthening co-ordinated approach to regional and sub-regional energy planning based on co-operation and consultation among member countries of ECOWAS and other members of the African Union (AUDA-NEPAD).</i>	(a) Ensuring regular payment of Nigeria's membership dues in ECOWAS and other AU energy related bodies.	ECN	FMSTI, RCs, RIs, TIs, NNPC, FMP, MFA, AFREC, ECOWAS, AU	FGN (ECN, FMSTI, RCs, RIs, TIs)	*	*	*
	(b) Ensuring full representation and participation in the activities of these sub-regional and regional bodies in energy related matters.	ECN	FMSTI, RCs, RIs, TIs, NNPC, MFA, AFREC, ECOWAS, AU	FGN (ECN)	*	*	*
<i>(ii) Promoting the standardization and certifications of energy related plants, machineries and spares and the establishment of infrastructural facilities within the community for their production.</i>	(a) Negotiating and developing common standards for energy related plants, machineries, spares and equipment for use within the sub-region.	SON, ECN	FMIT&I, ECOWAS, MFA, DPs, OPS, Professional bodies	FGN (SON), OPS, DPs	*	*	*
	(b) Establishing facilities for standardization of energy-related plants, machineries, spares and equipment.	SON, ECN	FMIT&I, ECN, DPs, ECOWAS, MFA, OPS	FGN (SON), OPS, DPs	*	*	*
<i>(iii) Mobilizing domestic capital and creating a favourable investment climate to attract international financing for energy development projects.</i>	(a) Negotiating a financing instrument to mobilize domestic funds within the region for long-term investments in the energy sectors.	FMFBNP	SEC, DPs, OPS, MFA, FMIT&I, CBN, BOI	FGN (FMFBNP), DPs, OPS	*	*	*
	(b) Continuing the on-going reform and restructuring programmes in the country's energy sub-sectors and encouraging similar programmes in other countries of the sub-region.	BPE	NERC, NUPRC, NNPC, DPs, ECOWAS, NCP, AUDA-NEPAD	FGN (BPE), DPs, OPS	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(iv) Pooling available human resources through networking of National Energy Training and Research Centers.</i>	(a) Establishing a database of experts and institutions in the energy sector of the region.	ECN	FMSTI, ECOWAS, DPs, FMP, NBS, OPS, Professional Bodies	FGN (ECN)	*	*	*
	(b) Encouraging the formation of sub-regional and regional energy-related associations and professional bodies.	ECN	Professional Bodies, DPs, NPC, NGOs, MFA, AUDA-NEPAD, ECOWAS	FGN (ECN)	*	*	*
<i>(v) Ensuring Nigeria's active membership in energy related regional and international organizations</i>	(a) Ensuring periodic review of Nigeria's membership status in sub-regional, regional and international energy related organizations.	ECN	MFA, FMSTI,	FGN (ECN)	*	*	*
	(b) Ensuring prompt payment of dues to all sub-regional, regional and international energy related organizations Nigeria belongs to.	ECN	FMSTI, MFA, AUDA-NEPAD	FGN(ECN)	*	*	*
<i>(vi) Promoting favourable trading relationships with member countries of ECOWAS and the AUDA-NEPAD, which will ease the financing of energy supply and other energy related projects.</i>	(a) Negotiating the relaxation of trade restrictions on energy supply and technologies in Africa.	FMIT&I	MFA, ECN, AUDA-NEPAD, ECOWAS, OPS	FGN (FMIT&I)	*	*	*
	(b) Exploring new areas of energy trade with member countries of the AU.	FMIT&I	MFA, ECN, AUDA-NEPAD, ECOWAS, OPS	FGN (FMIT&I)	*	*	*
<i>(vii) Strengthening the West African Power Pool.</i>	(a) Pursuing vigorously the realization of the on-going sub-regional and regional energy projects as well as initiating new ones.	ECN	FMA&RD, FMWR, OPS, DPs, NERC, AUDA-NEPAD	FGN (ECN), OPS, DPs	*	*	*
	(b) Establishing mutually beneficial energy trading terms with regional and sub-regional partners.	ECN, NNPC	FMWR, OPS, DPs, SON, NERC, AUDA-NEPAD, FMIT&I	FGN (ECN), OPS, DPs	*	*	*

	(c) Establishing regional and sub-regional networks of energy research establishments and energy equipment testing laboratories.	ECN	FMWR, OPS, ECN, SON, DPs, FMSTI, MFA	FGN (ECN), OPS, DPs	*	*	*
	(d) Initiating the formation of a joint committee of member states within the ECOWAS sub-region engaged in energy programmes to work out joint proposals for presentation to development partners for funding.	ECN	FMWR, OPS, DPs, ECOWAS, FMP, AUDA-NEPAD	FGN (ECN), OPS, DPs	*	*	*
	(e) Establishing energy sector networks, information and experience exchange strategies.	ECN	NERC, DPs, OPS, FMP	FGN (ECN), DPs, OPS	*	*	*

12.5 Gender Issues

It is difficult for many traditional energy planners to understand how gender mainstreaming and empowerment relate to their work as these appear to be political or social welfare concerns far removed from decisions about fuel supplies and technology choices. Gender sensitivity may be viewed as an ‘add-on’ to energy programmes, one that is easy to drop off. Energy policy specialists rarely pay attention to gender issues and therefore do not consider gender issues in policy making. Energy planning in reality is gender-blind; it fails to recognize that the women’s practical productive and strategic energy needs are different from those of men, so inadvertently discriminates usually against them.

Integrating energy projects into other types of development programmes can help to shift the focus from technology-driven interventions to more integrated initiatives that take into account a community’s social and economic development needs. In that context, it is likely that concerns about women’s need might seem more understandable. Promoting increased participation of women in energy decision making at all levels in another way to ensure that women concerns are taken into account.

12.5.1 Policies

- i. The nation shall encourage and ensure gender mainstreaming in energy issues; infrastructure programs and projects.
- ii. The nation shall disaggregate energy use, supply and impacts by gender in energy project design and implementation.

12.5.2 Objectives

- i. To create awareness on gender issues in the energy sector.
- ii. To provide better basis for incorporating gender in energy project design and implementation at the micro- and macro- policy levels.

12.5.3 Action Plan

Table 12.5: Action Plan for Gender Issues

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE

<i>(vi) Establishing gender units in all MDAs in the energy sector.</i>	(a) Creating gender units in all MDA's.	FMWA&SD	FMWA&SD, FMFBNP, OPS, NGOs, DPs, MDAs	FGN (ECN), DPs	*	*	
<i>(vii) Ensuring gender sensitive capacity building programmes in the energy sector.</i>	(a) Organizing training and capacity building to accommodate gender mainstreaming responsibility.	FMWA&SD	ECN, FMFBNP, OPS, NGOs, DPs, NCWD	FGN (ECN), DPs	*	*	*
<i>(viii) Ensuring equal access to electricity for water pumping, agricultural processing, security, work productivity, and health in the framework of sectoral development initiatives.</i>	(a) Reserving a particular percentage of electricity for domestic use.	NERC	FMFBNP, OPS, NGOs, DPs, MDAs, DISCOs, REA, SGs, LGs, ECN	FGN(NERC), DPs	*	*	*
<i>(ix) Conducting gender audits of national energy and other related policies.</i>	(a) Empowering the train the trainee programme.	ECN	FMFBNP, OPS, NGOs, DPs, MDAs, FMWA	FGN (ECN), DPs	*	*	

CHAPTER THIRTEEN

ENERGY FINANCING

13.0 Introduction

Energy Infrastructure projects are capital-intensive. Therefore ensuring easy accessibility to adequate, reliable and affordable energy services, in Nigeria, requires huge investment.

The key question that needs to be addressed is: what are the options and strategies for mobilizing domestic and international capital to finance the investment requirements of sustaining long term energy and socio-economic development in Nigeria

In the light of the above question, some measures need to be put in place in addressing the key issues. For instance, energy projects should be properly chosen, designed and packaged to be attractive to domestic and foreign investors. Moreover maximum advantage should be taken of the international funds available for environmentally sound energy projects

In Nigeria access to energy finance is affected by:

- Inadequate national support system that guarantees the attraction and security of investment;
- Inadequate financial capacity for energy investment;
- Slow judicial process in settling dispute;
- Inadequate strategies for attracting offshore financing;
- Political and regulatory risks for investment in energy infrastructure;
- Inadequate incentives to business to invest in new technologies;

Some of the remedial measures to counter these, especially for the energy sector, have been enumerated in this master plan such as; establishing a tax holiday scheme, Introducing tariffs that guarantee good rate of return on investment etc. Moreover some of the identified niche products that could be employed in financing energy projects are Equity financing mechanism, bond market, financial collaboration between government/private with bilateral and multilateral institutions etc.

13.1 FINANCING

13.1.1 Policies

- i. Investments in the nation's energy sector shall be accorded high priority within the economic sector.
- ii. The nation shall provide financing policy frame work for achieving a sustainable development of the sector.
- iii. The nation shall explore and adopt all viable financing options from local and international sources for cost effective exploitation of its energy resources.
- iv. The nation shall encourage increase in private investments, both domestic and foreign, in the energy sector.
- v. The nation shall implement the National Integrated Infrastructure Master Plan (NIIMP) to enable cross sectoral harmony and financing frame work.
- vi. The nation shall create an investment friendly environment through improving real and perceived risk by private investors measured through Transparency International corruption Index, World Bank doing business index, millenium challenge corporation rating, e.t.c.

13.1.2 Objectives

- i. To ensure the availability of adequate funding for the energy sector.
- ii. To ensure continuity in the funding of projects in the energy sector.
- iii. To attract foreign investments from a highly competitive international finance market
- iv. To ensure that the energy supply options adopted are the most cost – effective for the country.
- v. To increase foreign exchange earnings through export of energy products.

13.1.3 Action Plan

Table13.1: Action Plan for Energy Financing

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(i) Providing fiscal incentives for prospective investors in the energy sector.</i>	(a) Providing fiscal incentives (such as suspension of import duty , tax holiday, investment grants, operational grants, etc.) to encourage local production of energy systems and components.	ECN, FMFBNP, FMIT&I	CBN, NASS, FMP, FMSTI, NUPRC, NNPC, OPS, DPs, NIPC, FIRS, NCS	FGN (ECN, FMFBNP)	*	*	
	(b) Providing value chain financial products and services to scale up bankable RE and EE projects.	FMFBNP, ECN	CBN, NERC, NUPRC, BOI, OPS, DPs	FGN (ECN)	*	*	*
<i>(ii) Reviewing the existing laws and regulations for the operation of the energy sector industries so as to increase private sector participation in the industries.</i>	(a) Periodic reviewing and Implementing the existing Electricity Sector Power Reform Act, consistently.	FMP, BPE, NERC	REA, FMFBNP, OPS, DPs, FMSTI, ECN, MMSD, FMJ, NASS, NUPRC, NNPC	FGN (FMP) BPE, NERC	*	*	*
	(b) Introducing environmental regulations that encourage investment in environmental friendly technologies	FMEnv.	NERC, REA, FMFBNP, OPS, DPs, FMSTI, ECN, MMSD, FMJ, NASS, FMP, NUPRC, NNPC	FGN (FMEnv.)	*	*	
<i>(iii) Ensuring periodic review of energy pricing to guarantee a reasonable return on investment.</i>	(a) Introducing tariffs that guarantee good rate of return on investment whilst considering consumer purchasing power..	NERC, NMDPRA	NNPC, FMJ, FMP, NUPRC, REA, FMIT&I, OPS, FMF, ECN	FGN (NERC, NMDPRA), OPS	*	*	*
<i>(iv) Employing the use of Public Private Patnership (PPP) models to finance viable energy projects.</i>	(a) Instituting a scheme for accelerated depreciation of equipment in respect of (foreign) loans invested in energy projects.	FMFBNP	ECN, OPS, MAN, FMIT&I, FMFBNP, CBN, DPs, NIPC, FMP, FMWH	FGN (FMFBNP), OPS, DPs	*	*	*
<i>(v) Encouraging the inflow of offshore investment funds from international investment banks and brokerage firms.</i>	(a) Introducing concessionary feed -in tariff for RE based energy supply.	NERC, REA	ECN, FMFBNP, OPS, FMP	FGN (NERC, REA), OPS	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
	(b) Establishing special risk fund scheme for commercialization of new and emerging energy technologies such as RET.	FMFBNP	FMSTI, ECN, OPS, DPs, CBN, NASS, NIPC, SEC, NSE	FGN (NERC, REA), OPS	*	*	
	(c) Attracting and leveraging long-term financing from international institutions and climate finance (e.g Green Climate Fund).	FMFBNP	SEC, CBN, OPS, DPs	FGN (NERC, REA), OPS	*	*	*
	(d) Providing adequate security for energy infrastructural facilities.	OSGF	Security Agencies, SGs, LGs	FGN (OSGF)	*	*	*
<i>(vi) Encouraging energy firms to source development funds from the Nigerian capital market.</i>	(a) Establishing and implementing appropriate monetary policies.	SEC	CBN, OPS, FMFBNP	FGN (FMFBNP)	*	*	*
<i>(vii) Establishing a clear legal and regulatory frame work for energy financing in Nigeria.</i>	(a) Developing laws related to energy financing.	ECN	FMFBNP, CBN, NASS, NERC, FMJ, NMDPRA	FGN (ECN)	*	*	*
<i>(viii) Empowering the fiscal and monetary authorities to execute energy financing in Nigeria.</i>	(a) Establishing and implementing appropriate monetary policies. Establishing plan that will monitor and execute energy financing in Nigeria.	FMFBNP	SEC, OPS, CBN	FGN (FMFBNP)	*	*	*
<i>(ix) Furthering the internalization of Nigeria's Capital Market by encouraging stocks of Nigeria's energy corporate units to be quoted in the International Stock Exchange to attract foreign portfolio investment capital.</i>	(a) Establishing and implementing appropriate capital market policies.	FMFBNP, SEC	CBN, SEC, NSE	FMFBNP, SEC	*	*	*
<i>(x) Expanding the scope of venture capital financing to embrace investments in the energy sector.</i>	(a) Establishing and Implementing appropriate policies.	FMFBNP, SEC	CBN, OPS	FMFBNP	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE

<p>(xi) Establishing a financial mechanism for the energy sectors such as:</p> <p>a. Infrastructure Project Development Facility (IPDF) to finance the development of a pipeline of bankable energy projects.</p> <p>b. Government Resource fund as independent source to support energy projects.</p> <p>c. Long term refinancing mechanisms for energy assets.</p> <p>d. Mechanisms for developing corporate bonds to unlock pension funds for energy finance.</p>	(a) Providing Infrastructure Project Development Facility (IPDF) to finance the development of a pipeline of bankable energy projects.	FMFBNP	CBN, SEC, OPS	FMFBNP	*	*	*
	(b) Establishing Government Resource Fund as independent source to support energy projects.	FMFBNP	CBN, SEC, OPS, BOI	FMFBNP	*	*	*
	(c) Setting up long term refinancing mechanisms for energy assets.	FMFBNP	CBN, SEC, OPS	FMFBNP	*	*	*
	(d) Instituting mechanisms for developing corporate bonds to unlock pension funds for Energy Financing.	FMFBNP, DMO	CBN, SEC, OPS, PENCOM	FMFBNP, DMO	*	*	*

CHAPTER FOURTEEN

PLANNING AND POLICY IMPLEMENTATION

14.0 Introduction

The interdependencies of the energy sector and the other sectors of the economy, the strong interrelationship between energy demand, supply and consumption and the associated environmental pollution due to energy, point to the complexity of, and the need for energy planning. A nation must have effective energy planning and management strategies arising from its energy policy, in order to be able to meet short-, medium-, and long-term energy requirements of the various sectors of its economy.

Energy planning can be seen as a process of establishing a conceptual framework of organizing the future development of energy systems of a nation based on the past and present consumption trends and factors/parameters driving energy consumption in that society. It is basically the process of understanding the operation of the energy supply and demand systems and the procedure by which decisions are made to invest in new energy equipment, to change the pattern of energy use, to formulate energy policies, to allocate energy resources for growth and development and to provide reliable energy and make it available, accessible and affordable.

Energy planning and policy implementation in the country take place at four different levels. At the *National Level*, they involve macro planning and policy implementation as part of the multi-sectoral national development policies and plans, which are the responsibilities of the Federal Ministry of Finance, Budget and National Planning (FMFBNP). At the *Sectoral Level*, they involve overall sectoral planning, monitoring and co-ordination of policy implementation for the energy sector, in all its ramifications. The function ensures consistency of sub-sectoral energy policies and plans with the overall national energy policies and plans and that the implementation of the latter is in accordance with provisions. At the *Sub-sectoral Level*, more specific sub-sectoral planning and policy implementation for the development, exploitation and utilization of particular energy resources, are carried out in the various energy sub-sectors, namely oil and gas, electricity, solid minerals, etc. These involve the Ministries of Petroleum Resources, Power, Mines & Steel Development, Solid Minerals, and others respectively. Other energy utilization sub-sectors such as transport, industry, agriculture, as well as research and development, are also relevant. Finally, at the *Operational Level*, activities involve the execution of the policies and plans developed at the sub-sectoral level by operational establishments such as oil exploration, production and marketing companies, power generating, transmission and distribution companies.

There is no policy that can succeed without proper implementation. In order to achieve the stated policy objectives and successfully implement the strategies, various instruments including policy, legal and regulatory framework, economic measures, information and education, capacity development and institutional framework have to be employed.

In addition, for effective and efficient implementation of the master plan, monitoring and evaluation mechanisms must be put in place in order to make sure that the implementation of the plan is on course and if necessary revise it to fulfill its objectives and goals. Monitoring and Evaluation provide the tools to:

- measure progress of how the stated goals are being achieved
- track inputs, activities and outputs
- determine whether the implementation of the master plan is on course
- highlight problems or potential problems before the situation becomes critical
- review strategies and take corrective actions to ensure that performance conforms to expected outputs in the light of new experience

In order to adequately monitor and evaluate the achievement of targets set in the master plan, a number of performance variables or parameters have been defined for each energy type. Each performance variable can easily be compared with the target values set under the short, medium or long-term scenarios. In this way, the progress of implementation of the National Energy Master Plan can easily be monitored and evaluated.

14.1 ENERGY PLANNING

14.1.1 Policies

- i. The nation shall develop an integrated energy planning system involving the energy related programmes and activities of the various sectors of the economy.
- ii. The nation's energy planning system shall be comprehensive, covering the resource exploitation, processing, consumption and conservation activities.
- iii. The nation's energy plans and programmes shall be consistent with the overall national development goals.
- iv. The nation's energy planning process shall be carried out in collaboration with relevant ministries, departments and agencies at the federal, states and local levels as well as other stakeholders.
- v. The nation's energy planning process shall be evidence based.

14.1.2 Objectives

- i. To ensure coherency in the energy plans and activities of the various sectors of the economy.
- ii. To ensure that the various energy plans and programmes are consistent with the overall national energy policy and development plans.
- iii. To provide a framework for national decision making in energy related matters.
- iv. To provide the enabling frame work for the adequate supply of energy to different sectors of the economy.
- v. To optimize the supply and utilization of the various energy resource types.
- vi. To promote local content in the energy sector.
- vii. To provide input into national development planning and policy formulation.
- viii. To ensure an environmentally sustainable development of the energy sector.
- ix. To ensure that planning is based on reliable, timely and relevant energy statistics.

14.1.3 Action Plan

Table 14.1 Action Plan for Energy Planning

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(i) Strengthening co-operation between Energy Commission of Nigeria and other relevant stakeholders in the energy sector.</i>	(a) Intensifying formal collaborative partnership.	ECN	All national, regional, and international bodies active in the energy sector	FGN (ECN)	*	*	
<i>(ii) Encouraging formal discussion and collaboration among institutions in the energy sector whose activities are inter-related.</i>	(a) Intensifying formal collaborative partnership.	ECN	Collaborating Institutions	FGN (ECN)	*		
<i>(iii) Encouraging the establishment of energy planning and implementation units at state levels and encouraging the assignment of responsibilities for energy related matters at local government levels.</i>	(a) Establishing State and Local Government Energy Planning and Implementation Units.	ECN	SGs, LGs, FMFBNP	FGN (ECN), SGs, LGs	*	*	
<i>(iv) Ensuring that the strategic plans and programmes of the energy sub-sectors are appropriately appraised for ensuring consistency with the overall national energy policy and plans and resolving conflicts arising from sub-sectoral plans and programmes.</i>	(a) Carrying out integrated energy planning studies.	ECN	All Collaborating Energy bodies and institutions, FMFBNP	FGN (ECN)	*	*	*
	(b) Presenting the results of energy planning studies to stakeholders.	ECN	All Collaborating Energy bodies and institutions	FGN (ECN)	*	*	*
<i>(v) Establishing a national energy information management system which will involve consistent data gathering and processing of energy resource inventory, consumption pattern, energy technologies, and other relevant socio-economic parameters.</i>	(a) Strengthening the National Energy Information System.	ECN	All Collaborating Energy bodies and institutions, NBS	FGN (ECN), OPS, DPs	*	*	*

	(b) Generating energy data bank for energy planning.	NBS	All Collaborating Energy bodies and institutions	FGN (ECN, NBS), OPS, DPs	*	*	*
<i>(vii) Developing an energy master plan, which is based on the study of energy demand by energy type and category of end-use, energy supply, as well as energy-economy -environment interactions.</i>	(a) Fast-tracking the development of the national energy master plan.	ECN,FMFBNP	All Collaborating Energy bodies and institutions	FGN (ECN), DPs	*		
	(b) Presenting the energy master plan to the stakeholders.	ECN	All Collaborating Energy bodies and institutions	FGN (ECN), DPs	*		
	(c) Submitting the energy master plan to the Federal Executive Council.	ECN	FMSTI, FMFBNP	FGN (ECN)	*		
	(d) Monitoring, evaluating and periodic reviewing of the Energy Master Plan.	ECN	All Collaborating Energy bodies and institutions	FGN (ECN)	*	*	*
<i>(viii) Putting in place an effective programme for accelerated manpower development.</i>	(a) Assessing energy manpower stock and needs.	ECN	All Collaborating Energy bodies and institutions	FGN (ECN), OPS, DPs	*	*	*
	(b) Making recommendations to the Federal Executive Council on energy manpower needs.	ECN	All Collaborating Energy bodies and institutions	FGN (ECN), OPS, DPs	*	*	*
	(c) Organizing training and workshops on energy manpower needs.	ECN	All Collaborating Energy bodies and institutions	FGN (ECN), OPS, DPs	*	*	*

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE		
					S	M	L
<i>(ix) Providing a system for the development of indigenous capabilities in energy conversion technologies</i>	(a) Taking inventory of all available indigenous energy conversion technologies	ECN	All Collaborating Energy bodies and institutions	FGN(ECN)			
	(b) Standardization of embraced indigenous energy conversion technologies.	ECN	All Collaborating Energy bodies and institutions	FGN(ECN)			
	(c) Upgrading energy related institutions.	ECN	All Collaborating Energy bodies and institutions	FGN(ECN)			
	(d) Study tours to enhance international best practice.	ECN	All Collaborating Energy bodies and institutions	FGN(ECN)			

14.2 Policy Implementation

14.2.1 Policies

- i. The nation's energy related policies will derive from, and be consistent with, the overall National Energy Policy.
- ii. The Energy Commission shall be the focal point for the coordination, monitoring and evaluation of the policy implementation at the National, State and Local Government levels.

14.2.2 Objectives

- i. To ensure the effective implementation of the national energy policy.
- ii. To ensure that the energy sector plays its expected role in the realization of the goals of the national development plan.
- iii. To ensure consistency between the national energy policy and the various sub-sectoral policies on energy matters.
- iv. To ensure that there is no conflict between the various sub-sectoral energy policies.
- v. To strengthen the coordination, monitoring and evaluating functions of the Energy Commission.
- vi. To ensure that the impact of NEP is fully effective to all end users.

14.2.3 Action Plan

Table 14.2: Policy Implementation Plan

STRATEGIES	ACTIVITIES	IMPLEMENTING AGENCIES	COLLABORATING AGENCIES/ ORGANISATIONS	FUNDING SOURCES	TIMELINE

<i>(ii) Ensuring periodic reporting on the monitoring and evaluation of activities.</i>	(a) Dissemination of findings through the print and electronic media.	ECN	All Collaborating Energy bodies and institutions	FGN (ECN), OPS, DPs	*	*	*
<i>(iii) Organizing periodic stakeholders forum on implementation.</i>	(a) Organizing national workshops on the implementation of the NEMP.	ECN	All Collaborating Energy bodies and institutions	FGN (ECN), OPS, DPs	*	*	*
	(b) Organizing sectoral workshops, conferences and seminars on the implementation of the NEMP.	ECN	All Collaborating Energy bodies and institutions	FGN (ECN), OPS, DPs	*	*	*

APPENDIX A

MONITORING AND EVALUATION PARAMETERS

The implementation of the National Energy Master Plan will be effectively monitored and evaluated. Effective monitoring is essential in order to

- (a) Ensure that stated goals are being achieved
- (b) Track inputs, activities and outputs;
- (c) Determine whether or not implementation of the NEMP is on course
- (d) Highlight problems or potential problems before the situation becomes critical
- (e) Take corrective actions to ensure that performance conforms to strategy or that the strategy is revised in the light of new experience.

Many factors may influence progress towards meeting set objectives, and these include unexpected turns in the economy, ineffective strategies and ineffective policies. Further, problems can result from ineffectiveness (not doing the right things) or inefficiency (doing right things poorly). Effective monitoring keeps track of these factors and any other changes in the system.

In order to adequately monitor and evaluate the achievement of targets set in the NEMP, a number of performance variables or parameters have been defined for each energy type as shown in tables 1 to 15 below. Only variables that can be quantified in standard units have been selected for each evaluation period. Each performance variable can easily be compared with the target values set under the short, medium or long-time scenarios. In this way, the Energy Masterplan implementation progress can easily be monitored and evaluated. Tables 1 to 15 are shown below:

Table A1: Crude Oil Plan Evaluation Parameters

Performance Variable	Units	Present Value	Target Values		
			Short	Medium	Long
Indicated reserves	Billion barrels				
Crude Oil production	Million barrels per day				
Refining Capacity	Million barrels per day				
Refining capacity utilization	%				
Transport fuel storage capacity	Day				
Pipeline utilization effectiveness (volume of products transmitted by pipeline as percentage of total volume of products transported)	%				

Table A2: Natural Gas Plan Evaluation Parameters

Performance Variable	Units	Present Value	Target Values		
			Short	Medium	Long
Indicated reserves	Trillion standard cubic feet				
Total production	Billion standard cubic feet per annum				
Percentage flared	%				
Total length of distribution network	1CM				

Table A3: Tar Sands/Bitumen Plan Evaluation Parameters

Performance Variable	Units	Present Value	Target Values		
			Short	Medium	Long
Proven reserves	Million tonnes				
Inferred reserves	Million tonnes				
Production rate	Tonnes per annum				

Table A4: Coal Plan Evaluation Parameters

Performance Variable	Units	Present Value	Target Values		
			Short	Medium	Long
Proven reserves	Million tonnes	639			
Inferred reserves	Million tonnes	2750			
Total Production	Thousand tonnes per annum				
Smokeless coal production	Tonnes per annum				

Table A5: Nuclear Plan Evaluation Parameters

Performance Variable	Units	Present Value	Target Values		
			Short	Medium	Long
Rate of graduate-level manpower development	Number of new graduates per annum				
Rate of post-graduate manpower development	Number of new postgraduates trained per annum				
Rate of technical manpower development	Number of new technicians trained per annum				

Table A6: Hydropower Plan Evaluation Parameters

Performance Variable	Units	Present Value	Target Values		
			Short	Medium	Long
Total installed capacity (large scale)	MW				
Total installed capacity (mini-hydro)	MW				
Total installed capacity (micro hydro)	MW				
Percent capacity utilization (large scale)	%				
Percent capacity utilization (mini hydro)	%				
Percent capacity utilization (micro hydro)	%				

Table A7: Fuelwood Plan Evaluation Parameters

Performance Variable	Units	Present Value	Target Values		
			Short	Medium	Long
Total forestry reserve area as percent of total land area	%				

Table A8: Environment Plan Evaluation Parameters

Performance Variable	Units	Present Value	Target Values		
			Short	Medium	Long
Participation in energy/environment public campaigns	Man – hours				
Total volume of crude oil spilled	Barrels				

Table A9: Solar, Biomass and Wind Plans Evaluation Parameters

Performance Variable	Units	Present Value	Target Values		
			Short	Medium	Long
Number of pilot projects commissioned	-				
Percentage of commissioned projects operational	%				
Number of local renewable energy equipment manufactures	-				
Total value of renewable energy equipment manufactured locally	₦				
Total value of renewable energy equipment imported	₦				

Table A10: Electricity Plan Evaluation Parameters

Performance Variable	Units	Present Value	Target Values		
			Short	Medium	Long
Installed capacity (grid-connected)	MW				
Installed capacity (off-grid)	MW				
Capacity utilization (grid-connected)	%				
Capacity utilization (off grid)	%				
Percent access to electricity	%				
Average availability of power supply	%				
Per capita electricity consumption	kWh/annum				

Table A11: Agriculture Plan Evaluation Parameters

Performance Variable	Units	Present Value	Target Values		
			Short	Medium	Long
Training of personnel on dissemination of new energy technologies for agricultural applications	Man – hours				
Participation in activities held to promote utilization of renewable energy technologies in agriculture	Man – hours				

Table A12: Energy Efficiency and Conservation Plan Evaluation Parameters

Performance Variable	Units	Present Value	Target Values		
			Short	Medium	Long
Number of new codes, standards and regulations on energy efficiency /conservation approved	-				
Number of new energy efficient equipment and machinery developed locally	-				
Energy saving due to the utilization of more energy efficient equipment and energy conservation techniques	MJ				

Table A13: Research, Development and Training Plan Evaluation Parameters

Performance Variable	Units	Present Value	Target Values		
			Short	Medium	Long
Total value of funds provided for energy research and development	₦				
Number of new energy topics included in curriculum for secondary and tertiary institutions	-				
New specialist training in energy technologies	Man-years				
Total value of scholarships awarded for degree or postgraduate training in energy technologies	₦				

Table A14: Finance Plan Evaluation Parameters

Performance Variable	Units	Present Value	Target Values		
			Short	Medium	Long
Total value of new investments in the energy sector	₦				
Total value of new loans granted for energy related projects	₦				
Total contribution to GDP by energy related business activities	%				

Table A15: Indigenous Finance Plan Evaluation Parameters

Performance Variable	Units	Present Value	Target Values		
			Short	Medium	Long
Percentage of shares in privatized energy sector industries acquired by Nigerians	%				

Periodic Reports

In order to ensure that the monitoring and evaluation of the Masterplan is carried out effectively, it is essential that periodic reports be prepared. Each report is to include the data of tables 1 to 15, as well as critical comments regarding each strategy approved in the Energy Policy Document. If necessary, recommendations for improvement of any strategy may be indicated. The periodic reports should be submitted to the Board of the Energy Commission of Nigeria for consideration.

In order to embody significant details and allow sufficient time between consecutive reports, the period of reporting should be one year. Preliminary quarterly reports may also be useful.
